System Message Guide for Cisco IOS XE Cupertino 17.9.x

Cisco System Messages Overview

This document describes system messages for Cisco software releases. During operation, the system software sends these messages to the console (and, optionally, to a logging server on another system) during operation. Not all system messages indicate problems with your system. Some are purely informational, and others may help diagnose problems with communications lines, internal hardware, or the system software.

How To Read System Error Messages

System error messages begin with a percent sign (%) and are structured as follows:`%FACILITY-SUBFACILITY-SEVERITY-MNEMONIC: Message-text`

- `FACILITY` is a code consisting of two or more uppercase letters that indicate the facility to which the message refers. A facility can be a hardware device, a protocol, or a module of the system software.
- `SEVERITY` is a single-digit code from 0 to 7 that reflects the severity of the condition. The lower the number, the more serious the situation. Error Message Severity Levels lists the severity levels.
- `MNEMONIC` is a code that uniquely identifies the error message.
- `Message-text` is a text string describing the condition. This portion of the message sometimes contains detailed information about the event, including terminal port numbers, network addresses, or addresses that correspond to locations in the system memory address space. Because the information in these variable fields changes from message to message, it is represented here by short strings enclosed in square brackets (`[ ]`). A decimal number, for example, is represented as `[dec]`. Representation of Variable Fields in Error Messages lists the representations of variable fields and the type of information in them.

The following is a sample system error message:

```
%LINK-2-BADVCALL: Interface [chars], undefined entry point
```

Some error messages also indicate the card and slot reporting the error. These error messages begin with a percent sign (%) and are structured as follows:

```
%CARD-SEVERITY-MSG:SLOT %FACILITY-SEVERITY-MNEMONIC: Message-text
```

- `CARD` is a code that describes the type of card reporting the error. VIP and FEIP are possible card types.
- `MSG` is a mnemonic that indicates that this is a message. It is always shown as `MSG`.
- `SLOT` indicates the slot number of the card reporting the error. It is shown as `SLOT` followed by a number (for example, `SLOT5`).

The prepended portion of the error message (`%CARD-SEVERITY-MSG:SLOT)` is not shown in the error message listings in this document.

Error Message Severity Levels

Error message severity levels correspond to the keywords assigned by the **logging** global configuration commands that define where and at what level these messages appear. The default is to log messages to the console at the debugging level (7). For more information, see the system configuration chapter and descriptions of the **logging** command in the configuration guide and command reference.

Level	Description
0 - emergency	System unusable
1 - alert	Immediate action needed
2 - critical	Critical condition
3 - error	Error condition
4 - warning	Warning condition
5 - notification	Normal, but significant, condition
6 - informational	Informational message only
7 - debugging	Appears during debugging only

Representation of Variable Fields in Error Messages

Representation	Type of Information
[atalk_address]	AppleTalk address
[atalk_net]	AppleTalk network, either 600 or 600-601
[char]	Single character
[chars]	Character string
[dec]	Decimal number
[enet]	Ethernet address (for example, 0000.FEED.00C0)
[hex]	Hexadecimal number
[inet]	Internet address (for example, 10.0.2.16)
[int]	Integer number
[node]	Address or node name
[sci_notation]	Scientific notation
[t-line]	Terminal line number in octal (or decimal if the decimal-TTY service is enabled)
[v-name]	VINES name; or number (hex or decimal)

Error Message Traceback Reports

Some messages describe internal errors and contain traceback information. This information is very important and should be included when you report a problem to your technical support representative.

The following sample message includes traceback information:

```
-Process= "Exec", level= 0, pid= 17 -Traceback= 1A82 1AB4 6378 A072 1054 1860
```

System and Error Messages in Cisco IOS XE Cupertino 17.9.x

The following tables list system and error messages and recommended actions. Scroll right to see the **Recommendation Action**. Alternatively, you can download the system and error messages in the excel format here: System Message Guide for Cisco IOS XE Cupertino 17.9.x.

