

Alerts

This chapter contains the following sections:

- [Alerts, on page 1](#)

Alerts

To create **Alert Rules** which may be defined to match on particular combinations of characteristics of the events raised from the site devices. Rules may be created that match on different combinations of the following characteristics:

- Event Type
- Event Severity
- Device
- Site
- Device Type

When a rule matches an event, one or more of the following standard Kaseya remediation actions may be executed:

- Ticket
- Script
- Email
- Alarm
