For more information, see Cisco Nexus 9000 Series NX-OS Interfaces Configuration Guide, Release 10.5(x).

Product Impact	Feature	Description
	Increased Egress NAT translations per port	Beginning with Cisco NX-OS Release 10.5(2)F, the range for maximum replications for the map interface is increased to 250. This enhanced range is supported on all the platforms that support multicast NAT. For more information see, Cisco Nexus 9000 Series NX-OS Multicast Routing Configuration Guide Release 10.5(x).

	Mixed-path Enhancement to support vPC for VNF	Next-hop filtering can be configured to exclude next-hop VNF addresses that are temporarily silent. By excluding such silent next hops, you can prevent routing issues and ensure that traffic is not sent to unresponsive or non-existent destinations. See Cisco Nexus 9000 Series VXLAN Configuration Guide, and Verified Scalability Guide, Release 10.5(x).
	Single drop identification	Beginning with Cisco NX-OS Release 10.5(2)F, the drop identification feature allows you to identify the nodes causing intermittent packet drop at per flow basis. Using this feature, users can trace packet flow without a sniffer, ethanalyzer, or ELAM. For more information, see Cisco Nexus 9000 Series NX-OS System Management Configuration Guide, Release 10.5(x).
	Granular Flow Priority	Beginning from Cisco NX-OS Release 10.5(2)F, the IPFM granular priority-based flow feature provides multiple levels of priorities to the IPFM flow and allows to prioritize the critical flows. Priority flow is not supported on PIM passive mode. However, this operation is applicable only when there is lack of bandwidth in the fabric. For more information, see Cisco Nexus 9000 Series NX-OS IP Fabric for Media Solution Guide, Release 10.5(x).
	Merging Telemetry Subscriptions	Beginning with Cisco NX-OS 10.5(2)F, support is added to create a single telemetry collection for all the sensor groups even if they are included in multiple subscriptions, unless a parser file is configured in any of its destination groups. For more information, see Cisco Nexus 9000 Series NX-OS Programmability Guide, Release 10.5(x).
