# Begin an Umbrella DNS Trial

## Contents

## Introduction

This document describes how to begin an Umbrella DNS trial.

## Overview

This article is meant to provide step-by-step directions or click-through walkthroughs on how to set up the basics in an Umbrella DNS trial.  Use this guide to get your Umbrella trial to a basic setup level to begin getting protection from Umbrella in various avenues but is not meant to serve as an all-encompassing setup document.

## Quick Shortcut Links

Register a Network

Install the Roaming Client

Create a DNS Policy

Checking Reporting

## Register a Network

Here you can find a click-through demo of how to register a network in your Umbrella demo environment, please expand this screen or press F to full screen and use the instructions.

Please find the relevant KB Articles here:

**Register a Network:** https://docs.umbrella.com/deployment-umbrella/docs/protect-your-network

**Network Status:** https://support.umbrella.com/hc/en-us/articles/230903448-Network-Status-Inactive-Over-the-Past-24hrs

If you have any issues with registering a network, please contact your Umbrella Representative or Umbrella Support at umbrella-support@cisco.com

# Install the Roaming Client

Here you can find a click-through demo of how to install the Roaming Client on a Windows device, please expand this screen or press F to full screen and use the instructions.

This click-through is of a manual installation on a Windows Device. Please see further supporting documentation here:

**If you are installing the Roaming Client on a macOS, please use these instructions:**
https://docs.umbrella.com/deployment-umbrella/docs/3-downloading-and-installing

**If you are looking to mass deploy this software, please use these instructions:**
https://docs.umbrella.com/deployment-umbrella/docs/3-downloading-and-installing#section-distributed-or-automated-installation

https://support.umbrella.com/hc/en-us/articles/230905308-Umbrella-Roaming-Client-GPO-and-SCCM-Deployment-in-Windows-Server-2003-2008-2012

**If you are deploying the Roaming Security Module due to you using the AnyConnect VPN, then please refer to this article which has a different installation process:**
https://docs.umbrella.com/deployment-umbrella/docs/secure-umbrella-roaming-cisco-secure-client-formerly-anyconnect

If you have any issues with installing the roaming client, please contact your Umbrella Representative or Umbrella Support at umbrella-support@cisco.com

# Create a DNS Policy

Here you can find a click-through demo of how to a DNS Policy in the Umbrella Dashboard. Please expand this screen or press F to full screen and use the instructions.

This is a simple Click-Through walkthrough on how to make a DNS policy. Please see further supporting documentation here:

**Creating DNS Policy:** https://docs.umbrella.com/deployment-umbrella/docs/customize-your-policies-1

**Best Practices for DNS Policies:** https://docs.umbrella.com/deployment-umbrella/docs/best-practices-for-defining-policies

**Security Settings:** https://docs.umbrella.com/deployment-umbrella/docs/understanding-the-security-categories

**Content Category Settings:** https://docs.umbrella.com/deployment-umbrella/docs/new-content-categories

**Application Settings:** https://docs.umbrella.com/deployment-umbrella/docs/application-settings-1

**Destination Lists:** https://docs.umbrella.com/deployment-umbrella/docs/working-with-destination-lists

**Intelligent Proxy:** https://docs.umbrella.com/deployment-umbrella/docs/manage-intelligent-proxy

**File Inspection:** https://docs.umbrella.com/deployment-umbrella/docs/file-inspection

**Cisco Umbrella Root Certificate:** https://docs.umbrella.com/deployment-umbrella/docs/rebrand-cisco-certificate-import-information

**Custom Block Pages:** https://docs.umbrella.com/deployment-umbrella/docs/customize-block-pages

If you have any issues with creating a policy, please contact your Umbrella Representative or Umbrella Support at umbrella-support@cisco.com

# Checking Reporting

Here you can find a click-through demo of how to check the reporting in your Umbrella demo environment, please expand this screen or press F to full screen and use the instructions.

This is a simple Click-Through walkthrough on how to navigate the Activity Search Reporting. Please see further supporting documentation here:

**Activity Search Report:** https://docs.umbrella.com/deployment-umbrella/docs/the-activity-search-report

**Get started with reports and all other reporting:** https://docs.umbrella.com/deployment-umbrella/docs/getting-started-learning-to-use-reports-and-exporting-reports

If you have any issues with the reporting, please contact your Umbrella Representative or Umbrella Support at umbrella-support@cisco.com
