

## APPENDIX C

# The SCA Reporter as a Tool in the SCA BB Console

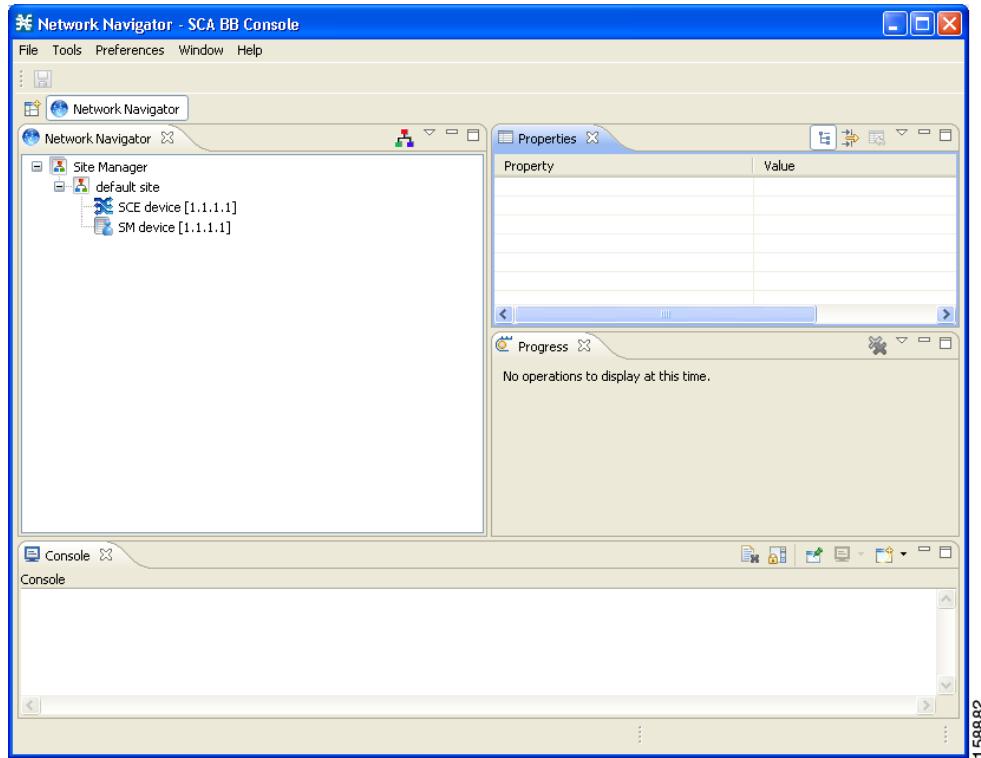

---

This appendix describes the Cisco Service Control Application Reporter (SCA Reporter) as a tool in the SCA BB Console. For more information about the SCA BB Console, see the *Cisco Service Control Application for Broadband User Guide*.

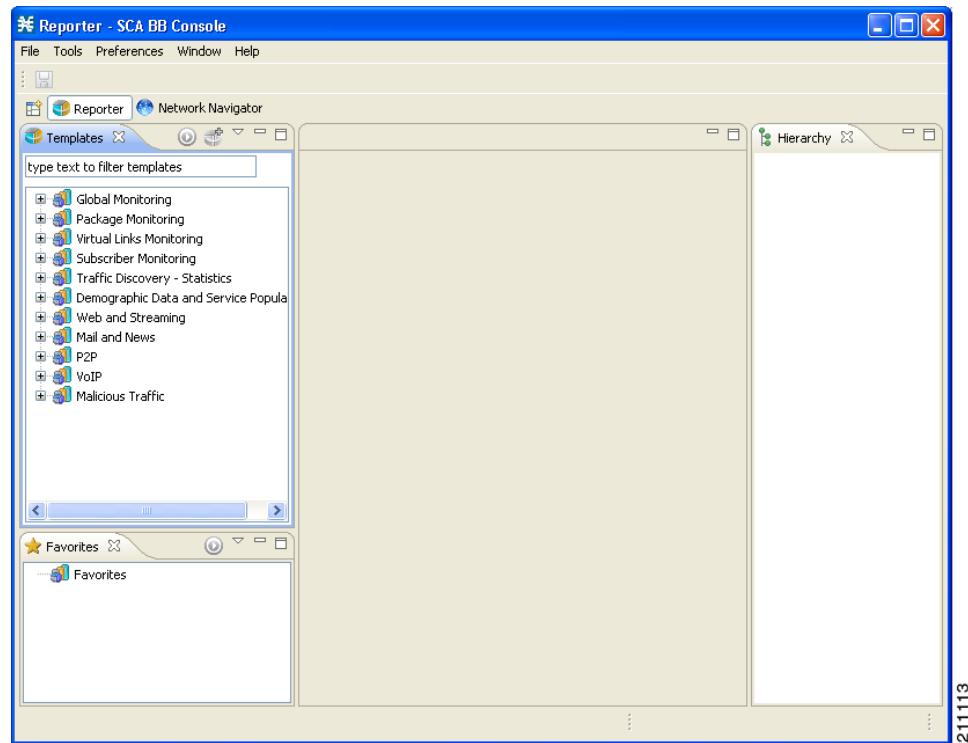

## How to Use the SCA Reporter Tool in the SCA BB Console

The SCA Reporter can be run as a tool in the SCA BB Console.

- 
- Step 1** Choose **Start > All Programs > Cisco SCA > SCA BB Console 3.1.5 > SCA BB Console 3.1.5.**  
The SCA BB Console opens.

**How to Use the SCA Reporter Tool in the SCA BB Console**

- Step 2** Configure and activate a database connection. (See [Managing Database Connections, page 2-8](#).)
- Step 3** From the Console main menu, choose **Tools > Reporter**.  
The Reporter tool opens.

- Step 4** You use the Reporter tool in the same way that you use the SCA Reporter as a standalone, as described in this manual.
