

Appendix A: Post-Upgrade Checklist

First Published: May 29, 2012

The following checklist is useful after you upgrade your software on a Cisco StadiumVision Director server.

List Item	Checkoff
1. Complete any specific verification steps documented for your particular upgrade.	<input type="checkbox"/>
2. Clear the browser cache.	<input type="checkbox"/>
3. Verify that the Control Panel shows the Cisco StadiumVision Director version and build number that you installed.	<input type="checkbox"/>
4. If you are using phone control, verify that the phones work.	<input type="checkbox"/>
5. If using IP phones for local TV control, verify that channels can be successfully changed.	<input type="checkbox"/>
6. Verify that channel names and favorites are properly set.	<input type="checkbox"/>
7. If using suite commerce integration, verify that an order can be successfully placed using the IP phone.	<input type="checkbox"/>
8. Verify that all devices are properly in the nonevent_group.	<input type="checkbox"/>
9. Go to the Services Alert window in the Management Dashboard and make sure that all relevant services are green.	<input type="checkbox"/>
Tip You might need to click the refresh button to be sure that all services are re-pollled for status. If needed, you can Disable services that are not part of your installation	
10. Verify that all DMPs and TVs in the Management Dashboard are green.	<input type="checkbox"/>
11. Start an existing event script and validate that screens display the expected content.	<input type="checkbox"/>
12. Stop the event script and validate that screens are powered off.	<input type="checkbox"/>
13. Make a minor edit to the event script and make sure it can be saved.	<input type="checkbox"/>
14. Verify that VDM can push a new video file to the DMPs.	<input type="checkbox"/>

List Item	Checkoff
15. If using dynamic menu boards, make a change to a menu item and verify that the change is reflected on the menu board.	<input type="checkbox"/>
16. Perform a server backup for the upgrade configuration.	<input type="checkbox"/>
17. After satisfying your site's testing and event requirements, failback to the primary server and upgrade it to the same version of software that you validated on your secondary server.	<input type="checkbox"/>
18. After you perform failback, be sure that you reconfigure your backup and restore environment using the Text Utility Interface (TUI).	<input type="checkbox"/>
