- [Upgrade from Release 1.2.12.x to Release 1.3.0.7, on page 2](#)
- [Upgrade from Release 1.2.10.x to Release 1.3.0.7, on page 2](#)
- [Upgrade from Release 1.2.8 to Release 1.3.0.7, on page 4](#)
- [Upgrade from Release 1.2.6 to Release 1.3.0.7, on page 4](#)
- [Upgrade from Release 1.2.5 to Release 1.3.0.7, on page 5](#)
- [Upgrade from Release 1.2 – 1.2.4 to Release 1.3.0.7, on page 6](#)
- [Upgrade from Release 1.1.7 or 1.1.8 to Release 1.3.0.7, on page 7](#)

### Upgrade from Release 1.3–1.3.0.6 to Release 1.3.0.7

By completing the following procedure, you can upgrade directly to 1.3.0.7 from the following Cisco DNA Center versions:

- 1.3
- 1.3.0.2
- 1.3.0.3
- 1.3.0.4
- 1.3.0.5
- 1.3.0.6

After you upgrade to 1.3.0.7, you cannot switch back to an earlier release.

#### Procedure

---

- Step 1** From the Cisco DNA Center home page, choose  > **System Settings** > **Software Updates**.
- Step 2** A system update appears on the **Software Updates** page. Click **Update**.  
Refresh the page several times if the system update does not appear.
- Step 3** After the system update is complete, at the top of the **Application Updates** field, click **Download All**.  
The packages begin downloading.

- Step 4** After the packages are downloaded, at the top of the **Application Updates** field, click **Update All**. The packages begin updating.
- Don't update *individual* applications unless the Cisco TAC instructs you to do so.
- Step 5** Ensure that each application has been updated by reviewing its version in the **Installed Apps** page.
- 

## Upgrade from Release 1.2.12.x to Release 1.3.0.7

You can upgrade directly from Cisco DNA Center 1.2.12.x to 1.3.0.7.

After you upgrade to 1.3.0.7, you cannot switch back to an earlier release.

### Procedure

---

- Step 1** From the Cisco DNA Center home page, choose **System Settings > Software Updates**.
- A **Cisco DNA Center 1.3.0.7 is Here!** banner appears at the top of the page with a **Switch Now** button. **Switch Now** lets you see the system and application packages that are available to update.
- Step 2** Click **Switch Now** in the banner.
- Step 3** At the prompt, click **OK** to proceed with the upgrade.
- Wait for approximately 90 seconds for the progress bar to finish and the updated system version to display. Refresh the page several times if the updated system version does not appear.
- Step 4** A system update appears on the **Software Updates** page. Click **Update**.
- Step 5** After the system update is complete, at the top of the **Application Updates** field, click **Download All**. The packages begin downloading.
- Step 6** After the packages are downloaded, at the top of the **Application Updates** field, click **Update All**. The packages begin updating.
- Step 7** Ensure that each application has been updated by reviewing its version in the **Installed Apps** page.
- 

## Upgrade from Release 1.2.10.x to Release 1.3.0.7

There are two Cisco DNA Center 1.2.10.x to 1.3.0.7 upgrade procedures: one for networks that are not running Cisco SD-Access and one for networks that are. Complete the upgrade procedure that's appropriate for your network.

### Upgrade Procedure for Deployments Not Running Cisco SD-Access

If Cisco SD-Access is not running in your network, you can upgrade directly from Cisco DNA Center 1.2.10.x to 1.3.0.7.

After you upgrade to 1.3.0.7, you cannot switch back to an earlier release.

## Procedure

---

- Step 1** From the Cisco DNA Center home page, choose  > **System Settings** > **Software Updates**.
- Step 2** Download, update, and install the packages that appear at the top of the page.  
A **Cisco DNA Center 1.2.12 is Here!** banner appears at the top of the page with a **Switch Now** button. **Switch Now** lets you see the system and application packages that are available to update.
- Step 3** At the prompt, click **OK** to proceed, but **do not** download, update, and install the 1.2.12.x system and application packages.  
Wait for approximately 90 seconds for the progress bar to finish and the updated system version and banner to display. Refresh the page several times if the updated system version and banner do not appear.
- Step 4** Click **Switch Now** in the **Cisco DNA Center 1.3.0.7 is Here!** banner that appears.
- Step 5** At the prompt, click **OK** to proceed with the upgrade.
- Step 6** A system update appears on the **Software Updates** page. Click **Update**.
- Step 7** After the system update is complete, at the top of the **Application Updates** field, click **Download All**. The packages begin downloading.
- Step 8** After the packages are downloaded, at the top of the **Application Updates** field, click **Update All**. The packages begin updating.
- Step 9** Ensure that each application has been updated by reviewing its version in the **Installed Apps** page.
- 

## Upgrade Procedure for Deployments Running Cisco SD-Access

If Cisco SD-Access is running in your network, you cannot upgrade directly from Cisco DNA Center 1.2.10.x to 1.3.0.7. You must first upgrade to 1.2.12.x. From there, you can upgrade directly to 1.3.0.7.

After you upgrade to 1.3.0.7, you cannot switch back to an earlier release.

## Procedure

---

- Step 1** From the Cisco DNA Center home page, choose  > **System Settings** > **Software Updates**.  
A **Cisco DNA Center 1.2.12 is Here!** banner appears at the top of the page with a **Switch Now** button.
- Step 2** Click **Switch Now** in the **Cisco DNA Center 1.2.12 is Here!** banner.
- Step 3** At the prompt, click **OK** to proceed with the upgrade.  
Wait for approximately 90 seconds for the progress bar to finish and the updated system version and banner to display. Refresh the page several times if the updated system version and banner do not appear.
- Step 4** A system update appears on the **Software Updates** page. Click **Update**.
- Step 5** At the top of the **Application Updates** field, click **Download All**.  
The packages begin downloading.
- Step 6** After the packages are downloaded, at the top of the **Application Updates** field, click **Update All**.  
The packages begin updating.

**Important** Don't update individual applications unless the Cisco TAC instructs you to do so.

- Step 7** Ensure that each application has been updated by reviewing its version in the **Installed Apps** page.
- Step 8** After the upgrade to 1.2.12.x is complete, see [Upgrade from Release 1.2.12.x to Release 1.3.0.7, on page 2](#).
- 

## Upgrade from Release 1.2.8 to Release 1.3.0.7

You cannot upgrade directly from Cisco DNA Center 1.2.8 to 1.3.0.7. You must first upgrade to 1.2.10.x and then to 1.3.0.7.

After you upgrade to 1.3.0.7, you cannot switch back to an earlier release.

### Procedure

---

- Step 1** From the Cisco DNA Center home page, choose  > **System Settings** > **Software Updates**.  
A **Cisco DNA Center 1.2.10 is Here!** banner appears at the top of the page with a **Switch Now** button. **Switch Now** lets you see the system and application packages that are available to update.
- Step 2** Click **Switch Now** in the banner.
- Step 3** At the prompt, click **OK** to proceed with the upgrade.  
Wait for approximately 90 seconds for the progress bar to finish and the updated system version and banner to display. Refresh the page several times if the updated system version and banner do not appear.  
At this point in the procedure, **do not** click **Switch Now** in the **Cisco DNA Center 1.2.12 is Here!** banner that appears at the top of the page.
- Step 4** A system update appears on the **Software Updates** page. Click **Update**.
- Step 5** After the system update is complete, at the top of the **Application Updates** field, click **Download All**.  
The packages begin downloading.
- Step 6** After the packages are downloaded, at the top of the **Application Updates** field, click **Update All**.  
The packages begin updating.  
Don't update *individual* applications unless the Cisco TAC instructs you to do so.
- Step 7** After the upgrade to 1.2.10.x is complete, see [Upgrade Procedure for Deployments Not Running Cisco SD-Access, on page 2](#).
- 

## Upgrade from Release 1.2.6 to Release 1.3.0.7

You cannot upgrade directly from Cisco DNA Center 1.2.6 to 1.3.0.7. You must first upgrade to 1.2.8, then to 1.2.10, and then to 1.3.0.7.

After you upgrade to 1.3.0.7, you cannot switch back to an earlier release.

