System Message Guide for Cisco IOS XE Cupertino 17.12.x

Cisco System Messages Overview

This document describes system messages for Cisco software releases. During operation, the system software sends these messages to the console (and, optionally, to a logging server on another system) during operation. Not all system messages indicate problems with your system. Some are purely informational, and others may help diagnose problems with communications lines, internal hardware, or the system software.

How To Read System Error Messages

System error messages begin with a percent sign (%) and are structured as follows: %FACILITY-SUBFACILITY-SEVERITY-MNEMONIC: Message-text

- FACILITY is a code consisting of two or more uppercase letters that indicate the facility to which the message refers. A facility can be a hardware device, a protocol, or a module of the system software.
- SEVERITY is a single-digit code from 0 to 7 that reflects the severity of the condition. The lower the number, the more serious the situation. [Error Message Severity Levels](#) lists the severity levels.
- MNEMONIC is a code that uniquely identifies the error message.
- Message-text is a text string describing the condition. This portion of the message sometimes contains detailed information about the event, including terminal port numbers, network addresses, or addresses that correspond to locations in the system memory address space. Because the information in these variable fields changes from message to message, it is represented here by short strings enclosed in square brackets ([]). A decimal number, for example, is represented as [dec]. [Representation of Variable Fields in Error Messages](#) lists the representations of variable fields and the type of information in them.

The following is a sample system error message:

```
%LINK-2-BADVCALL: Interface [chars], undefined entry point
```

Some error messages also indicate the card and slot reporting the error. These error messages begin with a percent sign (%) and are structured as follows:

```
%CARD-SEVERITY-MSG: SLOT %FACILITY-SEVERITY-MNEMONIC: Message-text
```

- CARD is a code that describes the type of card reporting the error. VIP and FEIP are possible card types.
- MSG is a mnemonic that indicates that this is a message. It is always shown as MSG.
- SLOT indicates the slot number of the card reporting the error. It is shown as SLOT followed by a number (for example, SLOT5).

The prepended portion of the error message (%CARD-SEVERITY-MSG: SLOT) is not shown in the error message listings in this document.

Error Message Severity Levels

Error message severity levels correspond to the keywords assigned by the **logging** global configuration commands that define where and at what level these messages appear. The default is to log messages to the console at the debugging level (7). For more information, see the system configuration chapter and descriptions of the **logging** command in the configuration guide and command reference.

Level	Description
0 - emergency	System unusable
1 - alert	Immediate action needed
2 - critical	Critical condition
3 - error	Error condition
4 - warning	Warning condition
5 - notification	Normal, but significant, condition
6 - informational	Informational message only
7 - debugging	Appears during debugging only

Representation of Variable Fields in Error Messages

Representation	Type of Information
[atalk_address]	AppleTalk address
[atalk_net]	AppleTalk network, either 600 or 600-601
[char]	Single character
[chars]	Character string
[dec]	Decimal number
[enet]	Ethernet address (for example, 0000.FEED.00C0)
[hex]	Hexadecimal number
[inet]	Internet address (for example, 10.0.2.16)
[int]	Integer number
[node]	Address or node name
[sci_notation]	Scientific notation
[t-line]	Terminal line number in octal (or decimal if the decimal-TTY service is enabled)
[v-name]	VINES name; or number (hex or decimal)

Error Message Traceback Reports

Some messages describe internal errors and contain traceback information. This information is very important and should be included when you report a problem to your technical support representative.

The following sample message includes traceback information:

```
-Process= "Exec", level= 0, pid= 17 -Traceback= 1A82 1AB4 6378 A072 1054 1860
```

System and Error Messages in Cisco IOS XE Dublin 17.12.x

The following tables list system and error messages and recommended actions. Scroll right to see the **Recommendation Action**. Alternatively, you can download the system and error messages in the excel format here: [System Message Guide for Cisco IOS XE Cupertino 17.12.x](#).

