# How can I delete an On-Prem Account, in License Central (LC)?

## Introduction

This document explains how to delete an On-Prem account in License Central.

### Video

The purpose of this content is to share information for educational and/or informational use. You may choose to watch the video or read the content below-both provide the same material, so feel free to engage with whichever format you prefer.

# **Prerequisites**

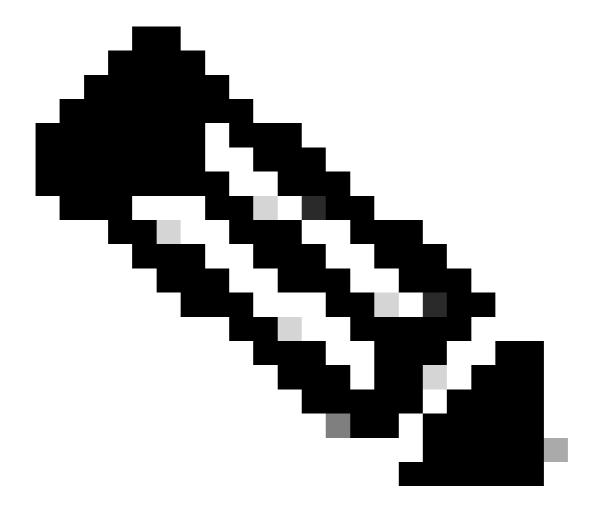

Before you start, ensure that you have the following:

- Active Cisco.com account
- Admin access to SSM On-Prem
- The user accessing License Central must have at least one of the following:
  - Smart Account Admin
  - Virtual Account Admin

#### **Steps**

Step 1: Remove all Product Instances (PI) on all Local Virtual Accounts in the SSM On-Prem Local Smart Account. Click for Instructions. How can I remove a device from within an On-Prem deployment?

Step 2: Synchronize with SSM On-Prem so that Cisco License Central reflects that the Product Instances (PI) are no longer on SSM On-Prem. Click for Instructions. How can I perform a synchronization within an On-Prem deployment?

**Note**: The only way to remove the Product Instances (PI) from SSM On-Prem and see the changes reflected on Cisco License Central is to synchronize SSM On-Prem with Cisco License Central after removing them from SSM On-Prem, since SSM On-Prem is the source of truth for all Product Instances (PI) registered to it.

- Step 3: **Deactivate the Local Account**. Open SSM On-Prem (https://(IP Address):8443/admin/#/mainview).
- Step 4: Navigate to **the Admin Workspace** from the **top-right** corner.
- Step 5: Click on the **Accounts** Widget, and under the **Accounts** Tab, you can see all the accounts.
- Step 6: Click on the **Actions** menu & select **Deactivate** from the Actions menu.
- Step 7: Enter a reason for deactivation so it can be included in the email that is sent to the requester.
- Step 8: Click **Deactivate.** Click on Proceed & Provide reason for Deactivation.
- **Step Result**: The Local Account is listed as Inactive.
- Step 9: From the **Actions** menu, select **Delete**.

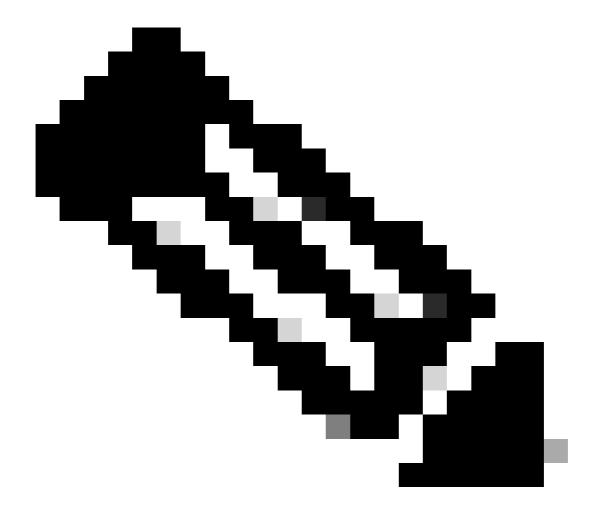

Step 10: Click OK.

Step 11: Go to Cisco License Central and remove the SSM On-Prem representing this Local Account. At this point, the Virtual Accounts (VAs) associated with this SSM On-Prem are empty because the Product Instance (PI) was removed in Step 1.

#### To remove an SSM On-Prem account:

- Step 12: Go to Cisco Software Central and log in with your Cisco.com credentials.
- Step 13: Click on Access Cisco License Central under the Cisco License Central section.
- Step 14: Enter your Smart Account or use the Search function to locate your Smart Account that is linked to your On-Prem Account
- Step 15: Navigate to the left Menu bar and click on the "Devices" tab, and select "Device Managers" under Device Connections.
- Step 16: Select the On-Prem Account under the Device manager name, go to the right-most column, and click on the 3 dots.
- Step 17: From the drop-down menu, select Remove.
- Step 18: "Remove Device Manager?" pop-up will appear. Click Remove device manager.
- Step 19: The "Enter Active Case Number" pop-up will appear. If you have an already working case, you can provide the case number and click Proceed. If not, then click Proceed without.

**Step Result**: The On-Prem Account will be deleted.

#### Note:

- To delete an On-Prem Account, please go to: How can I delete an On-Prem account?
- Internal users should submit a case to the Licensing support team to fix the customer view issue with orders in License Central. There are no checks for internal users with a Cisco support role to prevent unauthorized transactions from the Orders tab.

## **Troubleshooting**

If you experience an issue during the process explained in this document, open a case in <u>Support Case Manager (SCM)</u>.

For feedback on the content of this document, please submit here.

**For External Customer / Partner Use Only:** These instructions are provided to help customers / partners perform the following action themselves to resolve the issue. If the customer / partner runs into issues following the instructions, please have them open a case with licensing support (<a href="https://www.cisco.com/go/scm">https://www.cisco.com/go/scm</a>) to help resolve