A to E

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Cache Tree pointer is of null value	The cache tree pointer is of null value.	aaa	"Copy the error message exactly as it appears and report it to your " "technical support representative."
[illegible]	2-Critical	[chars]%08X: Acct db for Id %08X absent	AAA internal error	aaa	LOG_STD_ACTION
[illegible]	2-Critical	Cannot fork process [chars]	Attempted to fork a process and failed. The reason could be either hardware or software.	aaa	LOG_STD_ACTION
[illegible]	3-Error	AAA ACCT process suspended : low I/O memory	AAA ACCT process has been suspended due to insufficient IO memory.	aaa	LOG_STD_ACTION
[illegible]	3-Error	AAA unable to handle accounting requests due to insufficient I/O memory and could be trashing the queued accounting records	Dropping the accounting request as there is no enough I/O memory. Hence all queued accounting requests shall be trashed	aaa	LOG_STD_ACTION
[illegible]	3-Error	AAA unable to create UID for incoming calls due to insufficient processor memory	Stop creating the AAA UID due to LOW processor memory	aaa	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	AAA unable to handle accounting requests due to insufficient processor memory and could be trashing the queued accounting records	Dropping the accounting request as there is no enough processor memory. Hence all queued accounting requests shall be trashed	aaa	LOG_STD_ACTION
[illegible]	3-Error	AAA unable to handle accounting requests reason unknown and could be trashing the queued accounting records	Dropping the accounting request reason unknown. Hence all queued accounting requests shall be trashed	aaa	LOG_STD_ACTION
[illegible]	3-Error	Attribute with unknown format [dec]	An attribute was found with an invalid format.	aaa	"Attribute with unknown format in definition. Enable AAA " "debug and try to replicate the steps to get the message. " "If the meassage appears again Check bug toolkit " "on Cisco website for the issue. If you didn't find one " "Enter <CmdBold>Show tech-support</CmdBold> command " "Collect all the information and error message and report " "it to your technical support representative."
[illegible]	3-Error	RADIUS process is unable to handle the requests due to insufficient I/O memory	RADIUS process unable to handle request due to insufficient IO memory. Hence returning failure.	aaa	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Authorization method list '[chars]' is not defined. Please define it.	A given method list was listed in a command without defining it first. The method list should be defined before use.	aaa	"Define the method list before using it."
[illegible]	3-Error	invalid cursor index [dec] max [dec] service [chars] protocol [chars]	A AAA client has provided an invalid attribute cursor to AAA.	aaa	LOG_STD_ACTION
[illegible]	3-Error	invalid list AAA ID [dec]	A AAA client has provided an invalid attribute list to AAA.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Data structure failed magic number sanity check	A corrupted data structure has been found which was stored internally.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Cannot process [chars] method [dec]	A method list function encountered a method list that was unknown or could not be handled.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Cannot process [chars] method [chars]	A method list function encountered a method type that was unknown or could not be handled.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Cannot process [chars] server type [chars]	A method list function encountered a server type that was unknown or could not be handled. This may be due to a server misconfiguration.	aaa	"Research the cause of the misconfiguration and " "attempt to correct it otherwise take the following " "action. "LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Radius I/O buffer has overflowed	An unusually large number of RADIUS attributes has caused AAA to overflow its RADIUS I/O buffer.	aaa	"This is an internal software error. Check bug toolkit " "on Cisco website for the issue. If you didn't find one " "Enter <CmdBold>Show tech-support</CmdBold> command " "Collect all the information and error message and report " "it to your technical support representative."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Accounting record dropped send to server failed: [chars]	An attempt to send an accounting record to a server failed. This happens when device exhaust all its retries and retransmission. The cause for this be the servers may not be operational or the NAS is not configured properly.	aaa	"Check the server whether they are " "operational or not. Next check whether " "the device is configured properly. Refer to" "the server configuration section of the " "cisco IOS documentation. Finally check " "that the NAS can communicate with the server. " "If the problem persist Enter <CmdBold>show running-" "config<NoCmdBold> command contact your cisco technical " "support representative and provide all the information " "gathered to the representative."
[illegible]	3-Error	High availability initialization failure: [chars]	The AAA subsystem was unable to perform necessary high-availability related initialization. In the event of switchover to a standby device sessions depending on high availability capabilities in the AAA subsystem will be forced to renegotiate.	aaa	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	High availability internal error for unique id 0x%8x: [chars]	The AAA subsystem was suffered an internal error. In the event of switchover to a standby device sessions depending on high availability capabilities in the AAA subsystem may be forced to renegotiate.	aaa	LOG_STD_ACTION
[illegible]	3-Error	aaa attribute list CLI is not valid when configuring in sub-mode.	An internal error has occurred	aaa	LOG_STD_ACTION
[illegible]	3-Error	invalid parameter was used when accessing AAA function	A AAA client tried to use a AAA function with an invalid parameter.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Invalid use of ip_pid[dec]	This error means a process sent an illegal message.	-	"If this message recurs. Check bug toolkit " "on Cisco website for the issue. If you didn't find one " "Enter <CmdBold>Show tech-support</CmdBold> command " "Collect all the information and error message and report " "it to your technical support representative."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	[chars] [chars]: Can not apply configuration to ISDN channel:\n \[chars]\	Configuration can not be applied to individual ISDN channels.	aaa	"You need virtual-profiles and virtual-access " "interfaces to apply configuration to ISDN. " "Refer to the section on \"Configuring virtual " "profile by AAA Configuration\" in the Cisco IOS " "Dial Technologies Configuration Guide."
[illegible]	3-Error	[chars] process is unable to handle the incoming packet due to low memory	Please check the processor memory or IO memory. Most likely one is them has less available memory or worst case both may have insufficient memory.	aaa	LOG_STD_ACTION
[illegible]	3-Error	method list '[chars]': [chars]	This is an internal software error.	aaa	LOG_STD_ACTION
[illegible]	3-Error	method list '[chars]'	This is an internal software error. An AAA client attempted to add too many methods to a method list.	aaa	"This is an internal software error. Check bug tool-kit " "on Cisco web-site for the issue. If you didn't find one " "Collect the error message and report it to your " "technical support representative."
[illegible]	3-Error	AAA ID [dec]	Resource failure.	aaa	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Null cursor	A AAA client has provided a nonexistent attribute cursor to AAA.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Null vrf entry	A NULL VRF entry found while comparing the AAA VRF attributes.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Error[dec] parser is unable to parse [chars] per-user command	All attempts to parse this per_user unconfigure command failed. The unconfigure command is called when an error occurs while configuring per-user commands to revert back. The unconfiguration may fail due to parser or AAA error.	parser and aaa	"The given unconfigure command was not executed. " "Switch on the debug peruser command and repeat " "the steps that caused the error. If you get the error " "Report it to your technical support representative."
[illegible]	3-Error	AAA password restriction failed.- [chars]\n	The password/secret/key entered is not meeting the password restrictions configured	aaa	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Server '[chars]': [chars]	This is an internal software error in the AAA server group subsystem.	aaa	"This is an internal software error. Check bug toolkit " "on Cisco website for the issue. If you didn't find one " "Enter <CmdBold>Show tech-support</CmdBold> command " "Collect all the information and error message and report " "it to your technical support representative."
[illegible]	3-Error	Failed to fork process for [chars].	Quite likely we ran out of memory. Other explanations are possible.	aaa	"If this message recurs. Check bug toolkit " "on Cisco website for the issue. If you didn't find " "one Enter <CmdBold>Show tech-support</CmdBold> " "command collect all the information and error " "message and report it to your technical support " "representative."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	server group '[chars]': [chars]	This is an internal software error in the AAA server group subsystem.	aaa	"This is an internal software error. Check bug " "toolkit on Cisco website for the issue. If you " "didn't find one Enter <CmdBold>Show tech-support" "<NoCmdBold> command collect all the information " "and error message report it to your technical " "support representative."
[illegible]	3-Error	Failed to fork process for [chars].	Quite likely we ran out of memory. Other explanations are possible.	aaa	"If this message recurs. Check bug toolkit " "on Cisco website for the issue. If you didn't find one " "Enter <CmdBold>Show tech-support<NoCmdBold> command " "Collect all the information and error message and report " "it to your technical support representative."
[illegible]	3-Error	[chars] :Peruser Could not sort the [chars] attributes	Sorting of the attributes received from AAA server failed.	aaa	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	5-Notice	User [chars] blocked for login till [chars]	User blocked since the number of authentication failures in the watch time exceeded the configured threshold.	aaa	LOG_STD_ACTION
[illegible]	5-Notice	User [chars] locked out on authentication failure	User locked out since the number of authentication failures exceeded the configured threshold.	aaa	LOG_STD_ACTION
[illegible]	5-Notice	User [chars] failed attempts reset by [chars]	User's number of failed authentication attempts so far has been reset to zero	aaa	LOG_STD_ACTION
[illegible]	5-Notice	User [chars] unlocked by [chars]	User unlocked by the system administrator. User is enabled to login to the system.	aaa	LOG_STD_ACTION
[illegible]	6-Information	Accounting-Session-ID [dec] exceeded max value allowed	Accounting-Session-ID value exceeded max value allowed. Now it is wrapping.	aaa	"This is informational only not an error."
[illegible]	6-Information	invalid hdl AAA ID [dec] hdl [hec] [chars]	A AAA client has provided an invalid attribute list handle to AAA.	aaa	LOG_STD_ACTION
[illegible]	6-Information	Syntax error in route statement: [chars]	Currently downloading route contains syntax error.	aaa	LOG_STD_ACTION
[illegible]	6-Information	Warning: Hardware idb is NULL. No Modem. MoH attribute can not be applied and it is Skipped for authorization.	\nTo handle Modem-on-Hold attribute we need connectivity with modems supporting V.92 modem standards. If there is no modem there wouldn't be any tty without which we cannot use MOH attributes.	aaa	LOG_STD_ACTION
[illegible]	6-Information	Enable view requires to be authenticated by non-none methods Please use the appropriate method with the login authentication	\nNone method authentication is not allowed in CLI	aaa	LOG_STD_ACTION
[illegible]	6-Information	User [chars] failed to enter view '[chars]'.	You have provided wrong User ID or Password for the requested view	aaa	"This message is for information only. No action" " is required."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Failed to start AAA process. AAA requests may not be processed.	Failed to create the AAA process.	aaa	"Free up some memory."
[illegible]	3-Error	last accounting attribute:	The data buffer overflowed while building the accounting packet.The accounting attribute that was being written to the buffer while the buffer overflow occured was logged.	AAA	LOG_STD_ACTION Collect the logs with these debugs by" " using commands #debug aaa api#debug aaa attr#debug aaa accounting"
[illegible]	3-Error	dump of accounting data:	The data buffer overflowed while building the accounting packet as the total length of the attributes exceed the buffer size. Last 128 bytes of buffer data is dumped.	AAA	LOG_STD_ACTION Collect the logs with these debugs by" " using commands #debug aaa api#debug aaa attr#debug aaa accounting"
[illegible]	3-Error	Failed to start accounting process. Accounting records may not be sent.	Failed to create the accounting process.	aaa	"Free up some memory."
[illegible]	3-Error	%% AAA: bad argument %0#4x	We tried to NVGEN a non-existent AAA command.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Bad authentication data: [chars]	The data buffer overflowed while building the authentication packet as the total length of the attributes exceeded the buffer size.	AAA	LOG_STD_ACTION Collect the logs with these debugs" " by using the commands #debug aaa api#debug aaa attr#debug aaa" " authentication"
[illegible]	3-Error	Trying config command but should not be.	An internal error has occurred	aaa	LOG_STD_ACTION
[illegible]	3-Error	%% AAA: bad [chars] list [chars]	One of the AAA methods does not seem to have a list associated with it.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Illegal registry call.	An internal software error has occurred	aaa	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	\n%% AAA: Bad state for [chars] list name [dec]	A AAA method list is neither default nor named. This is bad.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Bad accounting data: [chars]	During AAA accounting operations the internal database of accounting information for a user was found to be corrupt. In all cases this indicates an internal software error and that accounting information for a particular user session has been lost.	aaa	"Copy the error message exactly as it appears and report it to your " "technical support representative."
[illegible]	3-Error	Failed to fork process for [chars].	Quite likely we ran out of memory. Other explanations are possible.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Accounting record dropped due to a full aaa accounting queue: [chars]-[chars] [chars] [chars]	An accounting record was dropped because there are too many accounting packets enqueued.	aaa	"Disable periodic accounting if it is on. The accounting queue may " "have grown to be large which is usually due to a non-responsive " "AAA server. Use 'show radius statistics' or 'show tacacs' to see " "if the number of timeouts is increasing or if the response delay is " "unusually high."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Accounting record dropped due to low memory: [chars]-[chars] [chars] [chars]	An accounting record dropped due to low memory.	aaa	"Disable periodic accounting if it is on. Try to reduce the load " "on the router."
[illegible]	3-Error	accounting record dropped output record queue full: [chars]-[chars] [chars] [chars]\n\	An accounting record was dropped. The record could not be enqueued because the number of records in the output queue has exceeded the system limit.	aaa	"Disable periodic accounting if it is on. " "<CmdBold>[no] aaa accounting update newinfo " "periodic <int><NCmdBold>"
[illegible]	3-Error	Accounting record dropped send to server failed: [chars]-[chars] [chars] [chars]	An attempt to send an accounting record to a server failed.	aaa	"Check that the server TACACS+ or RADIUS is operational. Next "
[illegible]	3-Error	Illegal [chars] [chars] name \[chars]\ rejected	A method-list name should not be the same as a method name. Please choose a different name for the method list.	aaa	"Pick a different method-list name that is not also a method-name."
[illegible]	3-Error	Illegal server-group name [chars] type [chars].	The given server-group name is a name that could conflict with internally chosen lists.	aaa	"Please pick a different server-group name."
[illegible]	3-Error	[chars]	This is an internal software error.	aaa	LOG_STD_ACTION
[illegible]	3-Error	aaa attribute list CLI is not valid when configuring in sub-mode.	An internal error has occurred	aaa	LOG_STD_ACTION
[illegible]	3-Error	%% AAA: invalid [chars] list [dec].	One of the AAA methods lists has inconsistent settings	aaa	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	[chars] AUTHOR/[chars]: Internal state is invalid: astruct 0x[hec] ustruct 0x[hec]	One of the two mentioned data-structures is not set but is needed here. This is an internal software error.	aaa	LOG_STD_ACTION
[illegible]	3-Error	The list [dec] for [chars] is NULL. This should never be.	One of the method-lists created at startup wasn't created. This may cause a reload	aaa	LOG_STD_ACTION
[illegible]	3-Error	Failed to create periodic accounting timer for user [chars]. This user may not generate periodic accounting records.	Failed to malloc a timer struct for periodic accounting.	aaa	"Free up some memory and have user re-authenticate."
[illegible]	3-Error	Invalid request to create periodic accounting timer for user [chars]. Timer already exists.	Invalid client usuage of timer struct for periodic accounting.	aaa	"Copy the error message exactly as it appears and report it to your " "technical support representative."
[illegible]	3-Error	[chars]	Administrative process has been enabled but somehow could not run	-	-
[illegible]	3-Error	%% AAA: No free [chars] lists for \[chars]\	You have reached the maximum number of possible authentication lists for this method.	aaa	LOG_STD_RECUR_ACTION
[illegible]	3-Error	[chars]: no method list-name.	An internal software error.	aaa	LOG_STD_ACTION
[illegible]	3-Error	[chars] method [dec] has no registry!	An internal error has occurred	aaa	LOG_STD_ACTION
[illegible]	3-Error	No name for servergroup in method [chars]	An internal error has occurred	aaa	LOG_STD_ACTION
[illegible]	3-Error	No server-group passed through parser.	An internal error has occurred	aaa	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Could not establish port information	This message indicates an internal software error. AAA could not determine a valid port string based on the information provided to it via a client.	aaa	"Copy the error message exactly as it appears and report it to your " "technical support representative."
[illegible]	3-Error	accounting for null user	This message indicates an internal software error. During shutdown of a line or interface the system tried to send accounting information via AAA but could not find the user to which the accounting information belonged. The most likely reason for this error is trying to do accounting twice for the same event. This error message can occur without any loss of accounting information.	aaa	"Copy the error message exactly as it appears and report it to your " "technical support representative."
[illegible]	3-Error	Overwrote internal buffer space [chars]	An internal software error.	aaa	"Report to tac@cisco.com."
[illegible]	3-Error	Failed to start periodic accounting process. Periodic accounting records may not be sent.	Failed to create the periodic accounting process.	aaa	"Free up some memory."
[illegible]	3-Error	AAA/ACCT/TIMER: Periodic update but no timer.	We are trying to free a timer and the method is PERIODIC but no timer seems to exist.	aaa	LOG_SID_ACTION
[illegible]	3-Error	sanity check in re-login [chars] to [chars]	A software or hardware error occurred.	aaa	"Copy the error message exactly as it appears and report it to your " "technical support representative."
[illegible]	3-Error	Duplicate free of server group 0x[hec]	This is an internal software error.	aaa	LOG_SID_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	str_create overwrote its internal buffer.	An internal buffer used to assemble a string was exceeded thus possibly corrupting other memory.	aaa	LOG_STD_ACTION
[illegible]	3-Error	Bad Subtype [dec] for \[chars]\ [dec]	An internal software error.	aaa	"Report to tac@cisco.com."
[illegible]	3-Error	AAA/ACCT/TIMER: No periodic update but timer set.	We are trying to free a timer but the update method is not PERIODIC and so no timer should exist.	aaa	LOG_STD_ACTION
[illegible]	4-Warning	Bad [chars] method-list name \[chars]\ this is only a warning	A method-list name should not be the same as a method name. Please choose a different name for the method list.	aaa	"Pick a different method-list name that is not also a method-name."
[illegible]	4-Warning	Bad [chars] method-list name \[chars]\ please choose another name	A method-list name should not be the same as a method name. Please choose a different name for the method list.	aaa	"Pick a different method-list name that is not also a method-name."
[illegible]	4-Warning	Bad server-group name [chars] type [chars].	The given server-group name either doesn't exist or the given type does not match the defined server-group.	aaa	"Verify that the group exists and has the same " "type."
[illegible]	4-Warning	Server-group [chars] is not of type [chars].	The given server-group name does not match the specified type	aaa	"Verify that the group exists and has " "the same type."
[illegible]	4-Warning	[chars]	CLI deprecated. New CLI to be used	aaa	LOG_STD_ACTION
[illegible]	4-Warning	Warning: DNIS group [chars] is not defined.	The DNIS group was used without defining it first. It should be defined before use.	aaa	"Define the DNIS group before using it."
[illegible]	4-Warning	The aaa cache process is not created. Please configure aaa cache profile first	Cache was listed in a method-list without defining it first. Cache profile should be defined before use.	aaa	"Define the cache profile before using it."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	4-Warning	Warning: Server [chars] is not defined.	The given server is not on the master-list and should be defined or unexpected things might happen.	aaa	"Please define the server on the appropriate " "master-list as soon as possible."
[illegible]	4-Warning	Warning: Server [inet]:[dec][dec] is not part of server group [chars].	The server does not belong to the specified server group	aaa	"Please check that the specified server belongs " "to the server group"
[illegible]	4-Warning	The server-group \[chars]\ is not a radius server group. Please define \[chars]\ as a radius server group.	The protocol used by the server-group doesn't support the configured aaa action.	aaa	"Use a radius server-group."
[illegible]	4-Warning	The server-group \[chars]\ is not a tacacs+ server group. Please define \[chars]\ as a tacacs+ server group.	The protocol used by the server-group doesn't support the configured aaa action.	aaa	"Use a tacacs+ server-group."
[illegible]	4-Warning	The server-group \[chars]\ is not defined. Please define it.	A given server-group was listed in a method-list without defining it first. Server-groups should be defined before use.	aaa	"Define the server-group before using it."
[illegible]	4-Warning	%% AAA: Unsupported option wait-start mapped to start-stop.	wait-start accounting is not supported. It is being mapped to start-stop	aaa	"wait-start accounting is not supported. It is being mapped to start-stop"
[illegible]	6-Information	Username: [chars] Privilege level: [dec] Command: [chars]	AAA local accounting log message	aaa	"This information is to store buffered logs" "locally and send to SYSLOG server"
[illegible]	6-Information	[chars]	A AAA accounting start message.	aaa	"This information is for information only."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	6-Information	[chars]	A AAA accounting stop message.	aaa	"This information is for information only."
[illegible]	6-Information	[chars]	A AAA accounting watchdog/update message.	aaa	"This information is for information only."
[illegible]	6-Information	[chars] [chars]: [chars]	This administrative message was passed to the NAS from the AAA server	aaa	"No action need be taken but the message may " "contain usefull information regarding some event " "on the server"

