

Configuring Cisco HyperFlex as a Citrix Workspace Appliance

- [Prerequisites, on page 1](#)
- [Creating a Secure Client in Citrix Cloud, on page 2](#)
- [Specifying Customer and Client Identifier Information, on page 3](#)
- [Configuring Resource Location and Cloud Connector VM, on page 6](#)
- [Verifying the Cloud Connector VM, on page 7](#)

Prerequisites

The following prerequisites are required for Cisco HyperFlex to operate as a Citrix Workspace Appliance in a Citrix Cloud environment:

- Install and configure Cisco HyperFlex HX-Series nodes in a cluster with Microsoft Hyper-V Server 2016 running 3.5(2a) or later, see the [Cisco HyperFlex Systems Installation Guide for Microsoft Hyper-V](#).
- Ensure that the Microsoft System Center Virtual Machine Manager (VMM) Console is installed on your server. See [Microsoft System Center Virtual Machine Manager virtualization environments](#) for background details.
- Create and deploy a virtual machine (VM) as the base VM used for the connector VM. Once deployed, use the Microsoft System Preparation (Sysprep) tool to prepare the base VM. Ensure that the base VM is in a power-off state.

Note We recommend that you configure the Sysprep tool to boot Windows to Out-of-Box Experience (OOBE). OOBE utilizes an OOBE.xml file that includes a set of specific default values. See [OOBE.xml](#) for details.

- Create a datastore on the HX Data Platform (see the [Cisco HyperFlex Data Platform Administration Guide](#)), and then deploy the base VM on that datastore.
- Confirm that you have a:
 - Citrix Cloud account. For detailed instructions, see [Sign up for Citrix Cloud](#).

- Citrix Virtual Apps and Desktops Service subscription or trial on Citrix Cloud. For detailed instructions, see [Citrix Cloud services subscriptions](#) in the Citrix product documentation.
- Set up a resource location containing the resources that are required to deliver applications and desktops to subscribers. For detailed instructions, see [Set up resource locations](#) in the Citrix product documentation.

Note For an overview on system requirements for Citrix Virtual Apps and Desktop Service, see [System Requirements](#) in the Citrix product documentation.

Creating a Secure Client in Citrix Cloud

The following procedure outlines how to create a secure client secret key from Citrix Cloud using API access:

Step 1 Enter your Citrix credentials (Citrix.com, My Citrix, or Citrix Cloud) to securely log in to your Citrix Cloud account. Be sure to sign in with the email address and password you provided when you signed up.

If your company allows you to sign-in to Citrix Cloud using their company credentials instead of a Citrix account, click **Sign in with my company credentials** and enter your company's sign in URL for your account.

Step 2 After signing in to the Citrix Cloud GUI, verify that there is an active Citrix Virtual Apps and Desktops Service subscription or trial on Citrix Cloud.

Figure 1: Citrix Cloud

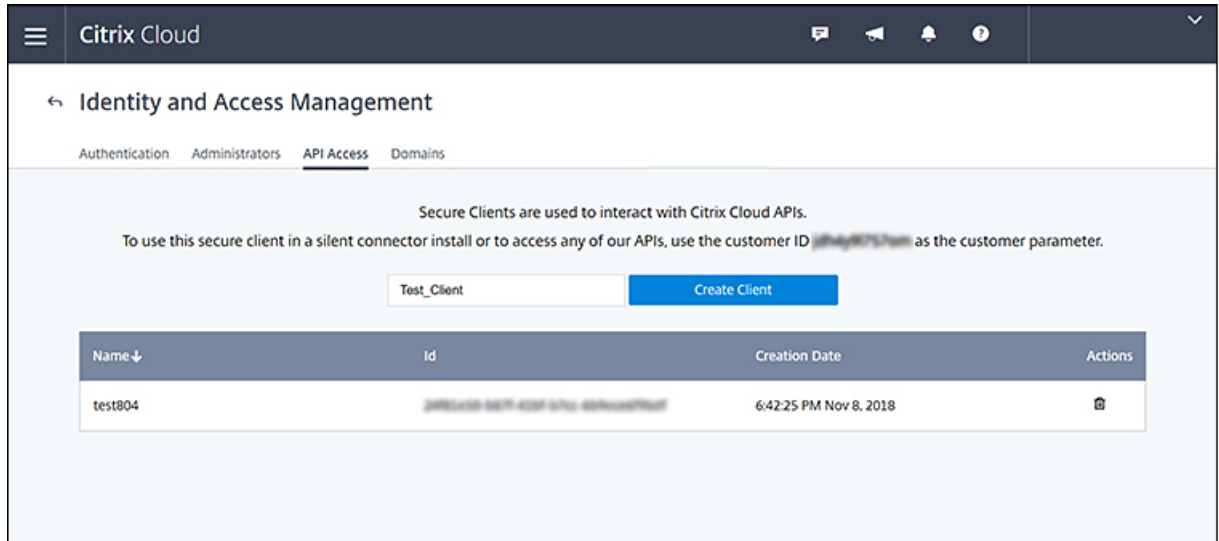

Step 3 Select **Identity and Access Management** from the menu in the Citrix Cloud GUI.

