# Cisco Nexus Hyperfabric Series – QR Code

## QR Code

All Cisco 6000 Series switches have a unique QR Code with the launch URL that contains the serial number of the switch.

Two types of QR codes are available on the HF6100-60L4D and HF6100-32D. These are

- a 5cm x 5cm QR code sticker on the front top of the device, and
- a pullout QR code in the rear of the switch.

For more information on the QR code, see the [Hyperfabric Getting Started](#) document.