[illegible]	3-Error	A CUDD Library error was detected in [chars]	An error was detected by the CUDD Library the ACL-Merge for this invokation has failed. This could result in more traffic being switched by software. The effect of this could be lower performance for the interface for which the merge failed.	aclmerge	"Copy and save this message. Report this to Engineering along with the ACL configuration of this device. Use Topic to search for a similar DDTS. If none found write a DDTS for this problem"
[illegible]	3-Error	A CUDD Library warning message for interest in this event in [chars]	Debug message only. No action required	aclmerge	"Copy and save this message. Report this to Engineering along with the ACL configuration of the device. This is just a debug message of interest to engineering to investigate the case why this happened"
[illegible]	3-Error	Error in %s	ewlc ACL flex push error message.	iosxe-binos-utils	LOG_STD_ACTION
[illegible]	2-Critical	Cannot create ACL Manager data structures for VLAN Map [chars]	The ACL Manager could not allocate the data structures needed to describe a VLAN Map in a form that can be loaded into hardware. Probably caused by lack of free memory.	firmware	LOG_STD_RECUR_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	2-Critical	Cannot create memory block for VLAN [dec]	The ACL Manager was unable to save per-VLAN information needed for its correct operation. Some per-interface features such as access groups or VLAN maps will not be configured correctly.	firmware	"Use a less complicated configuration that " "requires less memory."
[illegible]	2-Critical	Cannot generate hardware representation of access list [chars]	There were insufficient resources available for generating a hardware representation of the access list. Either lack of available logical operation units or lack of memory can cause this problem. Logical operation units are needed when a match on TCP flags is specified or when any test other than eq that is: ne gt lt or range is	firmware	"Modify the ACL configuration to use fewer resources."
[illegible]	3-Error	Augmenting of access-map [chars] on [chars] label [dec] failed	The system ran out of CPU DRAM when attempting to merge internally required elements with the configured access maps.	firmware	LOG_STD_REDUCE_ACTION
[illegible]	3-Error	[chars] can not be supported with the image running on switch-[dec]	A feature has been configured on the stack but can not be supported on one or more switches in the stack. This feature will continue to work on the rest of the switches that support it but will not be applied to the switches that can not support it. All other features continue to work as expected on the stack.	firmware	"Upgrade the software running on switches that " "can not support this feature. Upgrade to a " "software version that supports this feature."
[illegible]	3-Error	ACL labels are out-of-sync on interface [chars] label [dec] is not available on asic [dec]	An internal software error has occurred.	firmware	LOG_STD_ACTION
[illegible]	3-Error	Insert of access-map [chars] #[dec] into [chars] label [dec] failed	The system ran out of CPU DRAM when trying to merge sections of an access map.	firmware	LOG_STD_REDUCE_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Not in truth table: VLMAP [dec] RACL [dec] Rtprot [dec] Mcb [dec] Feat [dec]	An unrecoverable software error occurred while trying to merge the configured input features.	firmware	"show running-config"
[illegible]	3-Error	Invalid L4 port array index while processing [chars]	ACL Manager module received invalid value for L4 port array index. The problem can be due to memory corruption or bad system memory.	firmware	NACL_L4OP_ERROR
[illegible]	3-Error	Invalid [chars] [dec] encountered	ACL Manager has encountered an invalid parameter value.	firmware	"show running-config"
[illegible]	3-Error	Too many [dec] levels of recursion while merging ACLs code [dec].	The configuration is too complicated for the platform specific ACL merge code to support. Most likely cause is including too many separate access lists in a single VLAN map or policy map.	firmware	"Reduce the number IP or MAC access lists" " considered separately in any one VLAN or policy"
[illegible]	3-Error	[chars] ACL merge error [dec] [chars] on [chars] label [dec]	The ACL Manager was unable to complete the merge of the configured features into a form suitable for loading into the hardware. Packets potentially affected by this feature will be sent to the CPU for processing instead. The most likely cause is specifying an ACL that is too large or too complex for the system to handle.	firmware	"Try specifying a smaller and less complicated " "configuration."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Cannot allocate [chars] label for vlan-id [dec]	The ACL Manager was unable to allocate a label for the features on this interface. This means that the hardware cannot be programmed to implement the features and packets for this interface will be filtered in software. There is a limit of 256 labels per direction.	firmware	"Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same ACLs on multiple " "interfaces if possible."
[illegible]	3-Error	Not in truth table: RACL [dec] VLMAP [dec]	An unrecoverable software error occurred while trying to merge the configured output features.	firmware	"show running-config"
[illegible]	3-Error	Not in truth table: IPSrcGrd [dec] PACL [dec] Rtprot [dec]	An unrecoverable software error occurred while trying to merge the configured port acl features.	firmware	"show running-config"
[illegible]	3-Error	Not in truth table: ACL [dec] in map action [dec]	A software error occurred while trying to merge a QoS Policy Map	firmware	"show running-config"
[illegible]	3-Error	Unknown VMR access group action 0x[hec]	An internal software error has occurred.	firmware	LOG_STD_ACTION
[illegible]	3-Error	Unknown L4 operation 0x[hec]	ACL Manager module received invalid value for L4 operation. The problem can be due to memory corruption or bad system memory.	firmware	NACL_L4OP_ERROR
[illegible]	4-Warning	[chars]ACL TCAM Full. Software Forwarding packets on [chars] label [dec] on [chars] [chars]	The ACL configuration is too large to fit in the platform -specific ACL TCAM table.	firmware	"Simplify the ACLs applied to interfaces or reduce" " their number."
[illegible]	4-Warning	ACL TCAM Full. [chars] [chars] [chars] [chars]	The ACL configuration is too large to fit in the platform -specific ACL TCAM table.	firmware	"Simplify the ACLs applied to interfaces or reduce" " their number."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	4-Warning	Reloading [chars] [chars] label [dec] [chars] [chars]feature	The ACL Manager was able to fit more of the configured features on this label into the hardware. One or more features had previously been unloaded because of lack of space.	firmware	LOG_STD_NO_ACTION
[illegible]	4-Warning	Reloading [chars] session [dec] [chars] feature	The ACL Manager was able to fit more of the configured Flow based SPAN features on this session into the hardware. One or more features had previously been unloaded because of lack of space.	firmware	LOG_STD_NO_ACTION
[illegible]	4-Warning	Unloading [chars] [chars] label [dec] [chars] [chars]feature	The ACL Manager was unable to fit the complete configuration into the hardware so some features will have to be applied in software. This prevents some or all of the packets in a VLAN/port from being forwarded in hardware and requires them to be forwarded by the CPU. Multicast packets may be dropped entirely instead of being forwarded.	firmware	"Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same ACLs on multiple " "interfaces if possible."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	4-Warning	Unloading [chars] session [dec] [chars] feature	The ACL Manager was unable to fit the complete Flow based SPAN configuration into the hardware so this feature has been temporarily disabled for the given session.	firmware	"Allocate more space to the ACL section of the " "TCAM by choosing an SDM template with more ACL " "TCAM space and reboot the switch. You may also " "use a simpler ACL configuration and/or use the " "same ACLs on multiple interfaces if possible."
[illegible]	1-Alert	msgtxt_nomemory	The requested operation could not be accomplished because of a low\n\ memory condition.	[illegible]	"Reduce other system activity to ease memory demands. If conditions\n\ warrant upgrade to a larger memory configuration."

[illegible]	6-Information	AppNav registered with Central Manager successfully	Received a registration success message from the Central Manager	service-controller	"None. All is well"
APS -NISYS	2-Critical	[chars]	A software error occurred during initialization of\n\ the APS subsystem	-	"Check for sufficient processor memory." LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	1-Alert	No Active Port In Group [chars]	After an active interface failure the system\n\ switches over to the standby interface if APS has\n\ been enabled. This message is posted if after a\n\ switchover the system finds no active interface\n\ i.e. both working and protection interfaces are\n\ found to be nonoperational.	-	"Isolate the cause of failure on both working\n\ and protection interfaces."
[illegible]	2-Critical	Group [chars]: Channel Config Mismatch	Working and Protection interfaces do not point to the\n\ same path on local and remote network elements	-	"Configure working and protection interfaces\n\ to point to the same path on local and remote\n\ network elements"
[illegible]	2-Critical	Group [chars]: Channel Mismatch - [chars]	-	-	"Check for any failures on the APS commnication\n\ channel. If APS communication channel is\n\ operational contact Cisco TAC."
[illegible]	2-Critical	Group [chars]: Far End Prot Failure - [chars]	-	-	"Isolate the cause of failure on the protection\n\ channel on the remote network element."
[illegible]	2-Critical	[chars] [dec]	APS software detected an internal error	-	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	2-Critical	Group [chars]: Mode Mismatch - [chars]	-	-	"Configure the remote APS group for\n\ bidirectional operation."
[illegible]	2-Critical	Failed To Open Socket	This message is posted when the APS subsystem fails\n\ to create a UDP socket for exchanging APS channel\n\ protocol messages over APS message channel configured\n\ for IP. This usually is due to a low memory condition\n\ in the system	-	[illegible]
[illegible]	2-Critical	Group [chars]: Prot Switch Byte Failure - [chars]	-	-	"Check for failures on the APS communication\n\ channel. Isolate the cause for such failures\n\ and restore the communication channel to\n\ working condition"
[illegible]	3-Error	[chars] Port Fail On [chars]	This message is posted when APS subsystem receives\n\ a port fail indication from the driver subsystem.\n\ This message indicates that the specified interface\n\ has detected a failure condition\n\ e.g. Loss Of Light.	-	"Isolate the cause of the failure and restore\n\ the interface to normal operational\n\ condition."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	6-Information	Group [chars]: Mode Mismatch - [chars]	This message is posted by the local network element\n\ if the local APS group has been configured for\n\ bidirectional operation but the associated remote\n\ APS group has been configured for unidirectional\n\ operation. This message is posted after the local\n\ network element detects the mismatch and changes\n\ the operation to unidirectional.	-	"Configure the remote APS group for\n\ bidirectional operation."
[illegible]	6-Information	Auto-Failover - Group [chars]	This message is posted if APS hardware\n\ successfully switched over to the standby interface\n\ after the failure of the active interface. This is\n\ informational only.	-	"Isolate the cause of failure of the previous\n\ active interface and restore it to a working\n\ condition."
[illegible]	6-Information	Group [chars]: Remote Request - [chars]	This message is posted by the local network element\n\ after an APS switchover that is triggered by an APS\n\ request from the remote network element. This is\n\ informational only.	-	LOG_STD_NO_ACTION
[illegible]	6-Information	Group [chars] - [chars] channel is now ACTIVE	This message is posted when a previously standby\n\ channel becomes the active channel. This is\n\ informational only.	-	LOG_STD_NO_ACTION
[illegible]	6-Information	Disable Auto-Failover On [chars]	APS has disabled auto-failover for the indicated\n\ group	-	show aps group <name>
[illegible]	6-Information	Enable Auto-Failover On [chars]	This message is posted when APS software enables\n\ hardware to perform APS actions for failures\n\ detected by the hardware. This is informational\n\ only.	-	LOG_STD_NO_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
			There are several scenarios that the error message will be reported. One case is line card boot up mode for different PIC type does not match to pre-configured PIC type. There two modes of the line card : ICMTS&RPHY and Kobal-R can work with DPIC-G1 or DPIC-G2 with different FW. Eg. if the card is pre-configured as RPHY with the command 'card <slot_num>/0 cBR-CCAP-LC-40G r-phy' but a rf-pic card was inserted to the same slot. Or the card is pre-configured as ICMTS with the command 'card <slot_num>/0 cBR-CCAP-LC-40G' but a dpic card was inserted to the same slot. Or DPIC type is pre-configured as DPIC-G2 with the command 'card <slot_num>/0 CBR-CCAP-LC-G2-R r-phy DPIC-G2-<ifmod>' but a DPIC-G1 card was inserted to the same slot. Or DPIC type is pre-configured as DPIC-G1 with the command 'card <slot_num>/0 CBR-CCAP-LC-G2-R r-phy' but a DPIC-G2 card was inserted to the same slot. Another case is Kobal-R working ifmod mismatch to precfg. Eg. if system reload with card pre-configured as DPIC-G2-10GE 'card <slot_num>/0 CBR-CCAP-LC-G2-R r-phy DPIC-G2-10GE' while .board.conf was saved as DPIC-G2 100GE mode and Kobal boot up before card precfg parsing then this error message will be reported

