Introduction

This document describes the end-of-life for Windows 7, 8, and 8.1.

End of Support Information

On January 10th, 2023, Cisco ended support for the Umbrella Enterprise Roaming Client (standalone), and Umbrella Roaming Security Module for AnyConnect running on Windows 7, 8, and 8.1. This date coincides with end of Extended Security Updates for Microsoft Windows 7 and End of Support for Windows 8.1.

No changes have been made that will break installations on these operating systems as of this date. However, future changes to Umbrella can cause these clients to break without notice. It is strongly recommend moving to a newer version of Windows.

Note: AnyConnect VPN support for Windows 7, 8, and 8.1 is not affected by this change. See AnyConnect VPN and Cisco Secure Client release notes for more information:
