## **About Platform Overview**

The **Overview** window is accessible by clicking the menu icon ( $\equiv$ ) and choosing **Platform** > **Overview**. The **Overview** window supports the following features:

- Displays brief summaries and direct links to the Cisco DNA Center platform GUI features, including:
  - **Bundles**: Provides access to bundles that you can use to integrate your own applications to Cisco DNA Center with or to enhance the performance of Cisco DNA Center itself. Bundles are defined as groupings of APIs, DNA-Events, integration flows, data services, or applications. Additionally, provides access to a GUI (**Configurations**) where you can configure general or event global settings or settings for multiple bundles.
  - **Developer Toolkit**: Provides tools (APIs and integration flows) to access Cisco DNA Center, as well as integrate Cisco DNA Center with other applications.
  - **Runtime Dashboard**: Provides a dashboard where metrics are collected and you can view API, integration flow, and event summaries.
  - **Configurations**: Provides dashboards where you can configure the category, severity, and type of events for your network, as well as add/edit instances to bundles.
- Accesses the **Notifications** slide-in pane that presents any current Cisco DNA Center platform notifications, including bundle updates. Click **View Details** to view detailed data about the bundle under the **Bundles** tab. Click **Dismiss** to dismiss the bundle notification.

## **Review the Platform GUI**

Perform this procedure to review the Cisco DNA Center platform features and functions that are available to you. You can review these features and functions using the **Overview** window in the Cisco DNA Center GUI.

- **Step 1** Click the menu icon  $(\equiv)$  and choose **Platform** > **Overview**.
- **Step 2** Review the options available to you in this window.
- **Step 3** Click the links to directly access the individual Cisco DNA Center platform feature.
- **Step 4** Review bundle update information using the **Notifications** slide-in pane.
  - **Note** The bundle update information concerns the bundle status (enabled, disabled, successfully configured, or ready to be configured).