## Procedure

---

- Step 1** Do one of the following:
- If you installed Cisco DNA Center 1.2.6 as a fresh installation, you must apply a system update patch (1.1.0.659.1) before you can upgrade to 1.2.8. From the Cisco DNA Center home page, choose  > **System Settings** > **Software Updates**.  
After you apply the system update patch, a **Cisco DNA Center 1.2.8 is Here!** banner appears at the top of the page with a **Switch Now** button. **Switch Now** lets you see the system and application packages that are available to update. Click **Switch Now** and **OK**.
  - If you upgraded to 1.2.6 (system update 1.1.0.659.1) from a previous Cisco DNA Center release, you see a **Cisco DNA Center 1.2.8 is Here!** banner. Click **Switch Now** and **OK**.
- Step 2** At the prompt, click **OK** to proceed with the upgrade.  
Wait for approximately 90 seconds for the progress bar to finish and the updated system version and banner to display. Refresh the page several times if the updated system version and banner do not appear.  
At this point in the procedure, **do not** click **Switch Now** in the **Cisco DNA Center 1.2.10 is Here!** banner that appears at the top of the page.
- Step 3** A system update appears on the **Software Updates** page. Click **Update**.
- Step 4** After the system update is complete, at the top of the **Application Updates** field, click **Download All**. The packages begin downloading.
- Step 5** After the packages are downloaded, at the top of the **Application Updates** field, click **Update All**. The packages begin updating.  
Don't update *individual* applications unless the Cisco TAC instructs you to do so.
- Step 6** Ensure that each application has been updated by reviewing its version in the **Installed Apps** page.
- Step 7** After the upgrade to 1.2.8 is complete, see [Upgrade from Release 1.2.8 to Release 1.3.0.7, on page 4](#).
- 

## Upgrade from Release 1.2.5 to Release 1.3.0.7

You cannot upgrade directly from Cisco DNA Center 1.2.5 to 1.3.0.7. You must first upgrade to 1.2.6, then to 1.2.8, then to 1.2.10, and then to 1.3.0.7.

After you upgrade to 1.3.0.7, you cannot switch back to an earlier release.

## Procedure

---

- Step 1** From the Cisco DNA Center home page, choose  > **System Settings** > **Software Updates**.  
You will see a system update for 1.2.6; accept the update, download the 1.2.6 packages, and upgrade to 1.2.6.  
After the upgrade to 1.2.6 is complete, a **Cisco DNA Center 1.2.8 is Here!** banner appears at the top of the page with a **Switch Now** button. **Switch Now** lets you see the system and application packages that are available to update.

- Step 2** Click **Switch Now** in the banner.
- Step 3** At the prompt, click **OK** to proceed with the upgrade.
- Wait for approximately 90 seconds for the progress bar to finish and the updated system version and banner to display. Refresh the page several times if the updated system version and banner do not appear.
- At this point in the procedure, **do not** click **Switch Now** in the **Cisco DNA Center 1.2.10 is Here!** banner that appears at the top of the page.
- Step 4** A system update appears on the **Software Updates** page. Click **Update**.
- Step 5** After the system update is complete, at the top of the **Application Updates** field, click **Download All**. The packages begin downloading.
- Step 6** After the packages are downloaded, at the top of the **Application Updates** field, click **Update All**. The packages begin updating.
- Don't update *individual* applications unless the Cisco TAC instructs you to do so.
- Step 7** Ensure that each application has been updated by reviewing its version in the **Installed Apps** page.
- Step 8** After the upgrade to 1.2.8 is complete, see [Upgrade from Release 1.2.8 to Release 1.3.0.7, on page 4](#).
- 

## Upgrade from Release 1.2 – 1.2.4 to Release 1.3.0.7

You cannot upgrade directly from Cisco DNA Center 1.2 – 1.2.4 to 1.3.0.7. You must first upgrade to 1.2.6, then to 1.2.8, then to 1.2.10, and then to 1.3.0.7.

After you upgrade to 1.3.0.7, you cannot switch back to an earlier release.

