

# Preface

---

Published: July 30, 2014

## Introduction

This preface describes who should read the *Cisco SCA BB Service Configuration API Programmer Guide*, how it is organized, and its document conventions.

This guide is for Java developers responsible for integrations involving tools that automatically configure the Service Control Application (SCA) running on a Service Control Engine (SCE) platform.

## Document Revision History

[Table 1](#) records changes to this document.

**Table 1** *Document Revision History*

Cisco Service Control Release and Date	Change Summary
Supports all 5.0.x releases July 30, 2014	First version of this document (new for the Release 5.0.x train).

## Organization

[Table 2](#) lists the major sections of this guide:

**Table 2** *Documentation Organization*

Chapter	Title	Description
Chapter 1	<a href="#">SCA BB Service Configuration API Overview</a>	Describes the various terms and concepts that are used when working with the Cisco Service Control Application for Broadband (SCA BB) Service Configuration API (Service Configuration API).
Chapter 2	<a href="#">Getting Started</a>	Explains how to install, compile, and run the Service Configuration API.

**Table 2**      **Documentation Organization (continued)**

Chapter	Title	Description
Chapter 3	<a href="#">Programming with the SCA BB Service Configuration API</a>	Provides details on the Service Configuration API programming structure and classes, and the methods of the main Service Configuration Management API class.  This chapter also provides programming guidelines and code examples.
Chapter 4	<a href="#">Logging and Troubleshooting</a>	Describes the Service Configuration API logging functionality that allows you to troubleshoot the Service Configuration API integration.

## Related Publications

The following publications are available for the Cisco SCA BB:

- *Cisco Service Control Application for Broadband Reference Guide*
- *Cisco Service Control Application for Broadband User Guide*
- *Cisco SCMS SCE Subscriber API Programmer Guide*
- The SM API programmers guides:
  - *Cisco SCMS SM Java API Programmer Guide*
  - *Cisco SCMS SM C/C++ API Programmer Guide*
- *Cisco Service Control Management Suite Subscriber Manager User Guide*

## Conventions

[Table 3](#) lists the conventions used in this document.

**Table 3**      **Documentation Conventions**

Convention	Description
<b>boldface</b> font	Commands and keywords are in <b>boldface</b> .
<i>italic</i> font	Arguments for which you supply values are in <i>italics</i> .
[ ]	Elements in square brackets are optional.
{ x   y   z }	Alternative keywords are grouped in braces and separated by vertical bars.
[ x   y   z ]	Optional alternative keywords are grouped in brackets and separated by vertical bars.
string	A nonquoted set of characters. Do not use quotation marks around the string, or the string will include the quotation marks.