[illegible]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] indicated an invalid Rx buffer limit	Cisco internal software error. QFP Frame Relay MFR was provided a invalid Rx buffer limit value. The associated Frame Relay MFR Bundle interface may not be fully functional as a result of this condition.	cpp-ucode keyword frame-relay	LOG_STD_ACTION
[illegible]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] invalid Bundle state [chars] [dec] for	Cisco internal software error. QFP Frame Relay MFR Proxy message could not be processed due to the Frame Relay MFR Bundle being in an incorrect state to accept the message. The associated Frame Relay MFR Bundle interface may not be fully functional as a result of this condition.	cpp-ucode keyword frame-relay	LOG_STD_ACTION
[illegible]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] invalid PVC Info Base: 0x%08x Num: [dec]	Cisco internal software error. QFP Frame Relay MFR Proxy message contained invalid Frame Relay MFR PVC information. The associated Frame Relay MFR Bundle interface may not be fully functional as a result of this condition.	cpp-ucode keyword frame-relay	LOG_STD_ACTION
[illegible]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] invalid Link ID [dec] for interface [chars]	Cisco internal software error. QFP Frame Relay MFR Proxy message Link Add could not be processed for the indicated interface due to an invalid Link ID. The associated Frame Relay MFR Bundle interface may not be fully functional as a result of this condition.	cpp-ucode keyword frame-relay	LOG_STD_ACTION

[redacted]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[redacted]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] invalid Link state [chars] [dec] for	Cisco internal software error. QFP Frame Relay MFR Proxy message could not be processed due to the Frame Relay MFR Link being in an incorrect state to accept the message. The associated Frame Relay MFR Bundle interface may not be fully functional as a result of this condition.	cpp-ucode keyword:frame-relay	LOG_STD_ACTION
[redacted]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] indicated an invalid lost sequence	Cisco internal software error. QFP Frame Relay MFR was provided a invalid lost sequence timeout value. The associated Frame Relay MFR Bundle interface may not be fully functional as a result of this condition.	cpp-ucode keyword:frame-relay	LOG_STD_ACTION
[redacted]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] invalid Rx/Tx interface value [dec] for	Cisco internal software error. QFP Frame Relay MFR Proxy was unable to complete the requested Frame Relay MFR Bundle state change or configuration update due to an invalid interface Rx/Tx designation in the proxy request. The associated Frame Relay MFR Bundle interface may not be fully functional as a result of this condition.	cpp-ucode keyword:frame-relay	LOG_STD_ACTION
[redacted]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] invalid Sub-Device ID [dec] for interface [chars]	Cisco internal software error. QFP Frame Relay MFR Proxy message Bundle Add could not be processed for the indicated interface due to an invalid Sub-Device ID. The associated Frame Relay MFR Bundle interface may not be fully functional as a result of this condition.	cpp-mlppp keyword:none	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] indicated an invalid Tx Link weight	Cisco internal software error. QFP Frame Relay MFR Proxy message contained invalid Tx Link weight information. The associated Frame Relay MFR Member Link and/or Bundle interface may not be fully functional as a result of this condition.	cpp-ucode keyword frame-relay	LOG_STD_ACTION
[illegible]	3-Error	CPP Frame Relay Proxy response to msg id [dec] lost due to buffer allocation failure	Cisco internal software error. CPP Frame Relay Proxy message processing detected a IPC buffer allocation failure during response processing.	cpp-ucode keyword frame-relay	LOG_STD_ACTION
[illegible]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] NULL Bundle sub-block for	Cisco internal software error. QFP Frame Relay MFR Proxy was unable to complete the requested Frame Relay MFR Bundle state change or configuration update due to an invalid or uninitialized Bundle sub-block. The associated Frame Relay MFR Bundle interface may not be fully functional as a result of this condition.	cpp-ucode keyword frame-relay	LOG_STD_ACTION
[illegible]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] NULL PVC sub-block for	Cisco internal software error. QFP Frame Relay MFR Proxy was unable to complete the requested Frame Relay MFR Member PVC state change or configuration update due to an invalid or uninitialized PVC sub-block. The associated Frame Relay MFR PVC interface may not be fully functional as a result of this condition.	cpp-ucode keyword frame-relay	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	QFP Frame Relay MFR Proxy [chars] [chars] NULL Member Link sub-block for	Cisco internal software error. QFP Frame Relay MFR Proxy was unable to complete the requested Frame Relay MFR Member Link state change or configuration update due to an invalid or uninitialized Member Link sub-block. The associated Frame Relay MFR Member Link interface may not be fully functional as a result of this condition.	cpp-ucode keyword frame-relay	LOG_SID_ACTION
[illegible]	3-Error	QFP Frame Relay MFR Proxy [chars] SID Update Complete w/o Preceeding Lock	Cisco internal software error. QFP Frame Relay MFR Proxy message processing detected a Bundle Schedule SID update sequence error. One or more interface schedules could have been affected.	cpp-ucode keyword frame-relay	LOG_SID_ACTION
[illegible]	3-Error	QFP Frame Relay Proxy [chars] Multiple SID Update Locks to same interface	Cisco internal software error. QFP Frame Relay MFR Proxy message processing detected a Bundle Schedule SID update sequence error. One or more interface schedules could have been affected.	cpp-ucode keyword frame_relay	LOG_SID_ACTION
[illegible]	4-Warning	QFP Frame Relay MFR Proxy [chars] response lost due to buffer allocation	Cisco internal software error. QFP Frame Relay MFR Proxy message processing detected a IPC buffer allocation failure during proxy response processing. The associated Frame Relay MFR functionality may not be fully functional as a result of this condition.	cpp-ucode keyword frame-relay	LOG_SID_ACTION
[illegible]	4-Warning	QFP Frame Relay MFR Proxy [chars] [chars] Bundle/Link sync issue with interface [chars]	Cisco internal software error. QFP Frame Relay MFR Proxy message processing detected a Bundle-Link state synchronization abnormality. This condition should be cosmetic. Full context of the message will aid in problem isolation.	cpp-ucode keyword frame-relay	LOG_SID_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	4-Warning	QFP Frame Relay MFR Tx Bundle [chars] flowed off for an abnormal duration due to one or more congested member links	Possible Cisco internal software or hardware error. QFP Frame Relay MFR Tx processing detected that a Frame Relay MFR Bundle interface was flowed off for an extended period of time due to a congested member link queue. The associated Frame Relay MFR Bundle interface may not be fully functional as a result of this condition.	cpp-ucode keyword=frame-relay	LOG_STD_ACTION

[illegible]	2-Critical	Virtual appliance configuration cannot occur: [chars]	The system was unable to even attempt to apply virtual appliance configuration for the given reason.	virt-infra	[illegible]
[illegible]	3-Error	[dec] errors while applying configs generated from file [chars].	Out of the generated virtual appliance configuration commands the given number of commands were rejected by the IOSd parser. The indicated log file will describe exactly which commands were rejected as will any accompanying CVAC-4-CLI_FAILURE messages in this log.	virt-infra	"Consult the indicated log file for details of the " "errors that were encountered. Also inspect the " "current running-config and startup-config of the " "router using the <CmdBold>show " "[illegible] and <CmdBold>show " "[illegible] commands in order to " "confirm that the configuration is valid."
[illegible]	3-Error	Could not [chars] file [chars]: [chars]	The system was unable to perform the indicated operation on the indicated file for the indicated reason	virt-infra	"Make sure the given disk is correctly formatted " "and has sufficient free space available."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Error while parsing XML from file [chars]: error '[chars]' element '[chars]' attribute '[chars]' explanation '[chars]'. File will be saved to [chars]	The contents of the given file were not correct XML and as a result XML parsing aborted due to the given reason. No new configuration was applied to the router from this file.	virt-infra	"Investigate the contents of the saved file " "to determine the cause of the reported error and " "if possible fix the file contents restore it to " "its original location and reload to re-process it. " [illegible]
[illegible]	4-Warning	Configuration command failure: '[chars]' was rejected	The indicated IOSd configuration command generated by the CVAC subsystem was rejected by the IOSd CLI. Look for a subsequent CVAC-3-CONFIG_ERROR log message which will contain a reference to a logfile containing more information about this failure.	virt-infra	"Inspect the log file to determine why the command " "was rejected and how to correct it. If necessary " "manually re-issue the corrected command."
[illegible]	4-Warning	Configuration generated from file [chars] was applied and saved to NVRAM. See [chars] for more details.	The generated configuration was applied and the resulting system configuration has been saved to the startup-config in NVRAM. The indicated logfile may contain additional information.	virt-infra	[illegible]
[illegible]	4-Warning	Configuration file [chars] is ignored: [chars]	The indicated configuration file was ignored and not used for configuration for the given reason.	virt-infra	[illegible]

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	4-Warning	Property key '[chars]' value '[chars]' ignored: [chars]	The indicated XML configuration property was ignored for the indicated reason	virt-infra	"If the property was not applied due to an invalid " "key or value either change these attributes to "
[illegible]	4-Warning	Configuration generated from file [chars] was applied but could not be saved to NVRAM. See [chars] for more details.	The generated configuration was applied but the resulting system configuration was not saved to the startup-config in NVRAM. The indicated logfile may contain additional information.	virt-infra	"Issue the write memory command on the IOS CLI"
[illegible]	5-Notice	[dec] lines of configuration generated from file [chars]	The indicated file was successfully parsed to generate IOSd configuration commands. The generated configs have not yet been applied to the system.	virt-infra	LOG_STD_NO_ACTION
[illegible]	4-Warning	CVLA memory utilization has declined below its threshold memory is available for [chars].	After CVLA was in memory shortage memory utilization has declined below its threshold New traffic flows will be opened properly	qfp-cvla	LOG_STD_ACTION
[illegible]	4-Warning	CVLA reached maximum configured memory utilization. Can't allocate more memory for [chars].	Because of CVLA memory shortage new flows may not be opened properly	qfp-cvla	LOG_STD_ACTION
[illegible]	4-Warning	System free memory has increased above its lower watermark memory is available for [chars].	After system memory was in shortage free memory has increased above its lower watermark New traffic flows will be opened properly	qfp-cvla	LOG_STD_ACTION

