## Question:

How do I install Feature keys on a Cisco Email or Web Security Appliance?

## Environment:

Cisco Email Security Appliance (ESA), Cisco Web Security Appliance (WSA), Security Management Appliance (SMA), all versions of AsyncOS

You can install feature keys on ESA, WSA or SMA via the CLI or the GUI. Please see the instructions for each below:

## CLI

-----  
CLI> featurekey

Enter feature key, or press Enter to go to the main prompt.  
[]> <feature key >

## GUI

- 
1. Under 'System Administration' ----> 'Feature Keys', in the 'Feature Activation' section, enter the feature key into the '*Feature Key*' field.
  2. Click 'Submit key'.
