Popular Tools and Frameworks

A wide array of open-source and commercial tools are available for automation testing:

Test Guild +1

HERE
IS A
SAMPLE

- **Selenium:** An open-source framework widely used for automating web browser interactions, supporting multiple programming languages like Java, Python, and C#.
- **Appium:** An open-source tool for automating mobile applications (native, hybrid, and mobile web apps) across iOS and Android platforms.
- **Cypress:** A modern, developer-friendly JavaScript framework for end-to-end web testing that operates directly within the browser.
- **Playwright:** A Microsoft-backed framework enabling reliable end-to-end testing across modern web browsers (Chromium, Firefox, WebKit).
- **Katalon Studio:** A comprehensive, all-in-one tool supporting web, mobile, and API testing with both no-code and full-code scripting options