A to E

Facility-Severity-Mnemonic	Severity	Message	Msg Explain	Component	Recommended-Action
ACCESS_SESSION_TRACE-3-TRACE_INIT_FAIL	3-Error	Access session trace initialization failed with code: [dec].	Failed to initialize access-session trace.	polaris-smd	Review smd logs taking note of the timestamp information to select specific information to review. Copy the message and other related information exactly as it appears on the console or in the system log.
ACCESS_SESSION_TRACE-3-TRACE_REG_FAIL	3-Error	Component [chars] registration failed. Error code: [dec]	Component failed to register with access-session trace	polaris-smd	Review smd logs taking note of the timestamp information to select specific information to review. Copy the message and other related information exactly as it appears on the console or in the system log.
ACLMGR_MESSAGE-3-ACL_LEN_ERR	3-Error	Error in [chars]	ewlc ACL flex push error message.	iosetools	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity	Message	Msg Explain	Component	Recommended-Action
ACL_ERRMSG-3-CHANGE_ERROR	3-Error	[chars] [chars] [chars] ACL [chars] change configuration could not be updated on all installed interfaces.\n	The given ACL change configuration could not be applied to all installed policies in hardware.	INVALID	Find out more about the error by using the show platform software trace messages fed command.
ACL_ERRMSG-3-ERROR	3-Error	[chars] [chars] [chars] ACL [chars] configuration could not be applied on [chars].\n	The given ACL configuration could not be applied to hardware.	INVALID	Find out more about the error by using the show platform software trace messages fed command.
ACL_ERRMSG-3-SGACL_ERROR	3-Error	SGACL configuration could not be changed on [chars].\n	An error occurred during SGACL configuration change, all SGACLs have been removed from cell.	INVALID	User needs to manually remove the cell configuration and attempt to re-apply when resources have been freed.
ACL_ERRMSG-4-ACLTCAM_FULL	4-Warning	[chars] [chars] [chars] ACL on [chars] could not be programmed in hardware, ACL TCAM is full.\n	The configuration is too large.	INVALID	You have exceeded the system limit of ACL TCAM, use a simpler configuration which uses less ACL entries.\n
ACL_ERRMSG-4-DGT_FULL	4-Warning	[chars] [chars] [chars] ACL on [chars] could not be programmed in hardware, DGT ID table is full.\n	The configuration is too large.	INVALID	You have exceeded the system limit of DGT, use a simpler configuration which uses less DGT entries.\n
ACL_ERRMSG-4-HASH_ERROR	4-Warning	[chars] [chars] [chars] ACL on cell [chars] could not be found.\n	The configuration is unknown.	INVALID	There is no SGACL Cell with this configuration found.\n

Facility-Severity-Mnemonic	Severity	Message	Msg Explanation	Component	Recommended-Action
ACL_ERRMSG-4-HASH_FULL	4-Warning	[chars] [chars] [chars] ACL on cell [chars] could not be programmed in hardware, SGACL table is full.\n	The configuration is too large.	INVALID	You have exceeded the system limit of SGACL cells, use a simpler configuration which uses less SGACL cells.\n
ACL_ERRMSG-4-HASH_ZERO	4-Warning	[chars] [chars] [chars] ACL on cell [chars] could not be programmed in hardware, sgt or mpls-vpn hash size is zero.\n	Cannot configure in hardware due to zero sgt or mpls-vpn hash entries.	INVALID	Allocate hash entries to sgt or mpls-vpn using custom template.\n
ACL_ERRMSG-4-POLICYLABEL_FULL	4-Warning	[chars] [chars] [chars] ACL on [chars] could not be programmed in hardware, Policy Label table is full.\n	The configuration is too large.	INVALID	You have exceeded the system limit of the number of Policies, use a simpler configuration which uses less Policy entries.\n
ACL_ERRMSG-4-PROGRAM_FAILED	4-Warning	[chars] [chars] [chars] ACL on [chars] programming failed in hardware.\n	The configuration is too large.	INVALID	You have exceeded the system limit of entries, use a simpler configuration which uses less entries.\n
ACL_ERRMSG-4-SIS_STATS_FULL	4-Warning	Policy id [dec] could not be programmed in hardware, SIS stats table is FULL.\n	The configuration is too large.	INVALID	You have exceeded the system limit of hardware resources, use a simpler configuration which uses less resources.\n
ACL_ERRMSG-4-UNLOADED	4-Warning	[chars] [chars] [chars] ACL on interface [chars] could not be programmed in hardware and traffic will be dropped.\n	The configuration is too large; dropped will be dropped on this interface.	INVALID	Allocate more space to the relevant section of the TCAM and reboot, or else use a simpler configuration. If possible, use the same ACLs on multiple interfaces.\n

