About Platform Overview

To access the **Overview** window, click the menu icon and choose **Platform > Overview**. The **Overview** window supports the following features:

- Displays brief summaries and direct links to the Cisco DNA Center platform GUI features, including:
 - **Bundles**: Provides access to bundles that you can use to integrate your own applications to Cisco DNA Center with or to enhance the performance of Cisco DNA Center itself. Bundles are defined as groupings of APIs, DNA-Events, integration flows, data services, or applications. Additionally, provides access to a GUI (**Configurations**) where you can configure general or event global settings or settings for multiple bundles.
 - **Developer Toolkit**: Provides tools (APIs and integration flows) to access Cisco DNA Center, as well as integrate Cisco DNA Center with other applications.
 - **Runtime Dashboard**: Provides a dashboard where metrics are collected and you can view API, integration flow, and event summaries.
 - **Configurations**: Provides dashboards where you can configure the category, severity, and type of events for your network, as well as add/edit instances to bundles.
- Accesses the **Notifications** slide-in pane that presents any current Cisco DNA Center platform notifications, including bundle updates. Click **View Details** to view detailed data about the bundle under the **Bundles** tab. Click **Dismiss** to dismiss the bundle notification.

Review the Platform GUI

Perform this procedure to review the Cisco DNA Center platform features and functions that are available to you. You can review these features and functions using the **Overview** window in the Cisco DNA Center GUI.

Figure 1: Cisco DNA Center Platform Overview Window

Welcome to the Cisco DNA Center Platform. Programmatically access your network through Intent APIs, integrate with your preferred IT systems to create end-to-end solutions and add support for multi-vendor devices.

Bundles

Bundles are easy to use feature sets for consuming Intent APIs, integrations, events and notifications. View all the available bundles, enable relevant bundles and customize the configuration preferences to consume events as per your application(s) or IT system(s) needs.

Developer Toolkit

Discover APIs to manage your network, configure integration flows and access network data to analyze, export and visualize complex reports.

Runtime Dashboard

Get insights into API usage, view events published to IT systems such as number of API calls, response time(s), events published, bundles activated etc.

Configurations

View and set global or bundle specific settings to manage your integration configurations and modify event specific settings.

Notifications