Step 4 On the Identity and Access Management page, click **API Access**. The API Access page appears.

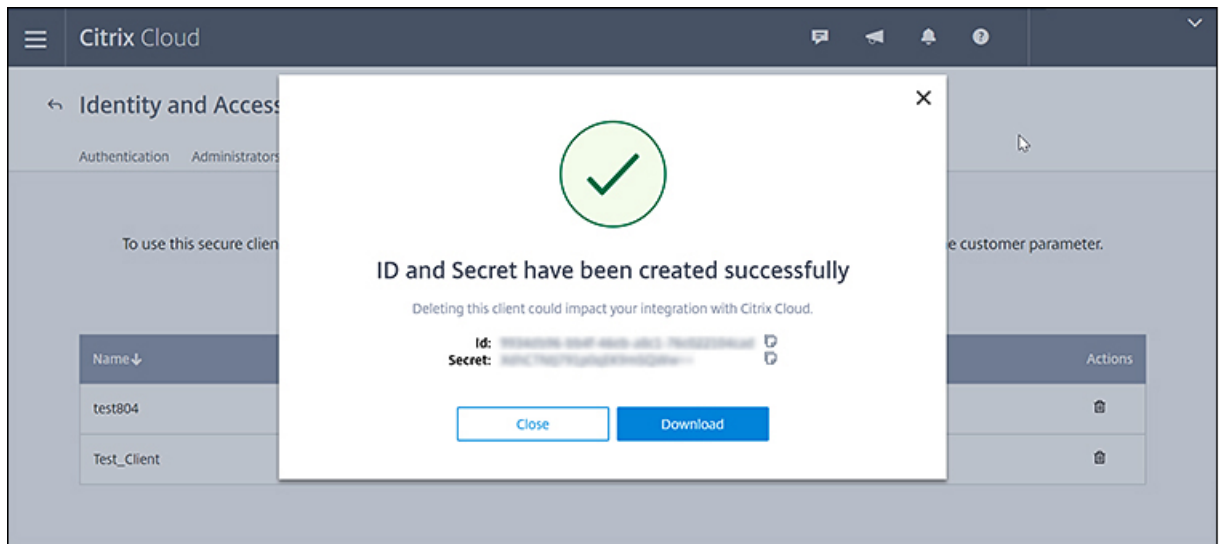

Step 5 Enter your secure client secret in the Name Your Secure Client text box, and then click **Create Client**.

Figure 2: Identity and Access Management Page > API Access

Step 6 Download the secure client CSV file containing the client ID and secret from the API Access page. It is named secureclient.csv.

Specifying Customer and Client Identifier Information

The following procedure outlines how to locate a customer ID and client ID from Citrix Cloud and enter this information (including the client secret) on the HyperFlex Connect GUI:

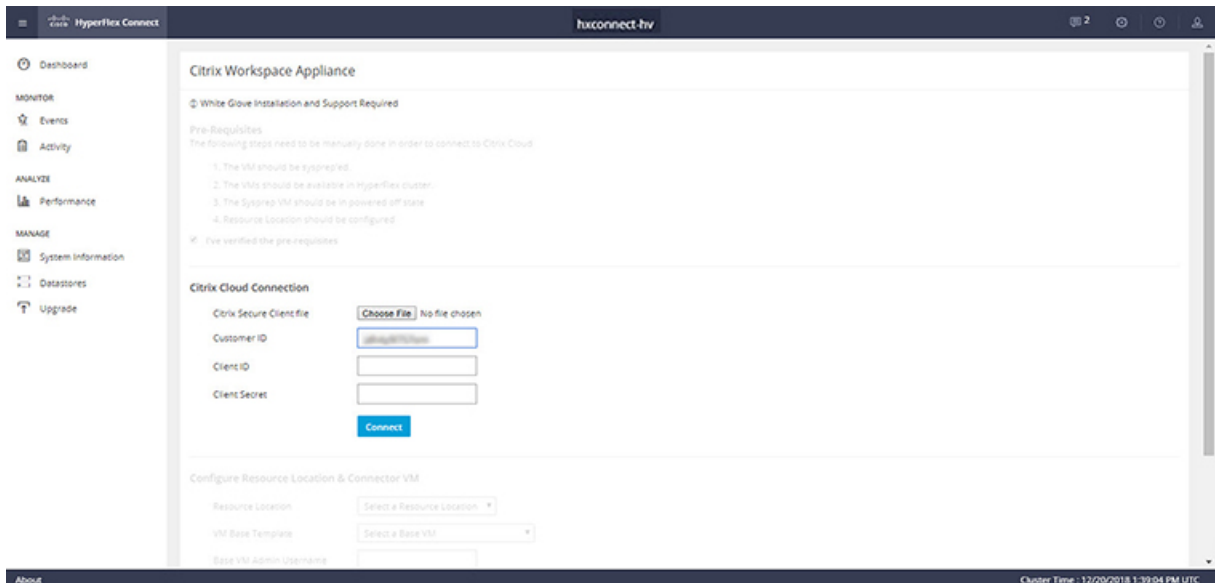

Step 1 In the Citrix Cloud GUI, on the API Access page of Identity and Access Management, copy the customer ID.