[illegible]	3-Error	Switching to the clock on slot [dec] port [dec] line [dec]	The TDM primary clock is switching to the clock coming in via\n\ the trunk specified most likely after the router-shelf\n\ and hence feature boards reload. The phase of the output TDM \n\ clock is forced to align with the input reference during the \n\ switchover.	-	LOG_STD_ACTION
[illegible]	3-Error	Switching to the clock on slot [dec] port [dec] line [dec] as the current primary has gone bad	The TDM primary clock has switched to a backup clock coming in \n\ via the specified trunk as the current primary clock has gone\n\ bad.	-	LOG_STD_ACTION
[illegible]	3-Error	Moving to NORMAL mode from HOLDOVER mode clock is slot [dec] port [dec] line [dec]	The TDM primary clock which is in HOLDOVER mode and whose source \n\ was a trunk port has switched to the same trunk port and moved\n\ to NORMAL mode with a phase alignment between input \n\ source clock and output TDM reference clock. Most likely the \n\ router-shelf and hence the feature boards have reloaded.	-	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Moving to NORMAL mode from HOLDOVER mode without phase correction clock is slot [dec] port [dec] line [dec]	The source trunk port of the TDM primary clock which had gone bad \n\ has turned good again before the holdover timer expiry. Hence the \n\ primary has moved from HOLDOVER to NORMAL state without phase \n\ correction between input trunk reference and the output TDM clock.	-	LOG_SID_ACTION
[illegible]	3-Error	The System Primary Clock is up. Moving to NORMAL state from HOLDOVER	The TDM primary clock which had gone bad has turned good within\n\ the holdover time. Hence the TDM primary clock switches to the \n\ NORMAL mode from the HOLDOVER mode.	-	LOG_SID_ACTION
[illegible]	5-Notice	Clock moving to NORMAL from FREERUN selected clock is on slot [dec] port [dec] line [dec]	The primary TDM clock which has been running off the \n\ local oscillator of DSC in FREERUN mode has switched to the line \n\ clock coming in via the specified trunk.	-	LOG_SID_ACTION
[illegible]	3-Error	Clock moving to NORMAL from HOLDOVER selected clock is external clock on DSC	The current primary TDM clock has been deleted and hence the\n\ system primary has switched to the clock coming in via the\n\ external network reference clock on the DSC front panel which \n\ is the current highest priority good clock. Phase \n\ continuity is maintained during the switchover	-	LOG_SID_ACTION
[illegible]	3-Error	Switching to the user configured external clock on DSC	-	-	LOG_SID_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Switching to the external clock on DSC	The TDM primary clock is switching to the clock coming in via\n\ the DSC front panel most likely after the router-shelf\n\ and hence feature boards reload. The phase of the output TDM \n\ clock is forced to align with the input reference during the\n\ switchover.	-	LOG_STD_ACTION
[illegible]	3-Error	Switching to the external clock on DSC as the current primary has gone bad	The TDM primary clock has switched to a backup clock coming in \n\ via the DSC front panel external clock feed as the current primary \n\ clock has gone bad.	-	LOG_STD_ACTION
[illegible]	3-Error	Moving to NORMAL mode from HOLDOVER mode selected external clock on DSC	The TDM primary clock which is in HOLDOVER mode and whose source \n\ was a the DSC front panel clock has switched to the same clock \n\ and moved to the NORMAL mode.	-	LOG_STD_ACTION
[illegible]	3-Error	Moving to NORMAL mode from HOLDOVER mode without phase correction selected external clock on DSC	The DSC front panel clock which is the source of the current TDM \n\ primary clock and which had gone bad has turned good again before \n\ the holdover timer expiry. Hence the primary has moved from HOLDOVER \n\ to NORMAL state without phase correction between input reference and \n\ the output TDM clock.	-	LOG_STD_ACTION
[illegible]	5-Notice	Clock moving to NORMAL from FREERUN selected clock is external clock on DSC	The primary TDM clock which has been running off the \n\ local oscillator of DSC in FREERUN mode has switched to the \n\ external network reference clock being fed from the DSC front\n\ panel.	-	LOG_STD_ACTION

[illegible]	4-Warning	mLACP has recovered from a peer down failure in redundancy group [dec]	mLACP is now in communication with the peer device and has recovered from a previous peer down failure.	lacp	"This message may not require any action. However the " "<CmdBold>show lacp multi-chassis group<NoCmdBold> and " "<CmdBold>show lacp multi-chassis port-channel<NoCmdBold> commands may be used " "to verify the state of the mLACP port-channels. Reference the mLACP section " "of the IOS documentation for details on peer down failures and related " "configuration commands."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	6-Information	mLACP peer is now connected in redundancy group [dec]	This message indicates that the local mLACP device is now connected to a peer device in the specified redundancy group.	lacp	"No action is required. To view the peer information the command " "<CmdBold>show lacp multi-chassis peer</CmdBold> or " "<CmdBold>show lacp multi-chassis group</CmdBold> may be issued."
[illegible]	2-Critical	The Ethernet OAM protocol has encountered the critical error: [chars].	The protocol has run into a critical error. The reason should be given in the brackets.	ether-oam	LOG_STD_ACTION
[illegible]	2-Critical	ETHERNET OAM ISSU client failed to get buffer for message. Error: [dec] [chars]	The ETHERNET OAM ISSU client failed to get buffer space for building a negotiation message. A negotiation message cannot be sent to the standby device. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly.	ether-oam	"show logging and show checkpoint client"
[illegible]	2-Critical	ETHERNET OAM ISSU client initialization failed to [chars]. Error: [dec] [chars]	The ETHERNET OAM ISSU client could not be initialized. This initialization failure must be addressed before in-service software upgrade or downgrade can be performed successfully. If you do not address this failure there will be downtime during software upgrade or downgrade.	ether-oam	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	2-Critical	ETHERNET OAM ISSU client failed to send negotiation message. Error: [dec] [chars]	The ETHERNET OAM ISSU client failed to send a session negotiation message to the peer device. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly.	ether-oam	"show logging and show checkpoint client"
[illegible]	2-Critical	ETHERNET OAM ISSU client encountered unexpected client nego_done. Error: [dec] [chars]	An ISSU-compliant client transitions through a series of internal states. The ETHERNET OAM ISSU client encountered a 'client negotiation done' state that was unexpected. If a problem occurs with the ISSU session negotiation the standby device cannot be brought up properly.	ether-oam	"show issu session <client_id> and " "show issu negotiated capability <session_id>"
[illegible]	2-Critical	ETHERNET OAM ISSU client failed to register session information. Error: [dec] [chars]	The ETHERNET OAM ISSU client failed to register session information. If a problem occurs with the ISSU session registration the standby device cannot be brought up properly.	ether-oam	"show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>"
[illegible]	3-Error	ETHERNET OAM ISSU client does not have a valid registered session.	The ETHERNET OAM ISSU client does not have a valid registered session.	ether-oam	"show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>"
[illegible]	3-Error	Loopback operation on interface [chars] has encountered an error[chars].	Because of the specified error the loopback operation has ended abnormally.	ether-oam	LOG_STD_NO_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	ETHERNET OAM ISSU client failed to get the MTU for Message Type [dec]. Error: [dec] [chars]	The ETHERNET OAM ISSU client failed to calculate the MTU for the specified message. The ETHERNET OAM ISSU client is not able to send the message to the standby device.	ether-oam	"show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>"
[illegible]	3-Error	ETHERNET OAM ISSU client failed to unregister session information. Error: [dec] [chars]	The ETHERNET OAM ISSU client failed to unregister session information.	ether-oam	"show issu session <client_id> and " "show issu negotiated capability <session_id>"
[illegible]	3-Error	ETHERNET OAM ISSU client [chars] transform failed for 'Message Type [dec]'. Error: [dec] [chars]	The ETHERNET OAM ISSU client could not transform the specified message type. If the transmit transformation failed the checkpoint message was not sent to the standby device. If the receive transformation failed the checkpoint message was not applied on the standby device. In both cases the ETHERNET OAM state between the active device and the standby device is not identical.	ether-oam	"show issu session <client_id> and " "show issu negotiated version <session_id>"
[illegible]	4-Warning	\nether_oam-issu-compat: returned FALSE	The compatibility checking has failed	ether-oam	[illegible]
[illegible]	5-Notice	[chars] is received from the remote client on interface [chars].	An Event TLV is received from the remote OAM client. It must have detected errors in receiving frames from this local interface.	ether-oam	[illegible]
[illegible]	5-Notice	[chars] detected over the last [chars] on interface [chars].	A monitored error has been detected to have crossed the user-specified threshold.	ether-oam	[illegible]

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	6-Information	The client on interface [chars] has received a Critical Event indication from its remote peer action = [chars]	An OAMPDU has been received from the remote client that indicates a Critical Event has occurred. The indicated action will be performed. If the action is error-block the link will go into error-block state where data traffic is blocked but link-oam can still be exchanged. If the action is error-disable the link is brought down.	ether-oam	"Investigate the issue on the remote peer"
[illegible]	6-Information	The client on interface [chars] has received a clear of the Critical Event indication from its remote peer action = [chars]	An OAMPDU has been received from the remote client that indicates that the Critical Event condition previously seen has cleared. If the action was error-block traffic on the link will now be re-enabled. Error-disable state can only be cleared by performing a shut/no shut of the interface.	ether-oam	LOG_STD_NO_ACTION
[illegible]	6-Information	The client on interface [chars] has received a Dying Gasp indication from its remote peer failure reason = [chars] action = [chars]	An OAMPDU has been received from the remote client that indicates a Dying Gasp which may signal that the remote client is about to go down. The indicated action will be performed. If the action is error-block the link will go into error-block state where data traffic is blocked but link-oam can still be exchanged. If the action is error-disable the link is brought down.	ether-oam	"Investigate the issue on the remote peer"

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	6-Information	The client on interface [chars] has received a clear of the Dying Gasp indication from its remote peer action = [chars]	An OAMPDU has been received from the remote client that indicates that the Dying Gasp condition previously seen has cleared. If the action was error-block traffic on the link will now be re-enabled. Error-disable state can only be cleared by performing a shut/no shut of the interface.	ether-oam	LOG_STD_NO_ACTION
[illegible]	6-Information	The client on interface [chars] has entered the OAM session.	Ethernet OAM client on the specified interface has detected a remote client and has entered the OAM session.	ether-oam	LOG_STD_NO_ACTION
[illegible]	6-Information	The client on interface [chars] has left the OAM session.	Ethernet OAM client on the specified interface has experienced some state change.	ether-oam	LOG_STD_NO_ACTION
[illegible]	6-Information	The client on interface [chars] has received a Link Fault indication from its remote peer action = [chars]	An OAMPDU has been received from the remote client that indicates a Link Fault has been detected. This indicates a fault has occurred in the receive direction of the sending client. The indicated action will be performed. If the action is error-block the link will go into error-block state where data traffic is blocked but link-oam can still be exchanged. If the action is error-disable the link is brought down.	ether-oam	"Check the wiring between the two interfaces."
[illegible]	6-Information	The client on interface [chars] has received a clear of the Link Fault indication from its remote peer action = [chars]	An OAMPDU has been received from the remote client that indicates that the Link Fault condition previously seen has cleared. If the action was error-block traffic on the link will now be re-enabled. Error-disable state can only be cleared by performing a shut/no shut of the interface.	ether-oam	LOG_STD_NO_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	6-Information	The client on interface [chars] has timed out and exited the OAM session.	The Ethernet OAM client on the specified interface has not received any OAMPDUs in the number of seconds for timeout that were configured by the user. The client has exited the OAM session.	ether-oam	LOG_STD_NO_ACTION
[illegible]	6-Information	Interface [chars] has [chars] the [chars] loopback mode.	The specified interface has entered or exited loopback mode because of protocol control or an external event such as the interface link going down.	ether-oam	LOG_STD_NO_ACTION
[illegible]	3-Error	Peer ICCP version [dec] is incompatible with local ICCP version [dec].	P-mLACP peer is running with a different version of ICCP. Incompatible ICCP would prevent P-mLACP from working properly.	lacp	"Reboot peer with identical IOS version would " "correct the issue. Compatible ICCP version between " "different IOS images can still be achieved by doing " "show lacp multichassis load-balance group on the both" " devices to check if ICCP versions are compatible. If ICCP " "versions are incompatible repeat IOS image loading " " and CLI above until a compatible image is loaded."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action

[illegible]	3-Error	Internal error: [chars]	An internal software error has occurred.	evpn-mgr	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Maximum number of peers [dec] exceeded for Ethernet Segment [chars] in	EVPN has received a peer nexthop update from BGP which would push the number of peers in the Ethernet Segment past the supported limit for single-active redundancy mode. The newly discovered peer will not be added to the peer list so as not to impact current peering and designated forwarder election results.	evpn-mgr	"Take one of the PE's out of the Ethernet Segment by modifying or " "removing its ESI configuration. If it's a PE already peering need to " "toggle the access interface or reconfigure ESI on the newly discovered " "peer to ensure it is re-advertised."
[illegible]	3-Error	Maximum number of peers [dec] exceeded for Ethernet Segment [chars] in	EVPN has received a peer nexthop update from BGP which would push the number of peers in the Ethernet Segment past the supported limit for single-active redundancy mode. The Ethernet Segment will be disabled.	evpn-mgr	"Take one of the PE's out of the Ethernet Segment by modifying or " "removing its ESI configuration. If it's a PE already peering need to " "toggle the access interface or reconfigure ESI on the newly discovered " "peer to ensure it is re-advertised."

