## Product Migration Options

There is no replacement available for the Cisco Unified Messaging Gateway - VPIM Feature Licenses at this time.

The critical VPIM interoperability features have been absorbed into Cisco Unity Connection and Cisco Unity Express. While Unity Connection and Unity Express are not direct replacements for the UMG-VPIM feature set, they can directly interact with other VPIM-compatible messaging products. Our recommendation is to use either Cisco Unity Connection or Cisco Unity Express for VPIM interoperability. Cisco Unity Connection supports a newer version of the VPIM standard version 2.0.

Service prices for Cisco products are subject to change after the product End-of-Sale date.
