

Cisco Unified Attendant Console Standard Version 12.0

Product Overview

Connect customers, employees, and business partners with the right person, the first time. Cisco® Unified Attendant Console Standard (Figure 1) gives corporate operators and receptionists the tools they need to process incoming calls efficiently and professionally. This desktop application communicates directly with Cisco Unified Communications Manager to control the user's phone.

Figure 1. Cisco Unified Attendant Console Standard

Cisco Unified Attendant Console Standard pairs with Cisco Unified IP Phones and Cisco Jabber® and supports all Cisco Unified Communications Manager platforms, including Cisco Business Edition 7000, Cisco Business Edition 6000, and Cisco Hosted Collaboration Solution.

Features and Benefits

Cisco Unified Attendant Console Standard is simple to set up and easy to use. It includes:

- Call handling directly from the application
- Searchable corporate directory and personal directory groups
- Live view of contact availability through:
 - Phone line state
 - Cisco presence or WebEx[®] Messenger presence
- Integration with Cisco Unified Communications Manager hunt groups
- No server to deploy and maintain

Table 1 lists additional features and benefits of Cisco Unified Attendant Console Standard.

Table 1. Features and Benefits

Feature	Benefit
Telephony features	
Core call controls	Answer, transfer, hold, park, join, conference, place outbound calls, and more, all within a fast and intuitive application.
Call park	The Parked Calls panel delivers a clean visual way to work with Cisco Unified Communications Manager call park extensions.
Call history	The Call History panel shows the user's call transactions, including call type, calling and called party telephone numbers, and date/time stamps.
Log into and out of hunt groups	Users can log into and out of Cisco Unified Communications Manager hunt groups from within the application.
Call forwarding and do not disturb	Users can set call forwarding and do not disturb on their extensions directly from the application.
Directory features	
Directory synchronization with Cisco Unified Communications Manager and/or a local .csv file	Users will always have an up-to-date corporate directory by synchronizing the Cisco Unified Attendant Console Standard directory with Cisco Unified Communications Manager, a local .csv file, or both.
Personal directory groups	In addition to the synchronized corporate directory, users can create their own groups of contacts to give them quick access to any contact inside or outside of their organization.
Unified directory search	Search the synchronized corporate directory and personal directory groups at the same time to find contacts quickly.
Presence integration	If your organization uses Cisco presence or WebEx Messenger, users can view each contact's live presence state to quickly see if the contact is available to receive a call.
Additional features	
Adjustable font size	Changing the font size is one of the many ways in which individual users can customize the application to best suit their needs.
Configurable user interface	Each panel (Call Control, Parked Calls, Call History, and the directory) can be rearranged, resized, and popped out, giving users the freedom and flexibility to maximize valuable screen space across one or more monitors.
Localization	English (Danish, Dutch, French, German, Italian, Portuguese, Russian, Spanish, and Swedish will be supported in version 12.0.2).
Administrative features	
Sign-in device restriction	Create a list of specific devices with which a user may sign into Cisco Unified Attendant Console Standard.
Configuration lockdown	Password-protect key configuration settings to prevent accidental changes by your users.
Application dial rules synchronization	Application dial rules, created in Cisco Unified Communications Manager, are automatically imported and used by Cisco Unified Attendant Console Standard.

Platform Compatibility

Cisco Unified Attendant Console Standard Version 12.0 is compatible with Cisco Unified Communications Manager Versions 10.0(1) through 12.0(1). See [Release Notes](#) for detailed operating system and Cisco Unified Communications Manager version interoperability requirements.

Cisco Unified Communications Manager Express and Cisco Business Edition 4000 are not supported.
