

# Why do I Receive "Secure Client Enrollment Successful but Configuration Sync Fails with 403"

## Contents

---

---

### Issue

ZTA client enrollment process completed successfully. However, the configuration synchronization did not occur after the enrollment.

### Environment

Secure Client Version - Zero Trust Network Access

### Resolution

#### Check the Dart

Sync fails with 403 forbidden? "2026-01-29 00:27:59.580605-0800 0x2514885 Error 0x0 32551 0 csc\_zta\_agent: [com.cisco.secureclient.zta:csc\_zta\_agent] E/ C"

When we enroll in ZTNA Cached config is pushed from cloud to client under **C > Program data > Cisco > Cisco Secure Client**

Its possible that some Anti Malware Software scanning the file and causing this issue.

So ensure these folders are excluded from this software:

#### Exclusion List from AntiMalware

##### Cisco Secure Client (CSC): All Modules - System

1. Windows: C:\Program Files (x86)\Cisco\Cisco Secure Client\\*
2. macOS: /opt/cisco/secureclient/\*
3. Linux: /opt/cisco/secureclient/\*

##### Cisco Secure Client (CSC): All Modules - User

1. Windows: %localappdata%\Cisco\Cisco Secure Client\\*
2. macOS: ~/.cisco/secureclient/\*
3. Linux: ~/.cisco/secureclient/\*

### Cause

The root cause of the issue was the presence of a leftover AdGuard extension on the client system. The

extension was intercepting network traffic, which prevented the Secure Client from receiving its configuration data (`cached_config`) after successful enrollment. Once the extension was removed, normal sync functionality was restored.