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Missing multicast group configuration for L2 VNI [dec]	A Layer 2 VNI used for EVPN must have an associated multicast group for Broadcast Unknown Unicast and Multicast traffic when static replication is configured.	evpn-mgr	"Correct the configuration by adding the " "mcast-group keyword to the 'member vni' command " "in the NVE interface sub-mode."
[illegible]	3-Error	EVIs with different encapsulation types are not supported in the same Ethernet Segment[[chars]]	All EVPN instances associated with an Ethernet Segment must have the same encapsulation type.	evpn-mgr	"Correct the configuration by changing the encapsulation type of the " "EVPN instances associated with the Ethernet Segment to be the same."
[illegible]	5-Notice	Traffic may drop on the CE side depending on the CE behavior	On the CE side traffic may drop depending on the CE behavior traffic could be hashed to a specific link in the MC-LAG group.	evpn-mgr	LOG_STD_NO_ACTION
[illegible]	5-Notice	Bringing up multi-homing access interface [chars]	EVPN has recovered from a core isolation failure and is bringing up the multi-homing access interface.	evpn-mgr	LOG_STD_NO_ACTION
[illegible]	5-Notice	Cleared duplicate IP address [chars] EVI [dec] [chars] [dec]	EVPN has cleared the duplicate condition on a IP address that was previously detected as a duplicate.	evpn-mgr	LOG_STD_NO_ACTION
[illegible]	5-Notice	Cleared duplicate MAC address [enet] EVI [dec] [chars] [dec]	EVPN has cleared the duplicate condition on a MAC address that was previously detected as a duplicate.	evpn-mgr	LOG_STD_NO_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	5-Notice	Local redundancy mode change is not allowed for Ethernet Segment [chars] because it has two or more forwarders.	Local redundancy mode change is not allowed for Ethernet Segments with two or more forwarders. Configuration is updated while local redundancy mode is kept unchanged. Local redundancy mode will be updated when the number of forwarders drops to less than two.	evpn-mgr	"Reduce the number of forwarders to less than two to allow local " "redundancy mode change."
[illegible]	5-Notice	Local redundancy mode has been changed to [chars] for Ethernet Segment [chars].	An event has occurred that has caused local redundancy mode to change.	evpn-mgr	LOG_STD_NO_ACTION
[illegible]	5-Notice	Detected a static route already installed for VRF ID destination IP [%lu [chars]] with full prefix length. EVPN will install a static route which may be overridden in RIB by the other static route.	EVPN installs a static route for learned local and proxy MAC/IPs with the IP as the destination prefix and full prefix length. A static route matching this has already been installed either by the configuration CLI or another application owner. The EVPN one is installed with lower administrative distance and may be overridden by routes with the same prefix length.	evpn-mgr	"If an IPv4 or IPv6 static route for this VRF prefix and full prefix " "length has been configured intentionally this message can be ignored. " "If not intentionally remove the configuration so that the EVPN RIB " "entries can be activated."
[illegible]	5-Notice	Peer [chars] [chars] is [chars]	An event has occurred that has caused the peer to change status	evpn-mgr	LOG_STD_NO_ACTION
[illegible]	5-Notice	EVPN[[dec] [dec]/[dec]]: VC state [chars]	An event has occurred that has caused the vc to change status	evpn-mgr	LOG_STD_NO_ACTION
[illegible]	3-Error	[dec]	IPC handler initialization failed.	qfp-evtmon	LOG_STD_ACTION
[illegible]	4-Warning	feature user failed to [chars] because of [chars]	Event monitor feature user failed to attach or detach.	qfp-evtmon	LOG_STD_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	4-Warning	event record update failed	Event monitor failed to attach or detach event record.	qfp-evtmon	LOG_STD_ACTION
[illegible]	4-Warning	[hec]	Received an invalid IPC messages subtype.	qfp-evtmon	LOG_STD_ACTION
[illegible]	3-Error	Operation not permitted for pid %d tid %d	"Eventlib has detected that a process has attempted to invoke an API that is listed as having a level of permission."	iosxe-binos-utils	"Review the process logs taking note of the timestamp information to select specific information to review. Research and attempt to resolve the issue using the tools and utilities provided at http://www.cisco.com/tac. With some messages

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	A preferred library has failed to initialize: %s	"Eventlib has detected that a preferred library which provides infrastructure services has failed to fully initialize."	iosxe-binos-utils	"Review the process logs taking note of the timestamp information to select specific information to review. Copy the message and other related information exactly as it appears on the console or in the system log. Research and attempt to resolve the issue using the tools and utilities provided at http://www.cisco.com/tac. With some messages
[illegible]	6-Information	Preferred library is absent	"Eventlib has detected that a preferred library is missing from the process."	iosxe-binos-utils	"This is an informational message."
[illegible]	3-Error	[chars] : ifindex is zero for interface [chars]. Unit : [dec] Slot : [dec]	IFINDEX of a capwap idb is zero.	-	"show idb"
[illegible]	3-Error	Error: Bulk sync status : %s	Bulk sync status Error message. TERMINATED - Bulk-sync terminated	ewlc-ha	LOG_STD_NO_ACTION
[illegible]	3-Error	Error: Wireless config sync not complete. Reloading the WLC!	Switchover happens before wireless config sync is complete!	ewlc-ha	LOG_STD_ACTION
[illegible]	6-Information	INFO: Bulk sync status : %s	Bulk sync status INFO message. COLD - Bulk-sync ongoing. CONFIG_DONE - critical DB sync complete. WARM - Most of the DB's synced. HOT - Bulk-sync completed	ewlc-ha	LOG_STD_NO_ACTION

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	Event name: %s	System has detected an excessive number of sub-events. Normal WLC functionality may be impacted.	ewlc-app-infra	LOG_STD_ACTION
[illegible]	3-Error	Error in %s	General ewlc Error Message.	iosxe-binos-utils	LOG_STD_ACTION
[illegible]	4-Warning	CPU Utilization %s	CPU utilisation for the process has breached the monitored level	ewlc-ap	-
[illegible]	6-Information	CPU Utilization %s	CPU Utilisation for the process has recovered below the monitored level	ewlc-ap	LOG_STD_NO_ACTION
[illegible]	3-Error	EWLC L2 ISSU client failed to get buffer for message error [dec]	EWLC L2 ISSU client failed to get buffer for building\n\ a negotiation message. Hence it can send the negotiation\n\ message to the standby unit. When there is a problem in\n\ the negotiaiton the standby unit can not be brought up.	platform-ha	"show logging and show checkpoint client"
[illegible]	3-Error	EWLC L2 ISSU client capability list is empty.	The EWLC L2 ISSU client capability exchange list size\n\ is invalid.	platform-ha	"show issu capability entries <Client_ID>"
[illegible]	3-Error	EWLC L2 ISSU client capability exchange result incompatible.	The EWLC L2 ISSU client capability exchange has negotiated\n\ as incompatible with the peer.	platform-ha	"show issu negotiated capability <Session_ID>"
[illegible]	3-Error	EWLC L2 ISSU client [chars]	EWLC L2 ISSU client observed an error during capability\n\ negotiation. When this error happens there is a mismatch\n\ between the client capability between the active and\n\ standby unit.	platform-ha	"show issu capability entries <client_id> and\n\ show issu session <client_id> and\n\ show issu negotiated capability <session_id>"

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	EWLC L2 ISSU client initialization failed at [chars] error [chars]	EWLC L2 ISSU client could not be initiailzed this will\n\ cause catstrophic failure when ISSU upgrade or downgrade\n\ is performed.	platform-ha	[illegible]
[illegible]	3-Error	EWLC L2 ISSU client message [dec] is not compatible	EWLC L2 ISSU client received an incompatible message\n\ from the peer unit. Since the message is not compatible\n\ it can be processed by this unit	platform-ha	"show issu message group <client_id> and\n\ show issu session <client_id> and\n\ show issu negotiated version <session_id>"
[illegible]	3-Error	EWLC L2 ISSU client failed to get the message size for message [dec]	EWLC L2 ISSU client failed to calculate message size\n\ for the message specified. The EWLC L2 ISSU client will not\n\ be able to send message to the standby unit.	platform-ha	"show issu message group <client_id> and\n\ show issu session <client_id> and\n\ show issu negotiated version <session_id>"
[illegible]	3-Error	EWLC L2 ISSU client message type [dec] is [chars]	EWLC L2 ISSU client received an message type which it\n\ does not support. The policy is applied to make the session\n\ compatible.	platform-ha	"show issu session <client_id>"
[illegible]	3-Error	EWLC L2 ISSU client failed to send a negotiation message error [dec]	EWLC L2 ISSU client could not send a session negotiation\n\ message to the peer. When there is a problem in the\n\ negotiation the standby unit can not be brought up.	platform-ha	"show logging and show checkpoint client"

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	EWLC L2 ISSU client [chars]	EWLC L2 ISSU client observed an error during a session\n\ negotiation with the peer unit. When there is a problem\n\ with the session the standby unit can not be brought up.	platform-ha	"show issu capability entries <client_id> and\n\ show issu session <client_id> and\n\ show issu negotiated capability <session_id>"
[illegible]	3-Error	EWLC L2 ISSU client failed to unregister session information. Error: [dec] [chars]	The EWLC L2 ISSU client failed to unregister session information.	platform-ha	"show issu session <client_id> and " "show issu negotiated capability <session_id>"
[illegible]	3-Error	EWLC L2 ISSU client [chars] transform failed error [chars]	EWLC L2 ISSU client could not transform the message.\n\ If the transmit transformation failed it means that the\n\ checkpoint message can not be sent to the standby unit.\n\ If the receive transformation failed it means that the\n\ checkpoint message can not be applied on the standby\n\ unit. In both cases the EWLC L2 state will not\n\ be indentical with the active unit.	platform-ha	"show issu session <client_id> and\n\ show issu negotiated version <session_id>"

[illegible]	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
[illegible]	3-Error	[chars]	Bulk sync failure the reason for the failure will be provided in the string	platform-ha	"Copy the error message exactly as it appears. Copy down the system's\n\ configuration along with any other relevant information. Contact your\n\ technical support representative for assistance."
[illegible]	3-Error	File [chars] open failed	File Open failed	platform-ha	[illegible]
[illegible]	3-Error	Invalid [chars] message received	A message that is used for state synchronization was not received correctly. An internal data structure for a message could not be retrieved. The failure most likely occurred because of a software error. The system state between the active and standby units might not be properly synchronized.	platform-ha	[illegible]

