

Cisco FindIT Network Manager - Device Support List, Version 1.1.x

First Published: 2016-11-09

Last Modified: 2018-10-29

The following table lists the level of support offered by the Cisco FindIT Network Manager for the products that make up the Cisco 100 to 500 Series portfolio. The features supported are primarily determined by the management protocols supported by the device, and so may be dependent on the device firmware version. Check this document regularly for updates.

The FindIT Network Manager functionality is divided into the following areas:

- Discovery—Includes the ability to detect the device and display detailed information about the device.
- Monitoring—Perform real time monitoring of the device through the Dashboard
- Operations—Firmware upgrade, configuration save/backup/restore, device reboot
- Configuration—Includes functionality offered by the Device View, System Configuration and Network pages
- Reporting—Device is included in network reports
