Cisco 8540 Wireless Controller

Optimized for 802.11ac Wave2 performance, the intent-driven Cisco DNA™ ready Cisco® 8540 Wireless Controller is a highly scalable, service-rich, resilient, and flexible platform that enables next-generation wireless networks for medium-sized to large enterprise and campus deployments.

Product Overview

The Cisco 8540 Wireless Controller provides centralized control, management, and troubleshooting for high-scale deployments in service provider and large campus deployments. It offers flexibility to support multiple deployment modes in the same controller: for example, centralized mode for campus, Cisco FlexConnect™ mode for lean branches managed over the WAN, and mesh (bridge) mode for deployments where full Ethernet cabling is unavailable. As a component of the Cisco Unified Wireless Network, this controller provides real-time communications between Cisco Aironet® access points, the Cisco Prime® Infrastructure, and the Cisco Mobility Services Engine, and is interoperable with other Cisco controllers.

The Cisco Digital Network Architecture (Cisco DNA) is an open and extensible, software-driven architecture that accelerates and simplifies your enterprise network operations. The programmable architecture frees your IT staff from time-consuming, repetitive network configuration tasks so they can focus instead on innovation that positively transforms your business. SD-Access, as part of Cisco DNA, enables policy-based automation from edge to cloud with foundational capabilities. Cisco DNA Assurance, also part of Cisco DNA, provides a single source to monitor, modify, and manage your network and application data.

Features and Benefits

The Cisco 8540 Wireless Controller, optimized for 802.11ac Wave2 performance, high scale, and enhanced system uptime, supports:

- Intent-driven programmability and streaming telemetry.
- Subsecond access point and client failover for uninterrupted application availability.
- Extraordinary visibility into application traffic, using Cisco Application Visibility and Control (AVC), the technology that includes the Network-Based Application Recognition 2 (NBAR2) engine, Cisco’s Deep Packet Inspection (DPI) capability. This allows to mark, prioritize, and block to conserve network bandwidth and enhance security. Customers can optionally export the flows to Cisco Prime Infrastructure or a third-party NetFlow collector.
• Embedded wireless Bring-Your-Own-Device (BYOD) policy classification engine that allows classification of client devices and application of user group based policies.

• Deployment of guest access and Bonjour and Chromecast services in centralized deployments.

• Software-defined segmentation with Cisco TrustSec® technology, reducing Access Control List (ACL) maintenance, complexity and overhead.

• Integrated Cisco CleanAir® technology, providing the industry’s only self-healing and self-optimizing wireless network.

• Wi-Fi Alliance Passpoint (Hotspot 2.0) for mobile data offload.

• Network-based mobility management with Proxy Mobile IPv6 Mobility Access Gateway (MAG) and eGRE support for integration with cellular data networks.

• Simplified GUI wizard for quick setup and intuitive dashboards for monitoring and troubleshooting.

• Cisco DNA and SD-Access Wireless, as well as Cisco DNA Assurance.

