New and Changed Information

The following tables provide an overview of the significant changes to the chapters in this guide up to the current release. The table does not provide an exhaustive list of all changes made to the topics or of the new features up to this release.

Table 1: New Features and Changed Information for Cisco APIC 5.2(3)

Feature	Description	Where Documented
Log record query enhancements	You can now use the <code>time-range</code> query filter, which improves the query performance for log record objects.	Read and Write Operations and Filters Log Record Query Enhancements

Table 2: New Features and Changed Information for Cisco APIC 4.2(1)

Feature	Description	Where Documented
REST API procedures location	Beginning with Cisco APIC, release 4.2(1), all REST API procedures are provided in the various configuration guides, available at the Cisco Application Policy Infrastructure Controller (APIC) documentation page	https://www.cisco.com/c/en/us/support/cloud-systems-management/application-policy-infrastructure-controller-apic/tsd-products-support-series-home.html
