

# New and Changed Information

This chapter contains the following sections:

- [New and Changed Information, on page 1](#)

## New and Changed Information

The following tables provide an overview of the significant changes to this guide up to this current release. The table does not provide an exhaustive list of all changes made to the guide or of the new features up to this release.

*Table 1: New Features and Changed Information for Cisco APIC Release 6.2(1)*

Feature	Description	Where Documented
TCP Syslog Sessions Support	APIC sends a <code>KeepAlive</code> packet over the syslog TCP sessions to ensure the connection is not considered idle or expired.	<a href="#">Creating a Syslog Destination and Destination Group</a>
Local SPAN with the switch CPU as the destination	This feature allows you to send SPAN packets to the CPU port of the leaf switch for packet analysis.	<a href="#">CPU as a destination port for a SPAN session</a>