Facility-Severity-Mnemonic	Severity	Message	Msg Explain	Component	Recommended-Action
ACL_ERRMSG-6-GACL_INFO	6-Information	Logging is not supported for GACL.\n	The ACL logging is not supported for client/group ACL.	INVALID	No action is needed.
ACL_ERRMSG-6-PACL_INFO	6-Information	Logging is not supported for PACL.\n	The ACL logging is not supported on port interface.	INVALID	No action is needed.
ACL_ERRMSG-6-RELOADED	6-Information	[chars] [chars] [chars] ACL on interface [chars] has now been loaded into the hardware.\n	The configuration that previously was unable to fit into the hardware will now fit and has been programmed for this interface.	INVALID	No action required, informational only.\n
ACL_ERRMSG-6-REMOVED	6-Information	The [chars] [chars] [chars] ACL configuration that was previously unloaded has been removed from interface [chars].\n	The configuration that was previously unloaded, because of lack of space, has been removed.	INVALID	No action required, informational only.
ACL_ERRMSG-6-THRESHOLD_EVENT	6-Information	The [chars] threshold alarm state is [chars] for switch [dec] asic [dec]; with [dec] entries used and [dec] entries remaining.\n	The configuration exceeds the threshold, because of lack of space.	INVALID	No action required, informational only.

Facility-Severity-Mnemonic	Severity	Message	Message	Component	Recommended-Action
AFC_SCHED1-AFC_HTTPCON_HEALTHCHECK_FAILURE	1-Alert	AFC Healthcheck failed with HTTP connection error: [chars].	AFC Healthcheck failed due to HTTPCON error	afc	LOG_STD_NO_ACTION
AFC_SCHED1-AFC_HTTP_HEALTHCHECK_FAILURE	1-Alert	AFC Healthcheck failed with HTTP status code [dec].	AFC Healthcheck failed due to HTTP error	afc	LOG_STD_NO_ACTION
AFC_SCHED1-AFC_PROVIDER_HEALTHCHECK_FAILURE	1-Alert	AFC Healthcheck failed : [chars].	AFC Healthcheck failed due to provider error	afc	LOG_STD_NO_ACTION
AFC_SCHED3-AFC_CLOUDM_HEALTHCHECK_FAILURE	3-Error	AFC Healthcheck failed, can't communicate with cloud services because [chars].	AFC Healthcheck failed due cloudm communication failure	afc	LOG_STD_NO_ACTION
AFC_WNCD1-AFC_CONDITIONS_NOT_MET	1-Alert	Some geolocation information is missing for AP with Radio MAC [chars] to use AFC:[chars]	Some conditions are preventing the AP from using AFC	afc	LOG_STD_NO_ACTION
AFC_WNCD4-AFC_GEOLOCATION_HIGH_UNCERTAINTY	4-Warning	Current location uncertainty for AP [chars] is high ([dec] meters).	Geolocation uncertainty for the AP is above 400m	afc	LOG_STD_NO_ACTION
AFC_WNCD6-AFC_WNCD_INFO	6-Information	Info Level - [chars]	General AFC WNCD Lib info message	ewlc-spwifi	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity	Message	Msg Explain	Component	Recommended-Action
APMGR_AUDIT_MESSAGE6 APMGR_AUDIT_MESSAGE6 APMGR_AUDIT_MESSAGE6 APMGR_AUDIT_MESSAGE6 APMGR_AUDIT_MESSAGE6	3-Error	User ID: [chars] - Unable to update broadcast keys to AP	Unable to update broadcast keys to AP	ewlc-client	LOG_STD_ACTION
APMGR_AUDIT_MESSAGE6 APMGR_AUDIT_MESSAGE6 APMGR_AUDIT_MESSAGE6 APMGR_AUDIT_MESSAGE6 APMGR_AUDIT_MESSAGE6	6-Information	AP [chars] User ID: [chars] [chars] [chars] [chars] [chars]	APMGR_AUDIT_MESSAGE6 APMGR_AUDIT_MESSAGE6 parameters	ewlc-ap	LOG_STD_ACTION
APMGR_AWIPS_SYSLOG-6APMGR_AWIPS_MESSAGE	6-Information	AWIPS alarm:[chars] ([dec])	AWIPS alarm detected	ewlc-awips	LOG_STD_NO_ACTION
APMGR_TRACE_MESSAGE2BSSID_CLEANUP_TIMEOUT	2-Critical	BSSID cleanup timeout, [chars]	BSSID cleanup could not be completed. This may result in failure to push configuration updates to Access Points. Make a note of any recent changes made to the network or the device configuration which may have triggered this and proceed to the suggested action.	ewlc-ap	Copy the error message exactly as it appears on the console or in the system log. Open a case with the Technical Assistance Center via the Internet http://www.cisco.com/go/technicalsupport or contact your Cisco technical support representative and provide the representative with the gathered information. It is suggested to collect archive traces and live process core to analyse the error.

