

Site Administration

These release notes apply only to administrators.

Use the WebEx Site Administration to configure and maintain your WebEx Meeting Center, Event Center, Training Center, or Support Center sites.

- [Known Issues and Limitations, page 2](#)

What's New

WBS29.11

Deactivated host account

WebEx meetings or events cannot be started if the host has been deactivated.

Disable printing and saving documents during file sharing

WebEx Site Administration provides the ability to control printing and saving documents when sharing a file for all centers.

Features

GMT offset display option

The Display GMT offset for time zones in emails and web pages option controls whether the Greenwich Mean Time (GMT) offset, such as "GMT -8:00," is displayed for time zones and times. If you only work with customers in the U.S. and Canada who are not familiar with GMT, you can disable this option.

Time zone configuration

Time zone labels are now brand-able for a site. These labels include the location (for example, "San Francisco") and time zone name (for example, "Pacific Time") and daylight-savings time (DST) label (for example, "Daylight" or "Standard").

Display meetings at actual or scheduled start time

The Display meetings at actual start time, not scheduled time option, which is available for Meeting Center, controls whether a meeting in progress displays on calendars at the scheduled time or the actual start time. To make it easier for attendees to find meetings in progress on calendars, meetings now display at the scheduled time by default. Enabling this option in the site administration options will revert to the previous behavior if desired.

Community button option

The Display Community button on navigation bar option controls whether the Community button appears on the horizontal navigation bar. Both hosts and attendees can use this button to access the WebEx Community.

Importing address books into Microsoft Outlook 2010

Importing your company address book into your WebEx contacts is not supported with Microsoft Outlook 2010 64-bit.

Site administration accounts without session type

Site administration accounts can now be created with no session types assigned, and such accounts do not count toward the Named Host limit on a site. Such accounts cannot start a session themselves, but can schedule for another user if given permission to do so by the other user.

Invite by IM and Remind by IM in Quick Start menu

The Presence integration option controls the appearance of the Invite by IM and Remind by IM options in the Quick Start menu in a meeting, and also controls the download of WebEx Connect on Support pages.

Named Host audio-only users

There is now a separate provisioning count for Named Host users who only have the Personal Conference meeting type enabled, that is, users who can only start Personal Conference meetings. This count appears on the site administration Home page.

Account sign-up confirmation

The Confirmation required for new accounts option requires users who sign up for an account to confirm the request. The user confirms by clicking a link in a follow-up email sent to the address given in the sign-up form. There are also related options to expire the confirmation page (the default is 3 days), and notify site administrators of a successful confirmation, and to include a security check in the sign-up form.

Known Issues and Limitations

This section contains known issues and limitations that affect only Site Administration. For more information about the browsers, operating systems, supported by WebEx, and known issues that affect other WebEx services, see [System Requirements and Feature Support](#).

Branding and customization

- The new WebEx header does not allow branded headers to be less than 75 px. If a branded site has a header height that is less than 75 px and does not have customized header HTML code, the system will automatically increase header height to 75 px.
- The Log in and Log out links for the Site Administration tool are not visible if the header navigation color is blue or a dark color.

If you want to make branding changes, you should contact your customer support manager (CSM).

Safari browser support

The Safari browser is not supported for Site Administration.
