provides information about changes to this document.

Table 1   Revision History Table

Date	Description
December 5, 2019	Updated and enhanced video wall configuration details.
February 21, 2019	Corrected the DMP reboot recommendation of best practice: reboot all models of DMPs weekly.
August 31, 2018	■ Corrected a typo on dmp.portrait TV display parameter configuration property to enable portrait mode on TVs. ■ Declared defect: DMP admin password is still using the old default password after fresh install.

Revision History

Date	Description
Initial release: July 10, 2018	■ Redesign of Main Menu (Asset Library) to include Script Control icon and give global navigation. ■ Redesign of Script Control UI adding hover help, more icons, action boxes and drop-downs, and right-click menus. ■ Enhanced content replacement allowing multiple, dynamic changes to playlists without restarting the script. ■ Enhanced Asset Library interface allowing various resizing, sorting, and details showing granularity and adding more functionality in one screen. ■ Changed default Asset Library view to Listview and reduced thumbnail size. ■ Device Management (Command Center Monitoring) control adding multiple selection of devices and ease of functionality such as TV On/Off, Reboot, Refresh, and Remote Control icon availability. ■ Added Content Validation caution icon to Library UI. ■ Added content rotation of 270 degrees (-90 degrees). ■ Added Daktronics NFL ™ Football feed. ■ Expanded System Health notifications. ■ Implemented stricter password policies.