Facility-Severity-Mnemonic	Severity	Message	Message Explanation	Component	Recommended-Action
APMGR_TRACE_MESSAGE-2-WLAN_CRIT_ERR	2-Critical	WLAN Error : [chars]	Critical issue seen with WLAN config. Make a note of any recent changes made to the network or the device configuration which may have triggered this and proceed to the suggested action.	ewlc-ap	Copy the error message exactly as it appears on the console or in the system log. Open a case with the Technical Assistance Center via the Internet http://www.cisco.com/techsupport or contact your Cisco technical support representative and provide the representative with the gathered information. It is suggested to collect archive traces and live process core to analyse the error.
APMGR_TRACE_MESSAGE-2-WLAN_CRIT_INFO	2-Critical	CRITICAL, [chars]	General Wireless LAN Controller critical message	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE-2-WLC_APMGR_CRIT_MSG	2-Critical	CRITICAL, [chars]	General Wireless LAN Controller warning message	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE-3-AP_NTP_SYNC	3-Error	AP [chars] MAC [chars], NTP sync has failed. Reason: [chars]	The Ap failed to sync with the NTP server	ewlc-ap	Verify the IP address of the NTP server and the authentication credentials.
APMGR_TRACE_MESSAGE-3-AP_RADIO_STUCK_ALARM	3-Error	Radio Stats Monitoring: [chars]	Radio stats monitoring and radio stuck alarm	ewlc-ap	No action required

Facility-Severity-Mnemonic	Sev	Msg	Message	Msg Explain	Component	Recommended-Action
APMCR_TRACE_MESSAGE_EWLC_APMCR_ANTENNA_SET_ERROR	3-Error		Antenna set error: [chars]	Antenna id enable/disable operation has resulted in error. please follow error message for details	ewlc-rrm	Please follow error message string and take corrective action
APMCR_TRACE_MESSAGE_EWLC_APMCR_REGDOMAIN_MISMATCH	3-Error		Error: Cannot set country code [chars] for AP MAC:[chars].Regulatory domain check failed	Regulatory domain of all radio slots of the AP does not match with the country code	ewlc-rrm	In most cases, the problem can be corrected by checking regulatory domain supported by Access Point (AP). Radios within APs are assigned to a specific regulatory domain as a part of factory setting. Configuring a country code ensures that each radio's broadcast frequency bands, channels and transmit power levels are compliant with country-specific regulations. Please ensure that user configured country code is compliant with country code setting in AP.

