Retrieve a SAML Response

Introduction

This document describes how to capture a Cisco Umbrella SAML response that is sent during the initial validation test in Umbrella for troubleshooting.

Prerequisites

Requirements

There are no specific requirements for this document.

Components Used

The information in this document is based on Cisco Umbrella.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, ensure that you understand the potential impact of any command.

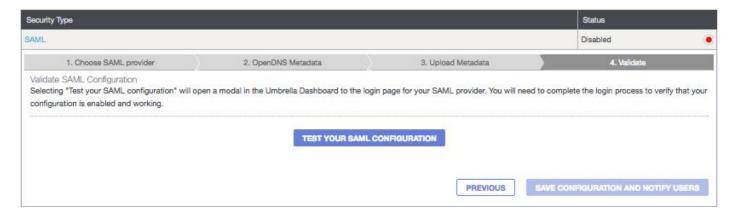

Overview

In order for Cisco Umbrella to better troubleshoot issues setting up SAML, you need to review the SAML response that is sent during the initial validation test in Umbrella.

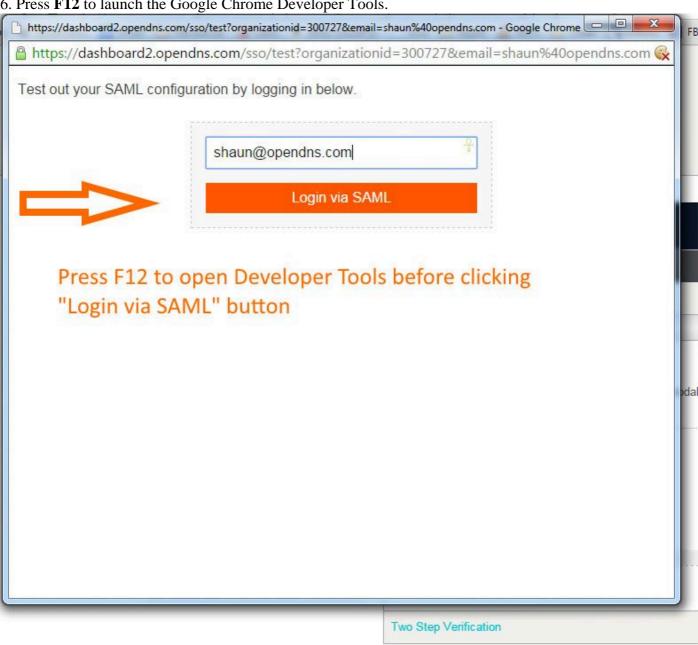

Retrieve a SAML Response

In Google Chrome:

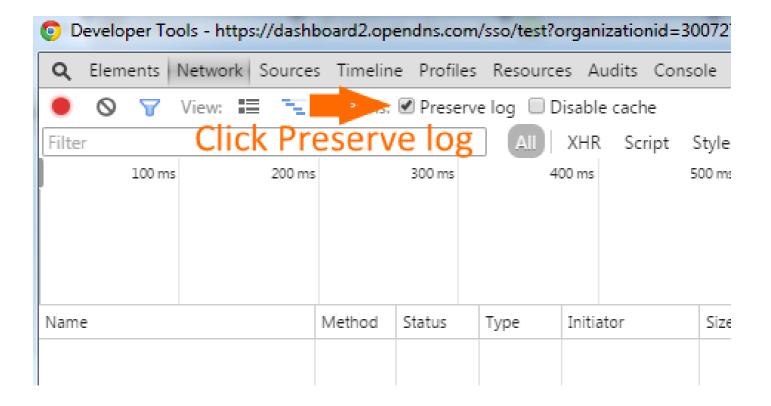

- 1. Log into Umbrella.
- 2. Navigate to **Settings > Authentication**.
- 3. Select **SAML** in the table to expand it.
- 4. Complete the steps of the Authentication wizard.
- 5. On the Validate tab, select Test Your SAML Configuration.

6. Press **F12** to launch the Google Chrome Developer Tools.

- 7. Select the **Network** tab.
- 8. Select **Preserve log**.

- 9. Enter your SSO credentials and login via SAML.
- 10. Find **SSO** and select it.
- 11. Scroll through the right side and find the SAML Response.
- 12. Copy the SAML Response.
