

## New and Changed Information

The following tables summarize the new and changed features.

**Table 1: New and Changed Features for Cisco DNA Center, Release 2.2.3.4**

Feature	Description	Where Documented
System Health Validation Tool	<p>You can use the System Health validation tool to test both Cisco DNA Center appliance hardware and connected external systems and identify any issues that need to be addressed before they seriously impact your network. The validation process makes numerous checks, such as:</p> <ul style="list-style-type: none"> <li>• The ability to connect to ciscoconnectdna.com (in order to download system and package updates).</li> <li>• The presence of expiring certificates.</li> <li>• The current health of appliance hardware and back-end services.</li> <li>• The network components that have exceeded a scale number threshold.</li> </ul>	<p><a href="#">Use the Validation Tool</a></p> <p><a href="#">Navigate the Validation Tool Page</a></p> <p><a href="#">Start a Validation Run</a></p> <p><a href="#">View Validation Run Details</a></p> <p><a href="#">Update the Validation Set</a></p>

**Table 2: New and Changed Features for Cisco DNA Center, Release 2.2.3**

Feature	Description	Where Documented
IP Address Manager (IPAM) Trust Certificate Handling	Previously, you had to manually import the trust certificate for IPAM integration. With this release, when you add an IPAM to Cisco DNA Center, the trust certificate is automatically added to the Cisco DNA Center trustpool.	<a href="#">Configure an IP Address Manager</a>
License Manager Support for FQDN Configuration in Smart Proxy and On-Prem SSM Modes	If a satellite is configured with an FQDN, the call-home configuration of the satellite FQDN is pushed instead of the IP address.	<a href="#">Configure Connection Mode</a>

Feature	Description	Where Documented
Smart License Policy Compliance	The Smart License Policy (SLP) compliance shows a timeline graph of the license usage reports sent from Cisco DNA Center to Cisco SSM. Devices that are part of the license usage reporting process are shown in a table.	<a href="#">License Manager Overview</a>

**Note** The documentation set for this product strives to use bias-free language. For purposes of this documentation set, bias-free is defined as language that does not imply discrimination based on age, disability, gender, racial identity, ethnic identity, sexual orientation, socioeconomic status, and intersectionality. Exceptions may be present in the documentation due to language that is hardcoded in the user interfaces of the product software, language used based on standards documentation, or language that is used by a referenced third-party product.