Table 1. Features and Benefits

<table>
<thead>
<tr>
<th>Feature</th>
<th>Benefits</th>
</tr>
</thead>
</table>
| **Cisco DNA SD-Access Wireless** | SD-Access Wireless is Cisco’s next-generation architecture for enterprise networks. It is the industry’s first policy-based automation from the edge to the cloud. It enables network access in minutes for any user or device to any application without compromising on security.  
SD-Access Wireless enables policy-based automation for wired and wireless, automated provisioning of wired and wireless networks, group-based policy for users and connected devices, and a distributed wireless data plane for campus deployments. In addition, all client roams are treated as Layer 2 roams across the network for distributed traffic.  
| **Cisco DNA Analytics and Assurance** | Cisco DNA Analytics and Assurance offers comprehensive network visibility. It collects data from users, devices, and applications to proactively identify problems. Network analytics and automation help IT quickly resolve issues, so you can increase availability and deliver a better user experience.  
| **Scalability and performance** | Optimized to enable 802.11ac Wave 2 next-generation networks. Consolidate multiple controllers into one controller with support for up to 6000 access points and 64,000 clients with a single point of touch  
- 40-Gbps throughput  
- 6000 access points  
- 64,000 clients  
- 4096 VLANs  
- 100 access points in up to 2000 Cisco FlexConnect groups |
| **RF management** |  
- Proactively identifies and mitigates signal interference for better performance  
- Provides both real-time and historical information about RF interference affecting network performance across controllers, through systemwide integration with Cisco CleanAir technology |
| **Multimode with indoor, outdoor mesh access points** |  
- Versatile controller with support for centralized, distributed, and mesh deployments to be used at different places in the network, offering maximum flexibility for medium-sized campus, enterprise, and large branch networks  
- Centralized control, management, and client troubleshooting  
- Seamless client access in the event of a WAN link failure (local data switching)  
- Highly secure guest access  
- Efficient access point upgrade that optimizes the WAN link utilization for downloading access point images  
- Cisco OfficeExtend technology that supports corporate wireless service for mobile and remote workers with secure wired tunnels to indoor Cisco Aironet access points supporting OfficeExtend mode |
| **Comprehensive end-to-end security** |  
- Offers Control and Provisioning of Wireless Access Points (CAPWAP)-compliant Datagram Transport Layer Security (DTLS) encryption on the control plane between access points and controllers across remote WAN links  
- Management frame protection detects malicious users and alerts network administrators  
- Rogue detection for Payment Card Industry (PCI) compliance  
- Rogue access point detection and detection of denial-of-service attacks |
### Feature | Benefits
--- | ---
End-to-end voice | ● Supports Cisco Unified Communications for improved collaboration through messaging, presence, and conferencing  
● Supports all Cisco Unified IP Phones for cost-effective, real-time voice services
 Fault tolerance and high availability | ● Subsecond access point and client failover for uninterrupted application availability  
● Multi 1 Gigabit or 10 Gigabit Ethernet connectivity  
● Solid-state device-based storage – no moving parts  
● Hot-swappable redundant AC or DC power supply and solid-state storage with no incremental system downtime  
● Enhanced system uptime with fast system restarts
Service provider Wi-Fi | ● Wi-Fi Alliance Passpoint (Hotspot 2.0) certified, facilitating hotspot operation for mobile data offloads  
● Network-based mobility management with Proxy Mobile IPv6 Mobility Access Gateway (MAG) and eGRE support for integration with cellular data networks
Cisco Enterprise Wireless Mesh | ● Allows access points to dynamically establish wireless connections without the need for a physical connection to the wired network  
● Available on select Cisco Aironet access points, Enterprise Wireless Mesh is ideal for warehouses, manufacturing floors, shopping centers, and any other location where extending a wired connection may prove difficult or aesthetically unappealing
WLAN express setup | ● Simplified GUI wizard for quick setup and intuitive dashboards for monitoring and troubleshooting
High-performance video | ● Cisco VideoStream technology optimizes the delivery of video applications across the WLAN
Mobility, security, and management for IPv6 and dual-stack clients | ● Highly secure, reliable wireless connectivity and consistent end-user experience  
● Increased network availability through proactive blocking of known threats  
● Equips administrators for IPv6 planning, troubleshooting, and client traceability from Cisco Prime Infrastructure
Environmentally responsible | ● Organizations may choose to turn off access point radios to reduce power consumption during off-peak hours

**Perpetual Licensing**

The Cisco 8540 Wireless Controller provides right-to-use (with End-User License Agreement [EULA] acceptance) license enablement for faster time to deployment, with flexibility to add additional access points (up to 600 access points) as business needs grow.

- Additional access point capacity licenses can be added over time.
- Right-to-use licensing (with EULA acceptance) for faster and easier license enablement.
- Starting with the 8.2 release, the Cisco 8540 Wireless Controller also provides an option to enable licensing using Cisco Smart Software Licensing, designed for easy monitoring and consumption of licenses.
- Manage license deployments with real-time visibility to ownership and consumption.
- Pools license entitlements in a single account. Licenses can be moved freely through the network wherever they are needed.

**New Term-Based Licensing**

With the Cisco DNA architecture, we are also introducing term-based software packages: Cisco DNA Essentials, Cisco DNA Advantage, and Cisco ONE Advantage. In addition to on-box capabilities, the Cisco DNA packages unlock additional functionality in Cisco DNA Center, enabling controller-based software-defined automation in your network.

