Installing Cisco StadiumVision Director Software From a DVD

This module describes how to install the Cisco StadiumVision Director Release 2.4 software from an installation DVD that ships with your newly-purchased server hardware. The process applies to a brand new server that has never been installed with any version of Cisco StadiumVision Director software.

This module includes the following topics:

- Prerequisites, page 25
- Information About Installing Cisco StadiumVision Director Software From a DVD, page 26
- Installing the Software, page 26
- Verifying a New Installation, page 29
- What to Do Next, page 30

Prerequisites

Be sure that the following requirements are met before you upgrade your server:

- Your new server is installed in its production location and does not currently have any version of the Cisco StadiumVision Director software installed. For more information about installing your hardware, go to: [http://www.cisco.com/en/US/products/ps11274/prod_installation_guides_list.html](http://www.cisco.com/en/US/products/ps11274/prod_installation_guides_list.html)
- Verify that a monitor and keyboard are connected to the Cisco StadiumVision Director server.
- Be sure to have the network information required to configure the Ethernet connection on the Cisco StadiumVision Director server, such as:
  - IP address (IPv4 only) and mask
  - Default gateway address
  - DNS server address
  - Hostname
- You have a supported browser version for Cisco StadiumVision Director. For more information about the latest supported browsers, see the [Cisco StadiumVision Release Notes for Release 2.4](http://www.cisco.com).
- The Cisco StadiumVision Director server is connected to the network and has power.
• To access the Text Utility Interface (TUI) to verify the installation, you can use a directly connected console or be sure that you have a laptop computer connected to the same network as the Cisco StadiumVision Director server with an SSH client (such as PuTTY).

Information About Installing Cisco StadiumVision Director Software From a DVD

The installation program automatically begins when you install the DVD into the server drive and boot the server by either powering the server off or using the reset switch.

The installation DVD program will present you with screens asking you to confirm or provide information before moving to the next installation screen.

Navigating the Installation Screens

Note

The installation program only supports keyboard controls and not any mouse selection. Each screen also provides information about how to navigate through the options and screens.

To provide input to the prompts on the installation screens, use the following keys:

• To move between selection options on the screen—Press Tab or Alt-Tab.
• To confirm selection of an option on the screen—Press the spacebar.
• To accept your selection and move to the next installation screen—Press F12.

Installing the Software

To install Cisco StadiumVision Director Release 2.4 software for the first time on a new server, complete the following steps:

Step 1

Insert the installation disk into the DVD drive, power on or reset the server, and follow the prompts. The server will boot from the installation disk.
Step 2  At the Configure Network Interface screen, press the spacebar to select Yes:

Step 3  In the Network Configuration for eth0 screen, select Activate on boot and Enable IPv4 support and select OK:

Step 4  In the IPv4 Configuration for eth0 screen, do the following:
   a. Select Manual address configuration.
   b. Type the IPv4 address for the server.
   c. Type the Prefix (network mask) for the IP address.
   d. Select OK.
### Step 5
In the Miscellaneous Network Settings screen, do the following:

a. Type the IPv4 address of the default gateway.

b. Type the IPv4 address(es) of the primary and secondary (if used) Domain Name Server (DNS).

c. Select **OK**.

![Miscellaneous Network Settings](image1)

### Step 6
In the Hostname Configuration screen, select **manually** and type a host name for your system. Select **OK**.

Tip
When specifying a hostname for the server, use a descriptive name that identifies the location or customer and the server number. For example: svd-mylocation-1.

![Hostname Configuration](image2)

### Step 7
In the Time Zone Selection screen, select the time zone and select **OK**.

![Time Zone Selection](image3)
The Cisco StadiumVision Director software installs, the DVD is ejected, and the system reboots. This process takes about 30 minutes.

When the reboot is complete, the following screen is displayed:

Verifying a New Installation

To verify a new installation of Cisco StadiumVision Director Release 2.4, complete the following steps:

Step 1 Use a directly connected console, or use an SSH client from a laptop computer that is connected to the Cisco StadiumVision Server network to run a secure login to the Cisco StadiumVision Director server using the IP address for your server.

Step 2 When the login prompt appears, enter the installer userid followed by the installer password `cisco!123` at the password prompt.

Step 3 When the StadiumVision Director Configuration menu appears, type `p` and press Enter:

Step 4 When the system details are displayed, verify the server IP address and other system information has been properly configured.

Step 5 Type `r` and press Enter to return to the TUI main menu.
Step 6   If there are any system configuration settings that you want to change, access the appropriate TUI menu option to modify your configuration.

Step 7   To verify connectivity to another host connected on the network, type `g` to ping a host and press Enter. Type the IP address of the host that you want to test and press Enter.

Step 8   To stop the ping, press Ctrl-C and then press any key to return to the TUI main menu.

Step 9   Type `x` and press Enter to exit the TUI.

Step 10  From your browser, open the Cisco StadiumVision Director software using the following secure HTTPS URL, where `x.x.x.x` is the IP address of your server:

   https://x.x.x.x

Step 11  At the Cisco StadiumVision Director login screen, verify that the window displays the appropriate version. Then type the default username `admin` with password `admin`, and click Login.

Step 12  After you log in with the default admin credential for the first time, enter a new password when prompted to change it at the next screen.

What to Do Next

This section describes some of the initial things you can do to begin configuring your Cisco StadiumVision Director server:

- Open the Management Dashboard to begin the process of provisioning DMPs for auto-registration.

Note   Beginning in Cisco StadiumVision Director Release 2.4, the default global DHCP setting for auto-registration is set to enabled.
For more information about DMP configuration, see the *Cisco StadiumVision Video Endpoint (DMP) Design and Implementation Guide*.

- If your site does not use the Ad Insertion Manager, it can be removed from the Cisco StadiumVision Director main menu by somebody with sudo root access to the server. For more information, see the “Disabling the AIM Software” section of the “Upgrading a Cisco StadiumVision Director Server From Release 2.3 to Release 2.4” module.

- Change the default password for the admin user account.

- Add additional user accounts.

- Refer to the other design, configuration, and operation guides on Cisco.com to continue setting up your Cisco StadiumVision Director server at:
