New and Changed

This chapter contains this section:

New and Changed Information

This table provides an overview of the significant changes to this guide for this release. The table does not provide an exhaustive list of all changes made to the guide or of the new features up to this release.

Table 1: New Features and Changed Information for Cisco APIC 6.2(1)

Feature	Description	Where Documented
Port channel dynamic load balancing	Dynamic Load Balancing (DLB) for Nexus 9000 ACI product line support for L2 port channels, L3 port channels and L3 ECMP of fabric ports. This efficiently load balances the traffic based on the current utilization level of the outgoing links.It uses the DRE/DLB to allow for better traffic distribution across ACI TOR front panel port -channel member ports, which helps re-route traffic and alleviate congestion.	Port channel dynamic load balancing
