

## Preface

---

This preface describes who should read the *Cisco Wide Area Application Services Configuration Guide*, how it is organized, and its document conventions. It contains the following sections:

- [Audience, page xxi](#)
- [Document Organization, page xxi](#)
- [Document Conventions, page xxiii](#)
- [Related Documentation, page xxiv](#)
- [Obtaining Documentation and Submitting a Service Request, page xxiv](#)

## Audience

This guide is for experienced network administrators who are responsible for configuring and maintaining the Cisco Wide Area Application Services (WAAS) network.

You should be familiar with the basic concepts and terminology used in internetworking, and understand your network topology and the protocols that the devices in your network can use. You should also have a working knowledge of the operating systems on which you are running your WAAS network, such as Microsoft Windows, Linux, or Solaris.

## Document Organization

This guide is organized as follows:

Chapter	Title	Description
Chapter 1	<a href="#">Introduction to Cisco WAAS</a>	Provides an overview of the WAAS product and its features.
Chapter 2	<a href="#">Planning Your WAAS Network</a>	Provides general guidelines and preparation information you should read before installing the WAAS product in your network.
Chapter 3	<a href="#">Using Device Groups and Device Locations</a>	Describes how to create groups that make it easier to manage and configure multiple devices at the same time. This chapter also covers device locations.

Chapter	Title	Description
Chapter 4	<a href="#">Configuring AppNav</a>	Describes how to configure your WAAS network using the AppNav deployment model.
Chapter 5	<a href="#">Configuring Traffic Interception</a>	Describes the WAAS software support for intercepting all TCP traffic in an IP-based network.
Chapter 6	<a href="#">Configuring Network Settings</a>	Describes how to configure interfaces and basic network settings like DNS and CDP.
Chapter 7	<a href="#">Configuring Administrative Login Authentication, Authorization, and Accounting</a>	Describes how to centrally configure administrative login authentication, authorization, and accounting for WAEs in your WAAS network.
Chapter 8	<a href="#">Creating and Managing Administrator User Accounts and Groups</a>	Describes how to create device-based CLI accounts and roles-based accounts from the WAAS Central Manager GUI.
Chapter 9	<a href="#">Creating and Managing IP Access Control Lists for WAAS Devices</a>	Describes how to centrally create and manage Internet Protocol (IP) access control lists (ACLs) for your WAEs.
Chapter 10	<a href="#">Configuring Other System Settings</a>	Describes how to perform various other system configuration tasks such as specifying an NTP server and setting the time zone on a device.
Chapter 11	<a href="#">Using the WAE Device Manager GUI</a>	Describes how to use the WAE Device Manager GUI to configure and manage individual WAEs in your network.
Chapter 12	<a href="#">Configuring File Services</a>	Describes how to configure Common Internet File System (CIFS) acceleration, which allows branch office users to more efficiently access data stored at centralized data centers.
Chapter 13	<a href="#">Configuring Application Acceleration</a>	Describes how to configure the application policies on your WAAS system that determine the types of application traffic that is accelerated over your WAN.
Chapter 14	<a href="#">Configuring Virtual Blades</a>	Describes how to configure virtual blades, which emulate another computer in your WAAS device.
Chapter 15	<a href="#">Configuring the Network Analysis Module</a>	Describes how to configure and use the Cisco Network Analysis Module (NAM) in the WAAS Central Manager.
Chapter 16	<a href="#">Maintaining Your WAAS System</a>	Describes the tasks you may need to perform to maintain your WAAS system.
Chapter 17	<a href="#">Monitoring and Troubleshooting Your WAAS Network</a>	Describes the monitoring and troubleshooting tools available in the WAAS Central Manager GUI that can help you identify and resolve issues with your WAAS system.

Chapter	Title	Description
Chapter 18	<a href="#">Configuring SNMP Monitoring</a>	Describes how to configure SNMP traps, recipients, community strings and group associations, user security model groups, and user access permissions.
Appendix A	<a href="#">Predefined Optimization Policy</a>	Lists the predefined applications and classifiers that WAAS will either optimize or pass through based on the policies that are provided with the system.
Appendix B	<a href="#">Transaction Log Format</a>	Describes the transaction log format.

## Document Conventions

Command descriptions use these conventions:

<b>boldface font</b>	Commands and keywords are in boldface.
<i>italic font</i>	Arguments for which you supply values are in italics.
[ ]	Elements in square brackets are optional.
[ x   y   z ]	Optional alternative keywords are grouped in brackets and separated by vertical bars.

Screen examples use these conventions:

screen font	Terminal sessions and information the switch displays are in screen font.
<b>boldface screen font</b>	Information you must enter is in boldface screen font.
<i>italic screen font</i>	Arguments for which you supply values are in italic screen font.
< >	Nonprinting characters, such as passwords, are in angle brackets.
[ ]	Default responses to system prompts are in square brackets.
!, #	An exclamation point (!) or a pound sign (#) at the beginning of a line of code indicates a comment line.

This document uses the following conventions:

### Note

Means reader *take note*. Notes contain helpful suggestions or references to material not covered in the manual.

### Caution

Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.

Tip

---

Means the following information will help you solve a problem. Tips might not be troubleshooting or even an action, but could help you save time.

---
