Use Case Workshop overview

Use Case Workshops are hands-on, instructor-led courses focused on specific use case outcomes in Cisco Stealthwatch® Enterprise. The workshops are designed to help you quickly identify and investigate common threats and to provide effective workflows so that you can fully understand Stealthwatch capabilities.

In this workshop, you'll work through a series of activities that focus on the use of SIEMs and Stealthwatch to provide insights into your network. In a lab environment, you will learn how to leverage the insights gained by combining the network behavioral context provided by Stealthwatch with the Splunk SIEM.

This workshop is intended to be interactive and engaging. You are encouraged to ask questions, respond to questions, and share best practices and ideas.

After taking this workshop, you should be able to:

- Describe the advantages of integrating Stealthwatch with a SIEM.
- View SIEM data in Stealthwatch by creating a SIEM external lookup option.
- Configure the Splunk SIEM to accept Stealthwatch syslog entries through the Response Management feature.
- Explore a Stealthwatch API integration with Splunk.

Workshop duration

Approximately 2 to 3 hours.

Cisco Capital

Flexible payment solutions to help you achieve your objectives

Cisco Capital makes it easier to get the right technology to achieve your objectives, enable business transformation and help you stay competitive. We can help you reduce the total cost of ownership, conserve capital, and accelerate growth. In more than 100 countries, our flexible payment solutions can help you acquire hardware, software, services and complementary third-party equipment in easy, predictable payments. [Learn more.](#)