Figure 4: Copying the Customer ID from the API Access Page (Citrix Cloud)

Step 2 2. In the Cisco HyperFlex Connect GUI, paste the customer ID in the Customer ID text box of the Citrix Workspace Appliance page.

Figure 5: Pasting the Customer ID on the Citrix Workspace Appliance Page (HyperFlex Connect)

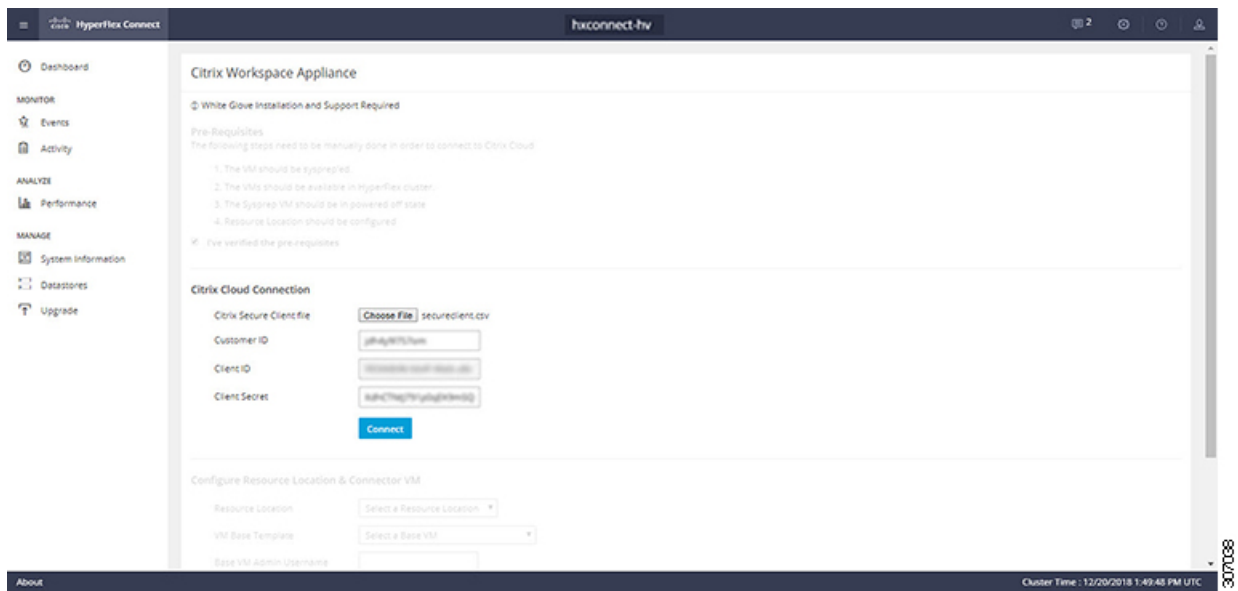

Step 3 Click **Choose File** and navigate to the secure client CSV file containing the client ID and secret created in the Citrix Cloud GUI (see [Creating a Secure Client in Citrix Cloud, on page 2](#)).

Figure 6: Navigating to the Secure Client CSV File

The Client ID and Client Secret fields are automatically populated with the client ID and secret from the secure client CSV file.

Figure 7: Client ID and Client Secret in the Citrix Workspace Appliance Page (HyperFlex Connect)

Step 4 Click **Connect** to establish the connection from HyperFlex Connect to Citrix Cloud.

- Export Base VM
- Import Base VM
- Attach vSwitch to Citrix Cloud Connector VM.
- Add Citrix Cloud Connector VM to Domain (Domain Join).
- Install Citrix Connector at the on-premises side (resource location).

Step 3 Click **Activity** to access the Activity page. You can view the installation sequence from the Activity page.

Figure 9: Activity Page—Cloud Connector Installation Sequence

Verifying the Cloud Connector VM

The following procedure outlines how to connect to the new Citrix Cloud Connector VM using Hyper-V Manager and confirm that it has been properly installed. This procedure uses the Microsoft Remote Desktop Protocol (RDP) to establish a connection to the Hyper-V instance and launch Hyper-V Manager to perform the verification.

- Step 1** Log in to the Hyper-V instance using a Remote Desktop connection.
- Step 2** Launch the Hyper-V Manager from the Microsoft Windows Server.
- Step 3** Verify that the installed Citrix Cloud Connector VM appears in the list of Virtual Machines in the HX cluster along with the original base VM.

Step 4 If desired, you can verify the options of the newly created Citrix Cloud Connector VM.
