Overview of Cisco Crosswork Data Gateway

Cisco Crosswork Data Gateway enables collection of data from the monitored devices and forwards the collected data to the Crosswork Cloud applications. These applications can use the data for further analysis and if required, alert an administrator for further action.

Note Cisco Crosswork Data Gateway 1.1.4 has been qualified to be used only with Crosswork Cloud applications. Cisco Crosswork Data Gateway release 1.1.4 has been validated in conjunction with the following Crosswork applications:

- Cisco Crosswork Trust Insights

This guide explains how to both install and configure Cisco Crosswork Data Gateway for Cloud deployment.
