

# Connect and Protect Your Retailer with Secure Networking

Protect your associates, customers, applications, and data—wherever they are—with platform-driven, converged networking and security solutions.

## Address security, financial, and management risks

Give your customers the smooth digital experiences they expect. Tackle the diverse challenges and escalating security, financial, and management risks that come with teams and apps spread across different stores.

- Match bandwidth demand
- Protect increased cloud and SASE traffic
- Minimize attack vectors
- Shield against expanding cyber threats

## Benefit from converged networking and security

Embrace a secure networking solution for your retailer that avoids multivendor complexities and delivers:

- Protected networks, with the right security, in the right place—at the right time.
- A high-performance, flexible, and cloud-centric platform combining networking, security, and end-to-end visibility for rapid scalability of hybrid work models, SaaS, and multicloud access in every store and office.
- Reduced complexity, increased agility, and lower costs by employing SDN-enabled programmability and AI/ML-powered insights and automation.

## Customer story

### Delivering a fresh network experience from the cloud

The complexity in that original solution was huge. With Meraki, that goes out the window. When we couple that with SASE, we get the benefit of having more modern network security, SSL inspection, DLP, and other pieces that we never had before.

Gary Burgess, Director of Infrastructure and Security

## Break down technology silos

Help your retailer move beyond technology silos and time-consuming integration. Connect and protect your customers, associates, stores and inventory everywhere. Do this by seamlessly combining high-performance connectivity, identity, and policy; end-to-end visibility and enforcement; and AI/ML-powered insights and automation.

### Find ways to simplify and grow

Get the backing of the world's largest commercial threat intelligence team and gain visibility beyond the networks you own. Suddenly, your associates have secure access

wherever they work to whatever they need, on-premises or in the cloud. Cisco's platform-driven solutions seamlessly combine identity, policy, and enforcement to make it happen.

#### Cisco Catalyst SD-WAN

Keep pace with dynamic business needs and stay ahead of continuously evolving network and security requirements with proactive IT operations.

## Retail use cases

- Consistent and easy management with a single security architecture irrespective of platform or resource
- Rapidly detect issues that may impact application performance and automatically remediate them
- Work smarter: Reduces time spent applying, maintaining and/or troubleshooting security policy
