Issues with the Intercloud Fabric Upgrade

This section includes symptoms, possible causes, and solutions for issues encountered while upgrading Intercloud Fabric.

Symptom: The routing policy (system_default_routing_policy) fails while upgrading Intercloud Fabric.

Error Message:

```
Failed to <CREATE/DELETE/UPDATE> Routing Policy(system_default_routing_policy) in
Routing Service on < STANDALONE/PRIMARY/SECONDARY > ICS on ICfCloud(<Name of IcfCloud>).
Error: authentication failed, {"error-code":1,"error-message":"Forbidden","detail":""}.
```

Possible Cause: Modifications to the routing policy (system_default_routing_policy) without upgrading Intercloud Fabric link results in a failure in the Intercloud Fabric cloud Routing Service.

Verification and Solution: Ensure that you upgrade the Intercloud Fabric link if any modifications are made to the routing policy (system_default_routing_policy).