Facility-Severity-Mnemonic	Sev	Msg	Message	Msg Explain	Component	Recommended-Action
APMGR_TRACE_MESSAGE3-EWLC-APMGR_UNSUPP'D_COUNTRY	3-Error		Regulatory domain error while setting country code for AP MAC:[chars], country code [chars] is not configured on WLC	Specified country code is not present in the configured country code list	ewlc-rrm	Validate the country code configuration on the Controller and add the country code to the configured country code list if it is not already present. Please refer to the configuration guide to configure country code. If you still require contact your Cisco technical support representative and provide the information you have gathered.
APMGR_TRACE_MESSAGE3-EWLC_GEN_CHAN_ERR	3-Error		Error in [chars]	General Wireless LAN Controller Error Message.	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE3-EWLC_RRM_ERROR	3-Error		event change: [chars]	General Wireless LAN Controller RRM error message	ewlc-rrm	LOG_STD_ACTION
APMGR_TRACE_MESSAGE3-EWLC_RRM_QUERY_ERR	3-Error		Error in [chars]	Trying to query information related to AP with invalid slot ID.	ewlc-rrm	Please report the error to technical support representative.
APMGR_TRACE_MESSAGE3-EWLC_WLAN_EIA_MSG	3-Error		et-analytics config validation Error: [chars]	Global and Wireless et-analytics config dependency error	ewlc-ap	No action required

Facility-Severity-Mnemonic	Severity	Message	Msg Explain	Component	Recommended-Action
APMGR_TRACE_MESSAGE3EWLC_WLAN_MPSK_MSG	3-Error	MPSK config validation Error: [chars]	MPSK and Central auth dependency error	ewlc-ap	No action required
APMGR_TRACE_MESSAGE3EWLC_WLAN_MPSK_PSK_MSG	3-Error	MPSK config validation Error: [chars]	MPSK and PSK dependency error	ewlc-ap	No action required
APMGR_TRACE_MESSAGE3EXEC_CLI_INVALID_SLOT	3-Error	Executed exec-cli is not applicable for AP: [chars], number of slots: [dec], while cli executed for slot: [dec].	The executed EXEC CLI is not applicable for this AP, because the limitation number of slots	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE3EXEC_CLI_NOT_5G_DUAL_RADIO_AP	3-Error	Executed exec-cli is not applicable for AP: [chars] because AP does not support dual 5ghz radio.	The executed EXEC CLI is not applicable for this AP, because AP does not support dual 5ghz radio	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE3EXEC_CLI_NOT_MASTER_RADIO	3-Error	Executed exec-cli is applicable for only master radio for AP : [chars]	The executed EXEC CLI is applicable only for master radio	ewlc-ap	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity	Message	Msg Explain	Component	Recommended-Action
APMGR_TRACE_MESSAGE3-EXEC_CLI_TX_POWER	3-Error	Tx Power Config Notification: Radio Role is AUTO. So, Tx power change is not allowed for AP [chars] on slot [dec].	Tx Power configuration is not allowed.	ewlc-rrm	LOG_STD_NO_ACTION
APMGR_TRACE_MESSAGE3-WLC_AP_AUDIT_REPORT_ERR	3-Error	Error in [chars]	AP Audit Report Error Message.	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE3-WLC_AP_CONFIG_CHECKER_ERR	3-Error	error received from AP [chars]	Error on AP while applying configuration updates from controller.	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE3-WLC_AP_CN24GDCCHANNELLISTEMPTY	3-Error	The DCA Channel list is empty for 24ghz rf profile [chars]	DCA Channel list for 24ghz radio is empty, it affects Channel Assignment to AP	ewlc-rrm	Please add channels to DCA List
APMGR_TRACE_MESSAGE3-WLC_AP_CN5GDCCHANNELLISTEMPTY	3-Error	The DCA Channel list is empty for 5ghz rf profile [chars]	DCA Channel list for 5ghz radio is empty, it affects Channel Assignment to AP	ewlc-rrm	Please add channels to DCA List

