New and Changed Information

This chapter contains the following sections:

New and Changed Information

The following tables provide an overview of the significant changes to this guide for the Cisco Application Policy Infrastructure Controller (APIC) 6.1(x) family of releases. The tables do not provide an exhaustive list of all changes to the guide or of the new features.

Table 1: New Features and Changed Behavior in the Cisco ACI Virtualization Guide, Cisco APIC Release 6.2(x)

Cisco APIC Release Version	Feature	Description	Where Documented
6.2(1)	Dynamic EPG deployment per VMware ESXi cluster with vCenter VMM integration	Dynamic EPG deployment through VMM integration with VMware vCenter can now be aware of VMware ESXi cluster inside the VMware vCenter. This allows APIC to deploy the EPGs only to the ACI leaf switch interfaces connected to VMware ESXi hosts part of the VMware ESXi cluster selected by the user.	Dynamic EPG deployment
6.2(1)	Deprecated features	These feature(s) are deprecated for release 6.2(1), and after: • Cisco ACI with VMware NSX-T Data Center	N/A