License consumption is further simplified with the following three package combinations. Cisco Embedded Support is included in all the three packages.

**Essentials:** Term-based (3, 5, or 7 years per access point) Cisco DNA Essentials package, term-based access point license, and term-based Cisco Prime Lifecycle and Assurance infrastructure licenses.
**Advantage**: Term-based (3, 5, or 7 years per access point) Cisco DNA Advantage package. It also includes everything in the Cisco DNA Essentials package.

**Cisco ONE Advantage**: Term-based (3, 5, or 7 years per access point) Cisco DNA Advantage package (includes Cisco DNA Essentials package), Cisco Identity Services Engine (ISE) Base, ISE Plus and Cisco Connected Mobile Experiences (CMX) Base.

You can continue to deploy your network using perpetual licensing or the new term-based packages. The term based licensing provides you with additional benefit of using the same Cisco DNA license on any Cisco WLAN controllers and with any Aironet access point.

● EN55022 Class A  
● ICES003 Class A VCCI Class A  
● EN61000-3-2 EN61000-3-3 KN22 Class A  
● CNS13438 Class A

EMC - Immunity:

● EN55024  
● CISPR24  
● EN300386  
● KN24

**Warranty Information**

Find warranty information on Cisco.com at the [Product Warranties](https://www.cisco.com) page.

The Cisco 8540 Wireless Controller is backed by a warranty that includes:

- 3 years parts coverage
- 10-day Advance Replacement (AR): Cisco or its service center will use commercially reasonable efforts to ship a replacement within ten (10) working days after receipt of the RMA request. Actual delivery times might vary depending on customer location

This warranty also includes a 90-day software warranty on media and ongoing downloads of BIOS, firmware, and drivers.
Ordering Information

For ordering details, please consult the part numbers in Table 3. To place an order, visit the Cisco Ordering Home Page. To download software, visit the Cisco Software Center.

Cisco ONE Software

Cisco ONE™ Software offers a valuable and flexible way to buy software for the access domain. At each stage in the product lifecycle, Cisco ONE Software helps make buying, managing, and upgrading your network and infrastructure software easier. Cisco ONE Software provides:

- Flexible licensing models to smoothly distribute customers’ software spending over time
- Investment protection for software purchases through software services–enabled license portability
- Access to updates, upgrades, and new technology from Cisco through Cisco® Software Support Services (SWSS)

Cisco ONE for Wireless, available for the Cisco 8540 Wireless Controller, is a complete software solution that helps you deliver and manage business-class wireless connectivity for all your employees and customers. It helps unlock the business potential in your wireless network while providing all the capabilities required to deploy, manage, and track wireless performance and activity. Cisco ONE for Access Wireless is available in subscription and perpetual offers for broad deployment flexibility in branch and campus environments: Cisco ONE for Advantage, Foundation for Wireless, Advanced Mobility Services, and Cloud Mobility Services are the four offers currently available in Cisco ONE for Access Wireless.

Cisco Services

Lower support costs and improve availability risk management with our Product Support Services. They help you increase operational efficiency through automated network-equipment inventory management and award-winning support. They allow you to:

- More effectively manage risk, plan for equipment upgrades, and comply with your corporate policies.
- Identify and resolve issues quickly and reduce downtime.
- Streamline contract management and access support resources faster.

Cisco Embedded Support for Cisco DNA Term Components

Cisco Embedded Support delivers the right support for Cisco software products and suites. It will keep your business applications performing as expected and protect your investment. Cisco Embedded Support for the Essentials and Advantage term components is included. Cisco Embedded Support provides access to Cisco Technical Assistance Center (TAC) support, major software updates, maintenance and minor software releases, and the Cisco Embedded Support site, for increased productivity with anytime access.

Cisco Capital

Flexible payment solutions to help you achieve your objectives.

Cisco Capital makes it easier to get the right technology to achieve your objectives, enable business transformation and help you stay competitive. We can help you reduce the total cost of ownership, conserve capital, and accelerate growth. In more than 100 countries, our flexible payment solutions can help you acquire hardware, software, services and complementary third-party equipment in easy, predictable payments. Learn more.
