## Introduction

This document describes how to generate a HAR capture on an iOS device.

## Background Information

This document applies to:

- iOS
- iPad
- iPhone
- MacOS X

## Steps

1. On your iOS Device, navigate to **Settings > Safari > Advanced > Enable Web Inspector**.
2. Connect your iOS device to your Mac computer using a cable and ensure your iOS device is recognised.
3. On your iOS device, launch Safari and reproduce the issue.
4. Using your Mac computer, launch Safari, then navigate to **Develop > Select your iPad** and click **Session**. This will open the developer tools.
5. From here, you can export the **HAR** file and send it to Umbrella Support ticket.
