

Remove Cisco Crosswork Optimization Engine and Cisco Crosswork Data Gateway

This section contains the following topics:

- [Deleting Cisco Crosswork Optimization Engine and Cisco Crosswork Data Gateway, on page 1](#)

Deleting Cisco Crosswork Optimization Engine and Cisco Crosswork Data Gateway

The procedure to delete a Cisco Crosswork Optimization Engine VM and Cisco Crosswork Data Gateway VM is the same.

Note

- Be aware that this procedure deletes all your Cisco Crosswork Optimization Engine and Cisco Crosswork Data Gateway data.
- If you want to delete Cisco Crosswork Data Gateway only, ensure you have done the following:
 - Detach the devices from the Cisco Crosswork Data Gateway VM you want to delete. The procedure to detach devices from a Crosswork Data Gateway is described in the [Cisco Crosswork Optimization Engine User Guide](#).
 - De-enroll the Cisco Crosswork Data Gateway from Cisco Crosswork Optimization Engine as described in [De-enroll Cisco Crosswork Data Gateway](#).

-
- Step 1** Log in to the VMware vSphere Web Client.
- Step 2** In the Navigator pane, right-click the Cisco Crosswork Optimization Engine VM or Cisco Crosswork Data Gateway VM that you want to remove and choose Power > Power Off.
- Step 3** Once the VM is powered off, right-click the VM again and choose Delete from Disk.
- The VM is deleted.
