Site Deletion using Cisco Business Mobile App

Objective

The objective of this article is to go over the new site deletion feature in Cisco Business Mobile App version 1.4 and later.

Applicable Devices | Software Version

Cisco Business Mobile App | 1.4

Introduction

In Cisco Business Mobile App version 1.4, a new feature has been added that allows you to delete a site inside of the App.

Prior to version 1.4 of the mobile app, the only way to remove a site was to uninstall and reinstall the app. Uninstalling the app would delete all the data and you would be required to reset and re-deploy all the networks managed by the app. If you had multiple sites, this was frequently not an option.

Now, in Cisco Business Mobile App version 1.4 and later, the option to delete a particular site can make it easy for you to manage multiple sites all at the same time.

Site Deletion

Step 1

In the Cisco Business Mobile App, navigate to the All Sites menu.

All Sites + Add Site	666		II 🕈 🛋 🛙 99	% 12:57
CbwWifi6 Lab USA C AL IS WEL C AL IS WEL	All Sites		+ Ad	d Site
Branch Office USA TART SCANNING DEVICES Image Image Image Image Image Image	ALL IS WO	CbwWifi6 Lab	USA No Notifications	
A Star		Branch Office	USA	•••
Сорона и со	Sixi sc	ANNOU DEVICES		
Al Stee				
Al Step More				
Al Shee Help More	8	0		
	Al Siles	Help	More	

Step 2

Click on the **3 dots** next to the site you want to delete. In this example, **Branch Office** is selected.

Al Stee	140	More

Click Next to continue.

Click **Confirm** to proceed with deletion of the site.

Conclusion

You did it! You have successfully deleted a site using the Cisco Business Mobile App.
