

User Settings on the CVR100W VPN Router

Objective

User settings allows the user to change the username and password of the device. It is very important for the administrator to have a strong password to protect the device from being misused. Refer to the article *Configure Password Complexity on the CVR100W VPN Router* for details on password complexity. This article explains how to configure user settings on the CVR100W VPN router.

Applicable Device

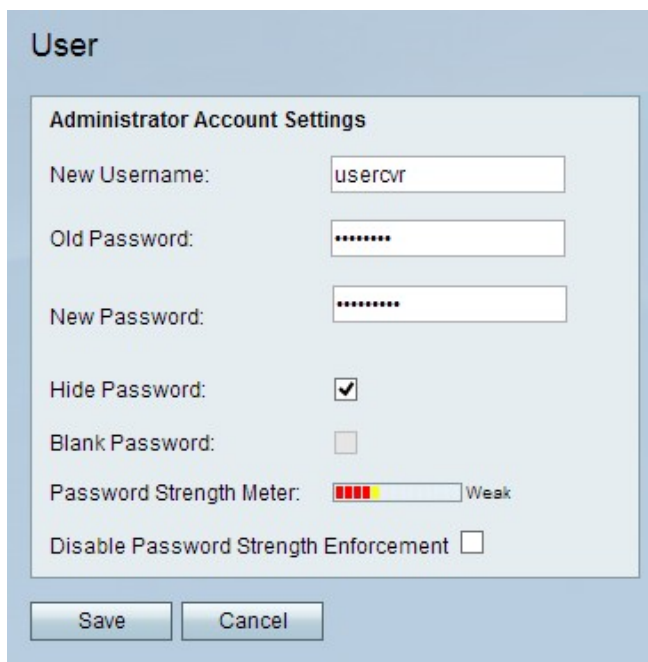

- CVR100W

Software Version

- 1.0.1.19

User Account

Step 1. Log in to the web configuration utility and choose **Administration > User**. The *User* page opens:

The screenshot shows the 'User' configuration page. It features a section titled 'Administrator Account Settings' with the following fields and options:

- New Username:** A text input field containing 'usercvr'.
- Old Password:** A password input field with masked characters (dots).
- New Password:** A password input field with masked characters (dots).
- Hide Password:** A checked checkbox.
- Blank Password:** An unchecked checkbox.
- Password Strength Meter:** A visual indicator showing four red bars and one yellow bar, labeled 'Weak'.
- Disable Password Strength Enforcement:** An unchecked checkbox.

At the bottom of the form are two buttons: 'Save' and 'Cancel'.

Step 2. In the New Username field, enter the new username.

Step 3. In the Old Password field, enter the current password.

Step 4. In the New Password field, enter the new desired password.

Step 5. (Optional) To make the password entered unreadable, check the **Hide Password** check box.

Step 6. (Optional) To have no password for the device, check the **Blank Password** check box.

Note: The Password Strength Meter shows the strength of the new password.

Step 7. (Optional) To disable the password complexity requirement for the new password, check the **Disable Password Strength Enforcement** check box.

Note: For more information on password complexity refer to the article titled, *Password Complexity Settings on the CRV100W VPN Router*.

Step 8. Click **Save**.