FAST_HELLO-6-VERSION_MISMATCH	6-Information	Local switch protocol version :[dec] Peer switch protocol version : [dec]	Informational messages regarding the software versions running on the switch	cat4k-vss	LOG_STD_ACTION
IPC_CORE-3-NO_MEMORY	3-Error	No Memory or buffer for [chars] to be send to [dec]	Sufficient memory was unavailble for Router Shelf to send any command or \n\ acknowledment to the feature boards.	-	LOG_STD_ACTION
FDDI-1-NOMEMORY	1-Alert	msgtxt_nomemory	-	mid-fddi	"Copy the error message exactly as it appears and report it to your\n\ technical support representative."
FDDI-3-BADSLOT	3-Error	Unit [dec] Slot [dec] does not exist.	The main processor detects an invalid slot location for one of the\n\ network interface cards. This should never happen.	mid-fddi	"Call your technical support representative about obtaining a\n\ replacement card."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
FDDI-3-BADUNIT	3-Error	msgtxt_badunit	This error message is displayed when the system cannot find\n\ the chipset registers where it expects them to be.\n\ This is most likely a hardware error.	mid-fddi	[illegible]
FDDI-3-FDDIFAIL	3-Error	Interface [chars] [chars] [chars] = [hex]	The FDDI interface failed.	mid-fddi	"Save the output of the error message and call your technical support\n\ representative for assistance."
FDDI-3-FDDIFAIL2	3-Error	Interface [chars] [chars] [chars] = [hex] [chars] = [hex]	The FDDI interface failed. This is the second line of the preceding\n\ FDDIFAIL message. This line contains debug information.	mid-fddi	"Save the output of the error message and call your technical support\n\ representative for assistance."
FDDI-3-NOCAM	3-Error	Unit [dec] No CAM exists for this interface.	A hardware or software error occurred.	mid-fddi	"Copy the error message exactly as it appears and report it to your\n\ technical support representative."
FEC_ISSU-3-BUFFER	3-Error	FEC ISSU client failed to get buffer for message error [dec]	FEC ISSU client failed to get buffer for building a negotiation message. Hence it can send the negotiation message to the standby unit. When there is a problem in the negotiaiton the standby unit can not be brought up.	L2	"show logging and show checkpoint client"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
FEC_ISSU-3-CAPABILITY	3-Error	FEC ISSU client [chars]	FEC SWITCH ISSU client observed an error during capability negotiaiton. When this error happens there is a mismatch between the client capability between the active and standby unit.	L2	"show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>"
FEC_ISSU-3-INIT	3-Error	FEC ISSU client initialization failed at [chars] error [chars]	FEC ISSU client could not be initiailzed this will cause catstrophic failure when ISSU upgrade or downgrade is performed.	L2	LOG_STD_ACTION
FEC_ISSU-3-MSG_NOT_OK	3-Error	FEC ISSU client message [dec] is not compatible	FEC ISSU client received an incompatible message from the peer unit. Since the message is not compatible it can be processed by this unit	L2	"show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>"
FEC_ISSU-3-MSG_SIZE	3-Error	FEC ISSU client failed to get the message size for message [dec]	FEC ISSU client failed to calculate message size for the message specified. The OIR ISSU client will not be able to send message to the standby unit.	L2	"show issu message group <client_id> and " "show issu session <client_id> and " "show issu negotiated version <session_id>"
FEC_ISSU-3-POLICY	3-Error	FEC ISSU client message type [dec] is [chars]	FEC ISSU client received an message type which it does not support. The policy is applied to make the session compatible.	L2	"show issu session <client_id>"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
FEC_ISSU-3-SEND_FAILED	3-Error	FEC ISSU client failed to send a negotiation message error [dec]	FEC ISSU client could not send a session negotiation message to the peer. When there is a problem in the negotiation the standby unit can not be brought up.	L2	"show logging and show checkpoint client"
FEC_ISSU-3-SESSION_UNREGISTRY	3-Error	FEC ISSU client failed to unregister session information. Error: [dec] [chars]	The FEC ISSU client failed to unregister session information.	L2	"show issu session <client_id> and " "show issu negotiated capability <session_id>"
FEC_ISSU-3-TRANSFORM	3-Error	FEC ISSU client [chars] transform failed error [chars]	FEC ISSU client could not transform the message. If the transmit transformation failed it means that the checkpoint message can not be sent to the standby unit. If the receive transformation failed it means that the checkpoint message can not be applied on the standby unit. In both cases the FEC state will not be indentical with the active unit.	L2	"show issu session <client_id> and " "show issu negotiated version <session_id>"
FEC_ISSU-3-SESSION	3-Error	FEC ISSU client [chars]	FEC ISSU client observed an error during a session negotiation with the peer unit. When there is a problem with the session the standby unit can not be brought up.	L2	"show issu capability entries <client_id> and " "show issu session <client_id> and " "show issu negotiated capability <session_id>"

FM-3-CONFLICT	3-Error	[chars] [chars] conflicts with [chars]	Port access lists PACLs may not be applied when input router access lists or VLAN maps have been applied and vice versa	firmware	"Remove the conflicting feature or features"
FM-3-GOTLABEL	3-Error	Got label for [chars]	The Feature Manager has now been able to allocate a hardware label for the interface. The interface had needed a label before but none was available.	-	LOG_STD_NO_ACTION
FM-3-GOTVLABEL	3-Error	Got label for VLAN #[dec]	The Feature Manager has now been able to allocate a hardware label for the VLAN. The VLAN had needed a label before but none was available.	-	LOG_STD_NO_ACTION
FM-3-ILLEGALCOPY	3-Error	Illegal copy of [chars] access group [chars] from [chars] label [dec] to [dec]	An internal software error has occurred	firmware	"show running-config"
FM-3-INITLABEL	3-Error	Special initialization of label [dec] failed	Initialization of the access list hardware failed. Prioritization of routing protocol packets above other kinds of packets may not occur on some VLANs or routed ports.	firmware	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
FM-3-INSERTFAIL	3-Error	Insert of access-map [chars] #[dec] into [chars] label [dec] failed	The system ran out of CPU memory when trying to merge sections of an access map.	firmware	"Reduce other system activity to ease the memory demands. For example " "remove any ACLs that have been defined but are not now used. Use " "simpler ACLs with fewer access control entries ACEs. Use fewer "
FM-3-INTTABLE	3-Error	Not in truth table: VLMAP [dec] RACL [dec] Rtprot [dec] Redir [dec] Mcb [dec] Feat [dec]	An unrecoverable software error occurred while trying to merge the configured input features.	firmware	"show running-config"
FM-3-LABELERROR	3-Error	Incorrect label to [chars] vlan label attribute copy callback srclabel [dec] dstlabel [dec]	The Feature Manager attribute copy callback was called with an incorrect source or destination label.	firmware	"show running-config"
FM-3-MAXRECURSION	3-Error	Too many [dec] levels of recursion while merging [chars] code [dec].	The configuration is too complicated for the platform specific ACL merge code to support. Most likely cause is including too many separate access lists in a single VLAN map or policy map.	-	"Reduce the number IP or MAC access lists" " considered separately in any one VLAN or policy"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
FM-3-MERGEFAIL	3-Error	[chars] ACL merge error [dec] [chars] on [chars] label [dec]	The Feature Manager was unable to complete the merge of the configured features into a form suitable for loading into the hardware. Packets potentially affected by this feature will be sent to the CPU for processing instead. The most likely cause is specifying an ACL that is too large or too complex for the system to handle.	firmware	"Try specifying a smaller and less complicated " "configuration."
FM-3-NOLABEL	3-Error	Cannot allocate [chars] label for interface [chars]	The Feature Manager was unable to allocate a label for the features on this interface. This means that the hardware cannot be programmed to implement the features and packets for this interface will be filtered in software. There is a limit of 256 labels per direction.	firmware	"Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same ACLs on multiple " "interfaces if possible."
FM-3-NOLABELVL	3-Error	Cannot allocate [chars] label for VLAN [dec]	The Feature Manager was unable to allocate a label for the features on this VLAN. This means that the hardware cannot be programmed to implement the features and packets on this VLAN will be filtered in softtware. There is a limit of 256 labels per direction.	firmware	"Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same VLAN Maps on multiple " "VLANs if possible."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
FM-3-NOTEMPTY	3-Error	Illegal copy of attribute to non empty [chars] vlan label [dec]	The Feature Manager attribute copy callback was called with a destination label already being used by a VLAN or routed port.	firmware	"show running-config"
FM-3-NOTOBJECT	3-Error	Invalid object VLAN [dec] IDB [hec] used in Feature Manager operation	An internal software error has occurred	firmware	"show running-config"
FM-3-OUTTTABLE	3-Error	Not in truth table: RACL [dec] VLMAP [dec]	An unrecoverable software error occurred while trying to merge the configured output features.	firmware	"show running-config"
FM-3-QOSTTABLE	3-Error	Not in truth table: ACL [dec] in map action [dec]	A software error occurred while trying to merge a QoS Policy Map	firmware	"show running-config"
FM-3-RELOADED	3-Error	Reloading [chars] label [dec] feature in [chars]	The Feature Manager was able to fit more of the configured features on this label into the hardware. One or more features had previously been unloaded because of lack of space.	-	LOG_STD_NO_ACTION
FM-3-TOSCOST	3-Error	Minimize monetary cost TOS bit unsupported in hardware ignored	This hardware platform supports filtering based on DSCP rather than TOS and precedence. The DSCP field does not include the minimize monetary cost bit from the TOS field so hardware will ignore this bit when checking for a match to an ACE. This can lead to unintended filtering actions.	firmware	"Design filters that do not test for minimum " "monetary cost TOS."
FM-3-UNKNOWNACTION	3-Error	Unknown VMR access group action 0x[hec]	An internal software error has occurred.	firmware	LOG_STD_ACTION

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
FM-3-UNLOADING	3-Error	Unloading [chars] label [dec] feature from [chars]	The Feature Manager was unable to fit the complete configuration into the hardware so some features will have to be applied in software. This prevents some or all of the packets from being forwarded in hardware and requires them to be forwarded by the CPU. Multicast packets may be dropped entirely instead of being forwarded.	firmware	"Allocate more space to the relevant section " "of the TCAM and reboot or else use a simpler " "configuration. Use the same ACLs on multiple " "interfaces if possible."
FM-3-WRONGLABEL	3-Error	Inconsistent records of label for [chars]: FM has [dec] LM has [dec]	An internal software error has occurred.	firmware	"show running-config"
FM-4-EXCESSSECONDARY	4-Warning	More than [dec] secondary IP addresses configured on interface [chars]	When secondary IP addresses are configured on an interface the hardware is usually programmed so that the ICMP redirect functionality on the CPU is not notified of packets sent between two subnets configured on the same interface. If many secondary IP addresses are configured on the same interface it becomes impractical to program the hardware in this manner this message is logged and the CPU will be notified of every packet sent between two subnets on this interface. No ICMP redirects will be sent in error but the CPU usage may increase because of the additional notifications. The user may wish to configure \no ip redirects\ on the interface to reduce the CPU load on the system.	firmware	"configure the \"no ip redirects\" command on " "this interface"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
FM-7-TRANSDEF	7-Debug	No augmentation function found for VMR	An Internal Error occured. An Access Control List was not interpretted correctly. The Value-Mask Result is incorrect.	firmware	LOG_STD_ACTION
IPSEC_FLOW_ANTI_REPLAY_ERR	3-Error	IPSEC (flow id %d) receives anti-replay error.	"traffic being received is not within the IPSec anti-replay window."	iosxe-fwdmgr	"Check the size of anti-replay window configured. Adjust to maximum 256-bits if needed"

IDS-4-TCP_FTP_SITE_SIG	4-Warning	Sig:3150:FTP Remote Command Execution - from [inet] to [inet]	Triggers when someone tries to execute the FTP SITE command.	ids	

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
					"The FTP Site command allows a user to execute a limited\n number of commands via the FTP server on the host machine. No authentication\n is required to execute the command. The commands that may be executed vary\n\from system to system and on many systems the SITE command is not\n implemented. Recommend that the SITE command be disabled on FTP servers if\n\possible. If this signature is triggered from a source outside of your\n\network prudent security practices would suggest that the source

