

# Preface

---

## Overview

*Cisco WebEx Social Administration Guide, Release 3.0* provides information for a Cisco WebEx Social system administrator. It explains how to use the Cisco WebEx Social Portal, Server, and Director pages to configure, manage, and monitor Cisco WebEx Social, and how to perform several related tasks.

## Audience

This manual is intended for an administrator of Cisco WebEx Social. It can also be used by someone who administers a Cisco WebEx Social community.

## Organization

This manual is organized as follows:

Chapter	Description
<a href="#">Chapter 1, “Cisco WebEx Social Administration Overview”</a>	Provides general information about Cisco WebEx Social, including how to configure yourself as a system administrator, how to create user groups and communities, and how to define roles and set permissions
<a href="#">Chapter 2, “Portal Settings”</a>	Describes how to use the Portal tab of Cisco WebEx Social administration to configure settings of the portal, including adding and editing user records
<a href="#">Chapter 3, “Server Settings”</a>	Describes how to use the Server tab of Cisco WebEx Social administration to configure items such as system resources, log levels, and system properties

<a href="#">Chapter 4, “Director”</a>	Describes how to use the Director to configure topology, monitor system performance, and manage various system set up and configuration options
<a href="#">Appendix A, “Modifying Default Layouts and Creating a Custom Template”</a>	Describes how to modify various default templates to change the layout of Cisco WebEx Social pages
