How to Troubleshoot Cisco Smart PHY

Problem	Solution
Syslog messages are not received.	Syslog messages MUST be sent to TCP port 8514 for it to take effect. Configure: <pre>logging host 192.0.2.1 transport tcp port 8514</pre>
Unable to access the UI.	Execute the following command to view the iptable rules: <pre>iptables -L -t nat -n</pre>
File system out of memory.	Restart the logger: <pre>sudo docker restart robot-logger</pre>
<i>libguestfs</i> appliance crash.	Clean the directory: <pre>sudo rm -fr .guestfs-0/ pwd /var/tmp</pre>