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
					be shunned."
IDS4-TCP_FTP_SYST_SIG	4-Warning	Sig:3151:FTP SYST Command Attempt - from [inet] to [inet]	Triggers when someone tries to execute the FTP SYST command.	ids	"The FTP SYST command returns the type of operating system\n\that the FTP server is running. Authentication is not required to execute\n\this command. SYST provides information that may be used to refine attack\n\methods. FTP from Linux causes SYST signature to fire. Some proxies such as\n\the TIS Toolkit issue the SYST command as a matter of course. Running an\n\FTP version with SYST disabled."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
IDS_MAJORDOMO_EXECUTE	4-Warning	Sig:3107:Majordomo Execute Attack - from [inet] to [inet]	A bug in the Majordomo program will allow remote users to\n\ execute arbitrary commands at the privilege level of the\n\ server.	ids	"Prudent security practices would suggest that the source of this \n\attempt be shunned."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
IDS4-TCP_NO_FLAGS_SIG	4-Warning	Sig:3040:TCP - No bits set in flags - from [inet] to [inet]	Triggers when a TCP packet is received with no bits set\n\ in the flags field.	ids	"There is no legitimate use for malformed TCP datagrams. This is \n\unusual traffic and warrants investigation. Hacker tools will generate\n\TCP packets with no bits set in the flags field in an attempt to elude\n\intrusion dection. When non-specific network traffic of this\n\type is encountered the most prudent action from a security perspective\n\is to shun or disallow it. If the source of this traffic is legitimate\n\the user will then identify him or herself."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
DSKPSENDMAILBADFROMSG	4-Warning	Sig:3102:Sendmail Invalid Sender - from [inet] to [inet]	-	ids	"For security reasons users should not be allowed to execute programs via e-mail servers. This is a very serious indication that your network may be under attack and the source should be shunned immediately."
DSKPSENDMAILBADTOSG	4-Warning	Sig:3101:Sendmail Invalid Recipient - from [inet] to [inet]	-	ids	"For security reasons users should not be allowed to execute programs via e-mail servers. This is a very serious indication that your network may be under attack and the source should be shunned immediately."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
IDS-4-SMAIL_BOUNCE_SIG	4-Warning	Sig:3100:Smail Attack - from [inet] to [inet]	Triggers on the very common "smail" attack against e-mail\n\ servers. This attack attempts to cause e-mail servers to\n\ execute programs on the attacker's behalf.	ids	"For security reasons users should not be allowed to execute programs via e-mail servers. This is a very serious indication that your\n\network may be under attack and the source should be shunned immediately. "

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
IDS4_SIGCP_SENDMAIL_DECODE	4-Warning	Sig:3105:Sendmail Decode Alias - from [inet] to [inet]	Triggers on any mail message with ": decode@" in the header.\n\ The decode alias is used to uudecode files and is primarily\n\ implemented as a convenience for system administration.	ids	"The decode alias is used to uudecode files and is primarily implemented as a convenience for system administration. For security\n\purposes this should not be allowed and the service should be disabled. If\n\allowed users that mail to the alias will trigger this signature. Recommend blocking of hosts that attempt to mail to this alias especially if they are\n\outside of your network."
IDS4_SIGCP_SENDMAIL_INVALID_COMMAND	4-Warning	Invalid SMTP command - from [inet] to [inet]	Triggers on an invalid SMTP command in the \n\ SMTP connection. This message indicates that a suspicious violation \n\ was detetected that may be an attack to the mail server system.	ids	"This is unusual traffic and may warrant investigation."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
IDS4ICPSENDMAIL_OLD_SIG	4-Warning	Sig:3104:Archaic Sendmail Attacks - from [inet] to [inet]	Triggers when "wiz" or "debug" commands are sent to the SMTP port.	ids	"There is no reason for this type of traffic to be seen on\n\modern networks. There is little chance that there will be any adverse\n\effects from someone attempting these "old" hacks. Prudent security\n\practices would suggest that the source of this attempt be shunned."
IDS4ICPSENDMAIL_SPAM_SIG	4-Warning	Sig:3106:Excessive Rcpt to: SPAM - from [inet] to [inet]	Parse for RCPT TO: in header. Alarm on threshold.	ids	"Some mailing list software may trigger this signature."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
IDS4IDPS-SENDMAIL-VRFY-SG	4-Warning	Sig:3103:Sendmail Reconnaissance - from [inet] to [inet]	Triggers when "expn" or "vrfy" commands are issued to\n\ the SMTP port.	ids	"These commands are commonly used to verify that a user mail\n\account exists on the server or to expand an alias to determine who the\n\actual recipients of a message may be. Users that use the EXPN and VRFY\n\functions for legitimate purposes will trigger this signature. The\n\information that can be obtained is useful but not dangerous on its own\n\Monitoring of future traffic for patterns of misuse is recommended."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
IDS-4-TCP_SYN_ATTACK_SIG	4-Warning	Sig:3050:Half-Open Syn Flood - from [inet] to [inet]	Triggers when the number of half-open TCP connections\n\ exceeds the high-water mark or the one minute high rate mark	ids	"There are no known sources that would legitimately generate\n\this traffic pattern. This may be indicative of some type of network problem\n\and should be investigated. To avoid depletion of your network resources it\n\is recommended that the source be shunned during the course of the\n\investigation. If no network problems are discovered prudent security\n\practices would suggest that the source be shunned permanently."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
IDS-4-TCP_SYN_FIN_SIG	4-Warning	Sig:3041:TCP - SYN and FIN bits set - from [inet] to [inet]	Triggers when a TCP packet is received with both the SYN\n\ and FIN bits set in the flags field.	ids	"There is no legitimate use for malformed TCP datagrams. This is \n\unusual traffic and warrants investigation. Hacker tools will generate\n\TCP packets with the SYN and FIN bits set in the flags field in an \n\attempt to elude\n\intrusion dection. When non-specific network traffic of this\n\type is encountered the most prudent action from a security perspective\n\is to shun or disallow it. If the source of this traffic is legitimate\n\the user will then identify him or herself."

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
IDS-4-UDP_BOMB_SIG	4-Warning	Sig:4050:UDP Bomb - from [inet] to [inet]	Triggers when the UDP length specified is less than the IP\n\ length specified. This malformed packet type is associated\n\ with a denial of service attempt.	ids	"There is no legitimate use for malformed datagrams. This\n\may be indicative of systems that are experiencing problems with their\n\kernel or NIC cards. This is unusual traffic and warrants investigation. When non-specific network traffic of this type is encountered the most\n\prudent action from a security perspective is to shun or disallow it. If the\n\source of this traffic is legitimate the user will then identify him or\n\herself."

When there is a problem in the\n\ negotiation the standby unit can not be brought up.	platform-ha	"show logging and show checkpoint client"
ILP_ISSU-3-SESSION	3-Error	Platform ILPower ISSU client [chars]	Platform Inline Power ISSU client observed an error during a session\n\ negotiation with the peer unit. When there is a problem\n\ with the session the standby unit can not be brought up.	platform-ha	"show issu capability entries <client_id> and\n\ show issu session <client_id> and\n\ show issu negotiated capability <session_id>"
ILP_ISSU-3-SESSION_UNREGISTRY	3-Error	Platform ILPower ISSU client failed to unregister session information. Error: [dec] [chars]	The Platform Inline Power ISSU client failed to unregister session information.	platform-ha	"show issu session <client_id> and " "show issu negotiated capability <session_id>"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
ILP_ISSU-3-TRANSFORM	3-Error	Platform Inline Power ISSU client [chars] transform failed error [chars]	Platform Inline Power ISSU client could not transform the message.\n\ If the transmit transformation failed it means that the\n\ checkpoint message can not be sent to the standby unit.\n\ If the receive transformation failed it means that the\n\ checkpoint message can not be applied on the standby\n\ unit. In both cases the Platform Inline Power state will not\n\ be indentical with the active unit.	platform-ha	"show issu session <client_id> and\n\ show issu negotiated version <session_id>"
ILPOWER_ISSU-3-GET_BUFFER	3-Error	Inline power ISSU client failed to get buffer for message.\n\ Error: [dec] [chars]	Inline power ISSU client failed to get buffer for building\n\ a negotiation message. Hence it cannot send the negotiation\n\ message to the standby unit. When there is a problem in\n\ the negotiaiton the standby unit can not be brought up.	ilpower	"show logging and show checkpoint client"
ILPOWER_ISSU-3-INIT	3-Error	Inline power ISSU client initialization failed to [chars].Error: [dec] [chars]	Inline power ISSU client could not be initailzed this will\n\ cause catstrophic failure when ISSU upgrade or downgrade\n\ is performed.	ilpower	LOG_STD_ACTION
ILPOWER_ISSU-3-INVALID_SESSION	3-Error	Inline power ISSU client does not have a valid registered session.	Inline power ISSU client does not have a valid registered session.\n\ When there is a problem with the session the standby unit cannot\n\ be brought up.	ilpower	"show issu capability entries <client_id> and\n\ show issu session <client_id> and\n\ show issu negotiated capability <session_id>"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
ILPOWER_ISSU-3-MSG_NOT_OK	3-Error	Inline power ISSU client message type [dec] is not compatible	Inline power ISSU client received an incompatible message\n\ from the peer unit. Since the message is not compatible\n\ it cannot be processed by this unit	ilpower	"show issu message group <client_id> and\n\ show issu session <client_id> and\n\ show issu negotiated version <session_id>"
ILPOWER_ISSU-3-MSG_SIZE	3-Error	Inline power ISSU client failed to get the MTU for message type [dec].\n\ Error: [dec] [chars]	Inline power ISSU client failed to calculate MTU\n\ for the message specified. The dot1x ISSU client will not\n\ be able to send message to the standby unit.	ilpower	"show issu message group <client_id> and\n\ show issu session <client_id> and\n\ show issu negotiated version <session_id>"
ILPOWER_ISSU-3-SEND_NEGO_FAILED	3-Error	Inline power ISSU client failed to send negotiation message.\n\ Error: [dec] [chars]	Inline power ISSU client failed to send a session negotiation\n\ message to the peer. When there is a problem in the ISSU\n\ negotiation the standby unit can not be brought up.	ilpower	"show logging and show checkpoint client"
ILPOWER_ISSU-3-SESSION_NEGO	3-Error	Inline power ISSU client encountered unexpected client nego_done.\n\ Error: [dec] [chars]	Inline power ISSU client encountered an unexpected 'client\n\ negotiation done'.	ilpower	"show issu session <client_id> and\n\ show issu negotiated capability <session_id>"

Facility-Severity-Mnemonic	Severity-Meaning	Message	Message-Explanation	Component	Recommended Action
ILPOWER_ISSU-3-ISSU_REGISTRY	3-Error	Inline power ISSU client failed to register session information.\n\ Error: [dec] [chars]	Inline power ISSU client failed to register session information.\n\ When there is a problem with the session the standby unit cannot\n\ be brought up.	ilpower	"show issu capability entries <client_id> and\n\ show issu session <client_id> and\n\ show issu negotiated capability <session_id>"
ILPOWER_ISSU-3-ISSU_UNREGISTRY	3-Error	Inline power ISSU client failed to unregister session information.\n\ Error: [dec] [chars]	Inline power ISSU client failed to unregister session information.	ilpower	"show issu session <client_id> and\n\ show issu negotiated capability <session_id>"
ILPOWER_ISSU-3-TRANSFORM_FAIL	3-Error	Inline power ISSU client [chars] transform failed for message type [dec].\n\ Error: [dec] [chars]	Inline power ISSU client could not transform the message.\n\ If the transmit transformation failed it means that the\n\ checkpoint message can not be sent to the standby unit.\n\ If the receive transformation failed it means that the\n\ checkpoint message can not be applied on the standby\n\ unit. In both cases the Inline power state will not\n\ be indentical with the active unit.	ilpower	"show issu session <client_id> and\n\ show issu negotiated version <session_id>"
ILPOWER-2-PRO_CRIT_LIMIT	2-Critical	Priority [dec] reached critical limit. Load shedding can lead to chassis reload. Please avoid configuring any more ports at this priority level. Maximum interface power is used for this calculation.	This priority level reached maximum allowed wattage	inline-power	"Please distribute ports to another priority"
