Connect and Protect Education Institutions with Secure Networking

Protect your people, applications, and data—wherever they are—with platform-driven, converged networking and security solutions.

Address security, financial, and management risks

Give your users the seamless digital experiences they expect. Tackle the diverse challenges and escalating security, financial, and management risks that come with teams and apps spread across different locations.

- Match bandwidth demand
- Protect increased cloud and SASE traffic
- Minimize attack vectors
- Shield against expanding cyber threats

Benefit from converged networking and security

Embrace a secure networking solution that avoids multivendor complexities and delivers:

- Protected networks, with the right security, in the right place-at the right time

- A high-performance, flexible, and cloud-enabling platform combining networking, security, and end-to-end visibility for rapid scalability and access everywhere across hybrid work models, SaaS, and hybrid multiclouds

- Reduced complexity, increased agility, and lower costs by employing software defined programmability and AI/ML-powered insights and automation.

Customer story

Pima Community College is committed to training everyone who strives to achieve better lives for themselves.

"With Cisco, we wanted to accomplish a two-pronged approach: redesigning our network infrastructure and securing it at the same time,"

Jack Satterfield, CTO at Pima Community College

Read story

Break down technology silos

Help your institution move beyond technology silos and time-consuming integration. Connect and protect your people, places, and things everywhere. Do this by seamlessly combining high-performance connectivity, identity, and policy; end-to-end visibility and enforcement; and AI/ML-powered insights and automation.

Find ways to simplify and grow

Get the backing of the world's largest commercial threat intelligence team and gain visibility beyond the networks you own. Suddenly, your users have secure access wherever they work to whatever they need, on-premises or in the cloud. Cisco's platform-driven solutions seamlessly combine identity, policy, and enforcement to make it happen.

Cisco Catalyst SD-WAN

Keep pace with dynamic business needs and stay ahead of continuously evolving network and security requirements with proactive IT operations.

The bridge to possible

Education use cases

- Learning and school ops continuity Secure seamless connectivity for administrators, faculty, research, and students to all their learning, research, and administrative applications whether they are on campus or not.

- Work smarter Simplified management allows resource-strapped IT staff to focus on higher value projects and priorities rather than reactive/daily troubleshooting.

- Increased security posture Consistent, reliable high-quality connectivity with the ability to authenticate students, staff, teachers, and visitors easily and securely.

Take a step towards convergence

Unleash a future of innovation and unified experiences through an integrated platform that can:

- Enhance your mission and business outcomes

- Lower your total cost of ownership

- Protect your investment for the long term