### Procedure

---

- Step 1** From the Cisco DNA Center home page, choose  > **System Settings** > **Software Updates**.
- A **Cisco DNA Center 1.2.6 is Here!** banner appears at the top of the page with a **Switch Now** button. **Switch Now** lets you see the system and application packages that are available to update.
- Step 2** Click **Switch Now** in the banner.
- Step 3** At the prompt, click **OK** to proceed with the upgrade.
- Wait for approximately 90 seconds for the progress bar to finish and the updated system version and banner to display. Refresh the page several times if the updated system version and banner do not appear.
- At this point in the procedure, **do not** click **Switch Now** in the **Cisco DNA Center 1.2.8 is Here!** banner that appears at the top of the page.
- Step 4** A system update appears on the **Software Updates** page. Click **Update**.
- Step 5** After the system update is complete, at the top of the **Application Updates** field, click **Download All**. The packages begin downloading.
- Step 6** After the packages are downloaded, at the top of the **Application Updates** field, click **Update All**. The packages begin updating.
- Don't update *individual* applications unless the Cisco TAC instructs you to do so.

- Step 7** Ensure that each application has been updated by reviewing its version in the **Installed Apps** page.
- Step 8** After the upgrade to 1.2.6 is complete, see [Upgrade from Release 1.2.6 to Release 1.3.0.7, on page 4](#).
- 

## Upgrade from Release 1.1.7 or 1.1.8 to Release 1.3.0.7

You cannot upgrade directly from Cisco DNA Center 1.1.7 or 1.1.8 to 1.3.0.7. You must first upgrade to 1.2.6, then to 1.2.8, then to 1.2.10, and then to 1.3.0.7.

After you upgrade to 1.3.0.7, you cannot switch back to an earlier release.

### Procedure

---

- Step 1** From the Cisco DNA Center home page, choose  > **System Settings** > **App Management**.
- A **Cisco DNA Center 1.2.6 is Here!** banner appears at the top of the page with a **Switch Now** button. **Switch Now** lets you see the system and application packages that are available to update.
- The **App Management** page also displays the following side tabs:
- **Packages & Updates:** Shows the packages that are currently installed and the updates that are available for installation from the Cisco cloud.
  - **System Updates:** Shows the system updates that are currently installed and the updates that are available for installation from the Cisco cloud.
- Step 2** Click **Switch Now** in the banner.
- Step 3** At the prompt, click **OK** to proceed with the upgrade.
- Clicking **OK** changes the release train in the back end. The message "Connecting to... cloud catalog" with a progress bar appears.
- Wait for approximately 90 seconds for the progress bar to finish and the updated system version and banner to display. Refresh the page several times if the updated system version and banner do not appear.
- At this point in the procedure, **do not** click **Switch Now** in the **Cisco DNA Center 1.2.8 is Here!** banner that appears at the top of the page.
- Step 4** After the release train change finishes, review the **System Updates** page.
- The following information is displayed:
- **Package:** System package
  - **Status:** Running
  - **Installed Version:** Current system package installed
  - **Available Update:** System package available for installation
- Step 5** Click **Install** in the **Available Update** column.
- During the install process, the following Cisco DNA Center GUI changes are made:

- **App Management** tab: Changes to the **Software Updates** tab
- **System Updates** side panel: Changes to the **Updates** side panel
- **Packages & Updates** side panel: Changes to the **Installed Apps** side panel

**Step 6** After the system installation is finished and is in **Running** state, refresh the page.

A new **Updates** page displays the following information:

- **Platform Update**: Displays the updated system version with a statement that the system is currently up to date. Additionally, a green check mark indicates a successful system upgrade.
- **Apps Updates**: Displays groupings of applications with their current file size and version.

**Note** After performing system updates, clear your browser cache and log in to Cisco DNA Center again.

**Step 7** At the top of the **Apps Updates** field, click the **Download All** button.

After clicking this button, all the application upgrade packages are downloaded.

**Note** There are additional **Download All** buttons for different application groups (for example, **Automation**, and **Assurance**). You need to only click the **Download All** button at the top of the page.

**Step 8** After all the application packages have been downloaded, click the **Update All** button at the top of the **Apps Updates** field.

After clicking this button, all the applications are updated.

**Note** There are additional **Update All** buttons for different application groups (for example, **Automation**, and **Assurance**). You need to only click the **Update All** button at the top of the page.

**Step 9** Ensure that each application has been updated by reviewing its version in the **Installed Apps** page.

The application versions should be updated in this page.

**Note** There may be some new application packages that were not part of your previous Cisco DNA Center configuration, and for this reason have not been installed by this procedure.

**Step 10** After the upgrade to 1.2.6 is complete, see [Upgrade from Release 1.2.6 to Release 1.3.0.7, on page 4](#).

---
