- [Expired Device Certificate, on page 1](#)

## Expired Device Certificate

This alarm is triggered when the certificate used to enroll the monitored device has expired. To clear the alarm, generate a new enrollment certificate, then review and accept it in the UI. To configure this alarm, do the following:

### Procedure

---

- Step 1** In the main window, click  > **Configure** > **Policies**.
  - Step 2** Click **Add Policy**.
  - Step 3** Enter a policy name in the **Name** field.
  - Step 4** Under **Triggers**, click **Add Rules**.
  - Step 5** Click **Expired Device Certificate**.
  - Step 6** Click **Next**.
  - Step 7** By default, the rule is enabled. Toggle the switch to **DISABLED** if you do not want to activate the rule yet.
  - Step 8** Under the **Severity** drop-down list, select the severity level you want defined for this alarm.
  - Step 9** Make any other necessary interface and endpoint notification configurations, then click **Save**.
