

Use Wildcard Search in Umbrella Activity Report

Contents

[Introduction](#)

[Overview](#)

[Use Asterisk \(*\) for Wildcard Search](#)

Introduction

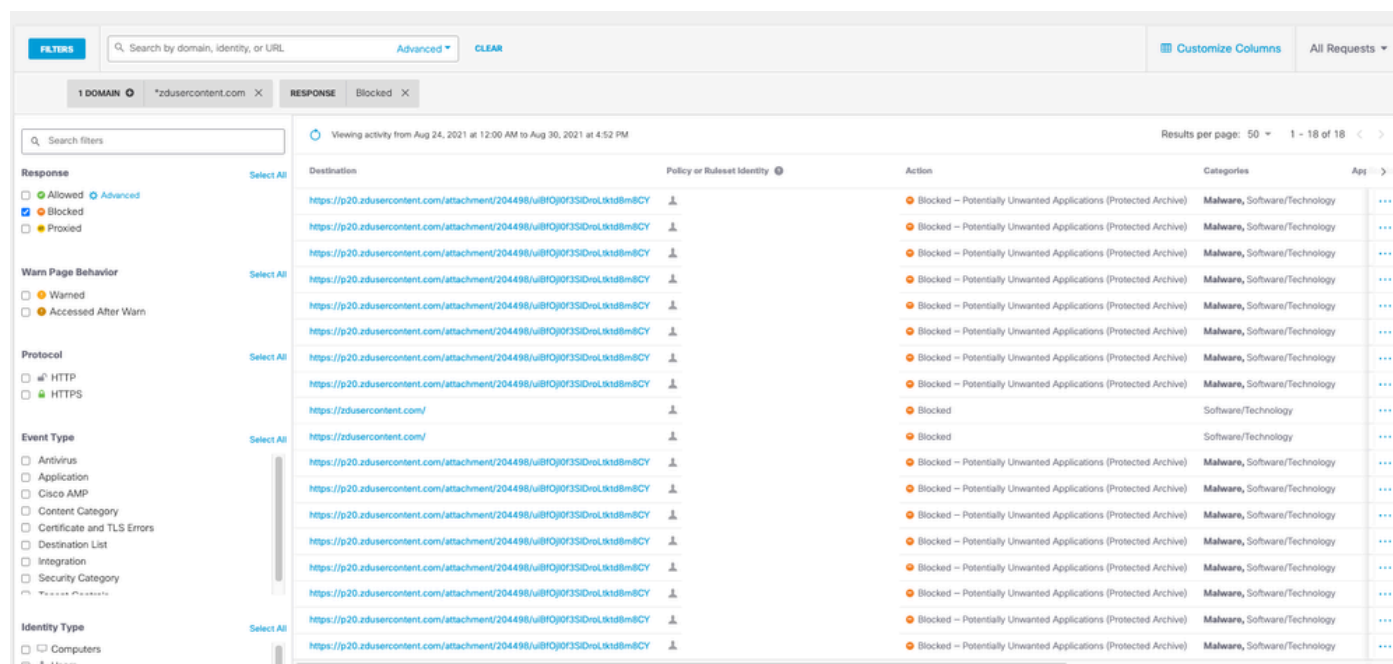

This document describes how to use wildcard search in the Cisco Umbrella Activity Report.

Overview

You can use the wildcard function in the Activity Search to investigate actions taken against a domain and related subdomains. The placement of the asterisk in the domain being searched can produce different results.

Use Asterisk (*) for Wildcard Search

Using ***domain.com** can search for **all of the domains and subdomains** in the activity search:

The screenshot displays the Cisco Umbrella Activity Report interface. At the top, there is a search bar with the text "Search by domain, identity, or URL" and a "CLEAR" button. Below the search bar, the "FILTERS" section is visible, showing the search criteria: "1 DOMAIN *zduusercontent.com". The "RESPONSE" section is set to "Blocked". The main table displays activity from August 24, 2021, at 12:00 AM to August 30, 2021, at 4:52 PM. The table has columns for "Destination", "Policy or Ruleset Identity", "Action", "Categories", and "App". The "Destination" column lists various URLs, including "https://p20.zduusercontent.com/attachment/204498/ulBfQj0F3SDr0Lk1dBm8CY" and "https://zduusercontent.com/". The "Action" column shows "Blocked - Potentially Unwanted Applications (Protected Archive)" and "Blocked". The "Categories" column lists "Malware, Software/Technology" and "Software/Technology". The "App" column shows "..." for all entries.

Destination	Policy or Ruleset Identity	Action	Categories	App
