# MAB 802-1x Support

- MAB 802.1x support, on page 1

# MAB 802.1x support

MAB 802.1x support is an authentication method that grants network access to specific MAC addresses regardless of 802.1X capability or credentials, allowing devices such as cash registers, fax machines, and printers to be readily authenticated and making network features that are based on authorization policies available.