Facility-Severity-Mnemonic	Severity	Message	Msg Explain	Component	Recommended-Action
APMGR_TRACE_MESSAGE3-WLC_AP_6GDC_CHANNEL_EMPTY	3-Error	The DCA Channel list is empty for 6ghz rf profile [chars]	DCA Channel list for 6ghz radio is empty, it affects Channel Assignment to AP	ewlc-rrm	Please add channels to DCA List
APMGR_TRACE_MESSAGE3-WLC_AP_JOIN_CRIT_ERR	3-Error	AP Join/Disjoin Error: [chars]	AP Join/Disjoin Wireless LAN Controller Error Message.	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE3-WLC_AP_LOG_MSG	3-Error	AP Remote Log: [chars]	AP Remote logging	ewlc-ap	No action required
APMGR_TRACE_MESSAGE3-WLC_AP_PACKET_CAPTURE_ERR	3-Error	Error in [chars]	AP packet capture Error Message.	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE3-WLC_EXEC_MSG	3-Error	%% Error: [chars]	Improper arguments or config	ewlc-ap	Arguments to be changed
APMGR_TRACE_MESSAGE3-WLC_GEN_ERR	3-Error	Error in [chars]	General Wireless LAN Controller Error Message.	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE3-WLC_MDNS_AP_ERROR_MSG	3-Error	Error mDNS AP : [chars]	Error Message related to mDNS AP	ewlc-ap	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity	Message	Message Explanation	Component	Recommended-Action
APMGR_TRACE_MESSAGE3-AP_WLC_UNSUPPORTED_AP_MODE_ERR	3-Error	Unsupported AP mode. [chars]	vWLC ultra-low WLCs do not support Local Mode APs. This error will be logged whenever an AP tries to join in Local Mode on a vWLC ultra-low WLC.	ewlc-ap	Fix the configuration to allow AP to join in Flexconnect Mode.
APMGR_TRACE_MESSAGE4-AP_CPU_ALARM	4-Warning	AP [chars], MAC [chars], CPU=[dec]%%, alarm state: [dec]	An alarm was triggered for AP CPU measurements	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE4-AP_GNSS_USB_DISCONNECTED	4-Warning	AP [chars], GNSS USB Module has been removed. This might impact location availability and derivation for nearby APs	GNSS USB module disconnected from AP	ewlc-afc-rm	LOG_STD_ACTION
APMGR_TRACE_MESSAGE4-AP_MEM_ALARM	4-Warning	AP [chars], MAC [chars], Memory=[dec]%%, alarm state: [dec]	An alarm was triggered for AP Memory measurements	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE4-AP_MERAKI_CONVERSION_FAILURE	4-Warning	AP [chars], MAC [chars], Meraki serial number: [chars], Meraki persona change result: Failed. Reason: [chars]	Conversion to Meraki AP validation result	ewlc-ap	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity	Message	Msg Explain	Component	Recommended-Action
APMGR_TRACE_MESSAGE4EASYSK_UNSUPPORTED_AP_MODE	4-Warning	Unsupported AP mode for Easy-PSK WLAN [dec] on AP [chars], MAC [chars]. Easy-PSK only supported in local mode.	Easy-PSK WLAN configured on AP not in local mode. WLAN will not be pushed to the AP.	ewlc-spwifi	Fix the configuration to move AP in local mode.
APMGR_TRACE_MESSAGE4WLC_APMGR_WARNING_MSG	4-Warning	Warning, [chars]	General Wireless LAN Controller warning message	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE4WLC_CONFIG_CHECKER_WARNING	4-Warning	config check: [chars]	Warning message related to config checker	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE4WLC_MDNS_AP_WARNING_MSG	4-Warning	Warning mDNS AP : [chars]	Warning message related to mDNS AP	ewlc-ap	LOG_STD_ACTION
APMGR_TRACE_MESSAGE5AP_AFC_BELOW_TX_MIN	5-Notice	AP [chars], 6GHZ radio operating below tx min due to afc restriction	6GHZ radio operating below rf profile configured tx min due to afc restriction	ewlc-afc-rm	LOG_STD_ACTION
APMGR_TRACE_MESSAGE5AP_AFC_IMMINENT_FLAG_SET	5-Notice	AP [chars], 6GHZ radio AFC response is about to expire on AP	6GHZ AFC expiry imminent flag set	ewlc-afc-rm	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity	Message	Msg Explanation	Component	Recommended-Action
