How to Remove a Product Instance (SLR)

Contents

Introduction Prerequisites Requirements Removing a Product Instance (SLR) Verify Option 1 Option 2 Troubleshooting Related Information

Introduction

This article describes the process of removing a product instance as part of specific license reservation (SLR) in Cisco Smart Software Manager (CSSM). This process is only feasible in case you can still access the device of the product instance that you need to remove. If you need to remove the product instance due to a hardware failure and you can no longer access the device, then you need to open a case in<u>Support Case Manager (SCM)</u>.

Prerequisites

Requirements

Before you start, ensure that you have the following:

- <u>Active Cisco.com account</u>
- Smart account user, or Smart account administrator, or Virtual account user, or Virtual account administrator role (To request access to a Smart account or Virtual account, refer to <u>How to Request Access to an Existing Smart Account</u>.)
- Existing license reservation (To reserve licenses in CSSM, refer to <u>How to Reserve Licenses</u> (<u>SLR</u>).)

Removing a Product Instance (SLR)

Step 1:

Go to Cisco Software Central and log in with your Cisco.com account.

Step 2:

In the Smart Software Manager section, click Manage licenses.

	Cisco Software Central Access everything you need to activate and manage your Osco Smart Licenses.							
	Download and	d manage						
	Smart Software Manager Track and manage your licenses, Convert traditional licenses to Smart Licenses. Manage licenses >	Download and Upgrade Download new software or updates to your current software.	Traditional Licenses Generate and manage PAK-based and other device licenses, including demo licenses. Access LRP >					
	Manage Smart Account	FA Workspace	Manage Entitlements					

Step 3:

On the **Inventory** tab, select your Virtual account, click**Product Instances**, search by device or product type, and then press **Enter** to find your failed product.

Tip: You can promptly identify the failed product by the *Failed - Pending Removal* status in the **Alerts** column.

Step result: The system displays the product instance of your failed product.

Verify

You can confirm that you successfully removed a product instance by using one of the following options:

Option 1

Verification Step: On the**Inventory**tab, select your Virtual account, click **Product Instances**, and then verify that system does not display the product instance with the *Failed - Pending Removal* status on the list.

	Contacts Feedback Help) Site Map Terms & Condition	ns Privacy Statement Cookia Policy	Trademarks	

Option 2

Verification Step: On theInventorytab, select your Virtual account, clickEvent Log, search by

product of the failed device, and then pressEnter.

Step result: The system displays a message that confirms that you removed the product instance from CSSM.
