New and Changed Information

New and Changed Information

The following table provides an overview of the significant changes to this guide for this current release. The table does not provide an exhaustive list of all changes made to the guide or of the new features in this release.

The following tables provide information about the new and changed features in Cisco NDFC Release 12.1.1p.

Feature	Description	Where Documented
Cisco NDFC Hybrid Multi-Cloud Support	This feature explains about hybrid cloud functionality which allows connectivity between on-prem and public cloud networks. Using Cisco Nexus Dashboard Orchestrator (NDO), connectivity is orchestrated between NDFC managed Vxlan fabric and Cloud Application Policy Infrastructure Controller (cAPIC) deployed in public cloud.
