Product Migration Options

Customers are encouraged to migrate to the Cisco uBR10012 DOCSIS Timing, Communication, and Control Card with DTI Client. Information about this product can be found at:

http://www.cisco.com/en/US/docs/interfaces_modules/cable/installation/dtcccard.html.

The migration from Cisco uBR10012 DOCSIS Timing, Communication, and Control Card without DTI Client to the enhanced Cisco DOCSIS Timing, Communication, and Control Card with DTI Client enables optimized modular-CMTS deployment. Together with a DOCSIS Timing Interface (DTI) Server, Cisco DOCSIS Timing, Communication, and Control Card with DTI Client improves downstream channel bonding deployment flexibility and throughput by eliminating the need to dedicate a CMTS RF linecard downstream channel for DOCSIS timing information exclusively, and by allowing the Cisco DOCSIS 3.0 Downstream Channel Bonding SPA (SPA-24XDS-SFP) to provide coexisting non-channel bonding and channel bonding services.

Customers can use the Cisco Technology Migration Plan (TMP) to trade in products and receive credit toward the purchase of new Cisco equipment. For more information about Cisco TMP, go to: <http://www.cisco.com/go/tradein/>. The Cisco TMP application requires all users to have a Cisco.com user ID.

Customers may be able to continue to purchase the Cisco uBR10012 DOCSIS Timing, Communication, and Control Card without DTI Client through the Cisco Certified Refurbished Equipment program. Refurbished units may be available in limited supply for sale in certain countries on a first-come, first-served basis until the Last Date of Support has been reached. For information about the Cisco Certified Refurbished Equipment program, go to: <http://www.cisco.com/go/eos>.

Service prices for Cisco products are subject to change after the product End of Sale date.
