

# Cisco ACI HTML5 vCenter Plug-in Release Notes, Release 1.0.3

## Introduction

The Cisco Application Centric Infrastructure (ACI) HTML5 vCenter plug-in is a user interface that allows you to manage the Cisco ACI fabric from within the VMware vCenter. With the Cisco ACI HTML5 vCenter plug-in, virtualization administrators can define network connectivity independently of the networking team while sharing the same infrastructure.

Earlier versions of the plug-in were designed to work with Adobe Flash. However, VMware has deprecated the Flash GUI, and Adobe will stop updating Flash at the end of 2020. Consequently, beginning with the VMware vSphere 6.7 release, the new Cisco ACI HTML5 vCenter plug-in works with HTML5 instead of Flash.

This document describes the features, issues, and limitations of the Cisco ACI HTML5 vCenter plug-in, Release 1.0.2.

For more information about this product, see "Related Content."

Note: The documentation set for this product strives to use bias-free language. For the purposes of this documentation set, bias-free is defined as language that does not imply discrimination based on age, disability, gender, racial identity, ethnic identity, sexual orientation, socioeconomic status, and intersectionality. Exceptions may be present in the documentation due to language that is hardcoded in the user interfaces of the product software, language used based on RFP documentation, or language that is used by a referenced third-party product.

Date	Description
February 2, 2021	Release 1.0.3 became available.

## New Software Features

There are no new software features in this release.

## Changes in Behavior

There are no changes in behavior in this release.

## Open Issues

Click the bug ID to access the Bug Search tool and see additional information about the bug. The "Exists In" column of the table specifies the 1.0.3 releases in which the bug exists. A bug might also exist in releases other than the 1.0.3 releases.

Bug ID	Description	Exists in
<a href="#">CSCvu58119</a>	When an EPG is associated with a physical domain and the tenant is visible to the vCenter plug-in, then the physical domain is visible to the vCenter plug-in user.	1.0.3

## Resolved Issues

Click the bug ID to access the Bug Search tool and see additional information about the bug.

Bug ID	Description	Fixed in
<a href="#">CSCvw19170</a>	<p>Sometimes the Cisco ACI HTML5 vCenter plugin is unresponsive when querying information from the Cisco APIC. The following message shows in vsphere-ui-runtime.log as the HTTP response:</p> <p>" compCtrlrUnable to process the query, result dataset is too big"</p> <p>The following message might show in opld.log:</p> <p>" java.lang.OutOfMemoryError: Java heap space" for "/ui/vcplugin/rest/fabrics/XXX/domains"</p>	1.0.3

## Known Issues

Click the bug ID to access the Bug Search tool and see additional information about the bug. The "Exists In" column of the table specifies the 1.0.3 releases in which the bug exists. A bug might also exist in releases other than the 1.0.3 releases.

Bug ID	Description	Exists in
<a href="#">CSCvx33245</a>	ACI HTML5 vCenter Plugin is unable to show data after Fabric Upgrade/Downgrade.	1.0.3
N/A	<p>The initial release does not support the following configurations from the Cisco ACI HTML5 vCenter plug-in:</p> <ul style="list-style-type: none"> <li>• Microsegmentation with Cisco ACI</li> <li>• Cisco ACI Virtual Pod (vPod) domains</li> <li>• Layer 2 and Layer 3 outside connections</li> <li>• Layer 4-to-Layer 7 configuration</li> <li>• Troubleshooting through endpoint-to-endpoint sessions</li> </ul> <p>These configurations can still be made from Cisco Application Policy Infrastructure Controller (APIC).</p>	1.0.3
N/A	The EPG Cisco ACI Virtual Edge VMM association does not show an option to select the encapsulation type.	1.0.3

## Virtualization Compatibility Information

This section lists virtualization compatibility information for the Cisco APIC software.

- For a table that shows the supported virtualization products, see the [ACI Virtualization Compatibility Matrix](#).
- This release supports the following additional virtualization products:

Product	Supported Release	Information Location
VMware vSphere Client	<ul style="list-style-type: none"> <li>• Version 7.0</li> <li>• Version 6.7 Update 2</li> </ul>	<ul style="list-style-type: none"> <li>• <a href="#">Cisco ACI HTML5 vCenter Plug-in Guide</a></li> <li>• VMware website</li> </ul>
Cisco APIC	3.2(h) and later releases	<a href="#">Cisco APIC Release Notes</a>

Product	Supported Release	Information Location
Cisco ACI Virtual Edge	1.2(9c) and later releases	<a href="#">Cisco ACI HTML5 vCenter Plug-in Guide</a>

## Related Content

See the [Cisco Application Policy Infrastructure Controller \(APIC\)](#) page for the documentation.

By using the "Choose a topic" and "Choose a document type" fields of the APIC documentation website, you can narrow down the displayed documentation list to make it easier to find the desired document.

You can watch videos that demonstrate how to perform specific tasks in the Cisco APIC on the [Cisco Data Center Networking](#) YouTube channel.

Temporary licenses with an expiry date are available for evaluation and lab use purposes. They are strictly not allowed to be used in production. Use a permanent or subscription license that has been purchased through Cisco for production purposes. For more information, go to [Cisco Data Center Networking Software Subscriptions](#).

The following table provides links to the release notes, verified scalability documentation, and new documentation:

Document	Description
<a href="#">Cisco ACI HTML5 vCenter Plug-in Guide</a>	Describes how to install the Cisco plug-in for VMware vSphere that uses HTML5. It also includes basic Cisco ACI configuration tasks that you can perform in VMware vCenter.
<a href="#">Cisco ACI Virtual Edge Installation Guide, Release 3.0(x)</a>	Provides installation, upgrade, and migration information for Cisco ACI Virtual Edge.

## Documentation Feedback

To provide technical feedback on this document, or to report an error or omission, send your comments to [apic-docfeedback@cisco.com](mailto:apic-docfeedback@cisco.com). We appreciate your feedback.
